Preface

When do you use a dictionary? Is it when you don't know which *kanji* to use, or when you come across a noun or a verb you don't know the meaning of? For things like *kanji* and word meanings, a Japanese language dictionary is very useful. If you want to know the difference between words like うっかり and つい, a thesaurus will help. However, there are times when no conventional dictionary will give you the answer you are looking for. For example, you may want to know exactly what the word せっかく means when it is used in the pattern せっかく…からには, as opposed to the pattern せっかく…けれども. Or you may wonder what sort of thinking lies behind the use of expressions like …にしてからが and …にしたところで, or about the meaning that expressions like …ともかぎらない, …わけではない, and …にちがいない add to the sentences in which they are used. These questions are not dealt with adequately in conventional dictionaries.

This dictionary is a handbook that looks at grammar patterns in terms of their meaning, function, and usage in relation to sentences or clauses. It also describes how these patterns are used in different situations and contexts. When you want to look up expressions that you can't find in conventional dictionaries, or gain information that isn't available in those dictionaries, this handbook will be a powerful resource.

This handbook contains 3,000 entries, including all of the grammar patterns found in the *Chuujooyuu Nihongo Kyookasho Bunkei Sakuin* (eds. Yuriko Sunakawa et al.) and *Bumpoo-tekina Kinoogo no Tagui*, which is part of the test content specifications for Levels 1 and 2 of the Japanese Language Proficiency Test (Japan Foundation/Association of International Education, Japan). It also includes some grammar patterns gathered from newspapers, magazines, novels, movie scripts, and other sources. It is a comprehensive handbook that covers a variety of grammar patterns which Japanese language learners at the intermediate level and above often find to be challenging.

In this handbook we have tried to explain grammar patterns in clear and concise Japanese, so that learners of Japanese as a foreign or second language will find them easy to understand. We have also done the following things.

- (1) Provided as many illustrative examples as possible, in order for readers to be able to grasp how each pattern is used.
- (2) Avoided using *kanji* other than *Jooyoo Kanji* (Kanji for Common Use) and provided a pronunciation guide for *kanji* used in examples.

- (3) Provided examples of “incorrect usage” when appropriate, in order to illustrate common mistakes that learners should take care to avoid.
- (4) Included as much information as possible with respect to the structure of each pattern, situations in which it is actually used, differences from similar expressions, and other points useful for Japanese language learning.
- (5) Made a special effort to deal with expressions typical of spoken language, such as つけ in なんて言ったっけ and っこない in できっこない.
- (6) To facilitate easy look-up of words and expressions, we have also provided three kinds of indexes: a Japanese phonetic syllabary index (50-on index), a reverse order index, and an index of meaning and function groups.

It has been eight years since the plan for this handbook was conceived. Since it was written and edited by a team with whimsical and diverse interests, it would not have been possible to complete it without the support and encouragement of many people. Special thanks go to Toshihiro Fukunishi of Kurosio Publishers, who worked overtime and gave up his days off to ensure that this handbook was published. We are also grateful to Yumiko Sando and Yoko Sato for all of their help. Furthermore, we are indebted to Jiro Abe and the others who collaborated with the editing, and we are also grateful to many friends and colleagues for their feedback and advice.

We sincerely hope that this handbook will be a useful resource for those who are learning Japanese as a foreign or second language, for Japanese language teachers, and for others who are interested in the use of Japanese.

『日本語文型辞典 英語版』への序文

『日本語文型辞典』は、日本語を第二言語として教えたり学んだりする人を対象に編集された辞典です。これまで、中国語版、ベトナム語版、韓国語版、タイ語版が刊行され、アジア圏の多くの方々にご利用いただいておりますが、英語版については刊行が遅れておりました。このたび懸案の英語版が完成し、欧米諸国を含むより広い地域の方々にご利用いただけるようになりました。

これだけ大部の本を英語に訳してくださった翻訳者のみなさま、そして、編集に力を尽くしてくださったくろしお出版の市川麻里子さんを始めとする社員のみなさまには、心からお礼申し上げます。

この辞典を編集する際に心がけたことは、なるべく解説を簡潔にし、その代わりに多くの用例を載せようということと、用例は日本を知らない人にも分かりやすく、かつその使用の場面が想像しやすいものを作ろうということでした。また、探したい表現を見つけやすくするために、見出しや索引の工夫もいたしました。これらの試みが、日本語を教える方や学ぶ方のお役に立つことを心から祈っております。

Preface to the English Edition

A Handbook of Japanese Grammar Patterns is a dictionary that was compiled for the use of teachers and students of Japanese as a foreign or second language. Since publication of the original Japanese edition, translations of the *Handbook* have been published in Chinese, Vietnamese, Korean, and Thai, and many people in Asia have been able to use it. However, publication of an English edition lagged behind. Now that we have finished the long-overdue English edition, it is our hope that many people in Europe, North America, and a wide range of other places will be able to use it.

We are grateful to all of the translators who put so much time and effort into translating a book of this length into English. We are also greatly indebted to Mariko Ichikawa of Kuroso Publishers, as well as to all of the other employees at Kuroso, for their hard work throughout the editing process.

When this dictionary was originally compiled, we tried to keep the grammatical explanations as clear and concise as possible, and to include as many illustrative examples as possible. We also tried to create examples that would be easy to understand, and for which it would be easy to imagine the situation of use. In addition, we tried to make individual grammar patterns and expressions as easy to find as possible, by providing detailed headword listings and multiple indexes. We sincerely hope that our endeavors will be of benefit to teachers and learners of Japanese all over the world.

User's Guide

Guide to the Handbook's structure and use

1. The key contents of this handbook are structured in three tiers. The first tier is a headword and/or head phrase, the second tier is a category heading that shows meaning or function, and the third tier is a sub-heading for further categorization. As shown in the example below, the second tier is numbered using Arabic numerals (1, 2, 3), and the third tier is ordered using letters of the alphabet (a, b, c).
2. Grammatical information is given in the second and third tiers, using grammar symbols and notations. When there are too many notations to be included in the tier heading, they are given inside square brackets [].

Explanation

Grammatical structures and patterns

(1) この三曲のうちでどれが一番気に入りましたか。 / Of these three songs, which

one did you like best?

(2) 三つのうちから好きなものを選びなさい。

/ Choose the one you like out of these three.

(3) バッハとモーツアルトとベートーベンのうちで、一番人気があるのはやはりモーツアルトだそうだ。 / I heard that, as might

be expected, among Bach, Mozart, and Beethoven, the most popular composer is

Mozart.

(4) 昨日買ったCDのうち、2枚はインドネシアのポップスで、3枚はカリブの音楽だ。

/ Of the CDs I bought yesterday, two

are Indonesian pop music and three are

Caribbean music.

Nのうち is used to delimit a range. It can be replaced by Nのなか, as in (1)-(3), when someone is choosing something within that range. In some cases, N1とN2と...のうち is used to list a series of nouns, as in (3).

b ...うちにはいらない

[Nのうちにはいらない]

[A-いうちにはいらない]

[Vうちににはいらない]

- Headwords are listed in the order of the Japanese 50-on syllabary. Headings in the second and third tiers are not necessarily in this order.
- Stable compound expressions such as ていけない and とする are treated as headwords. While conventional dictionaries would list these entries under the headwords いけない and する, this handbook describes their usage under headings that include the particles. At the same time, this handbook also allows users to find these expressions using the conventional route. In other words, multiple look-up methods are possible.
- A Japanese phonetic syllabary index (50-on index), a reverse order index, and a list of meaning and function groups are given at the end of this handbook. When the word you are looking for is not easy to find, or when you want to find an expression using the last word or particle that it contains, this handbook will lead you there quickly.

In these cases, あいだ indicates a period of time in which a state or an action continues, and the sentence that follows indicates a durative state or a parallel action during that period. When the predicate in the following sentence is an action verb, forms which mean duration, such as V-ている, V-づける, are used.

- (×) 私が勉強している間、弟は遊んだ。／ While I was studying, my younger brother played.

(×) 授業の間にずっとおしゃべりをしていた。／ I was chatting during the lesson.

(○) 授業の間に3回質問をした。／ I asked questions three times during the lesson.

【あえて】

① あえて

(1) 私はあえてみなさんに規則の見直しを提案したいと思います。／ I would dare to suggest we re-examine the regulations.

(5) これができるのはあなたしかいないから、負担をかけることはわかっていても、あえてお願ひしているのです。／ I know it is a burden for you, but I dare to ask because only you can do this job.

When あえて is followed by a verb of utterance, like 言う, 提案する, お願いする, or verbs like やる, 実行する, it expresses "doing it would offend others or involve risks and difficulties, but I still

want to do it, or must do it." It is used to state a strong opinion or bring up an idea.

② あえてV-ば

- (1) 反対されるのを承知であえて言えば、こんな計画は百害あって一利なしだ。／ I know there may be objections, but if I dare say so, such a plan is harmful and really no good.

In these cases, when あえて is followed by a verb of utterance such as 言う, お話しする, or 説明する, it is used as a prefatory expression when one wants to say something in spite of an objection or criticism being raised, or when one cannot find an appropriate way to say something.

③ あえて...ない

- (4) みんなに嫌がられてまで、あえて自分の方針を押し通すこともないじゃないか。／ Why do you have to push your policy through while putting people off?

When expressions like する必要もない, することもない, しようとしない follow, あえて expresses the meaning "others would object or be antagonized, so one doesn't, or shouldn't, do such a risky thing."

many applications as they expected, since
they allowed people to apply for the tour

totally excited.
- (8) 自分がリーダーになればみんなついてく
るに決まっているだって？ 思い上がる
のもいい加減にしろ。／Are you saying
everyone will surely follow you if you
become a leader? Stop being conceited.

When あがる is appended to a verb stem, it indicates an action/movement or a state that is going in an upward direction. (5)-(8) are figurative expressions with the meaning of "in an upward direction."

② R-あがる(extreme degree)

- (1) 長い間雨が降らないので、湖も干上がつ

③ R-あがる(accomplishment)

- (1) パンがおいしそうに焼きあがつた。／The bread turned out delicious.
- (2) みんなの意見を取り入れて、とても満足

were printed.

In these cases, あがる is appended to a verb stem and expresses that an action is completed. It is usually appended to transitive verbs that involve making things, such as 編む, 練る, 刷る. The intransitive verb できる is an exception.

- (7) こんな忙しい会社にいつまでもいては過勞死しかねないと思って、思いきって転

職することにした。／ I thought there was a real chance of dying from overwork if I stayed at such a busy company, so I took the plunge and changed jobs.

Follows a clause and indicates that the content of the clause is the speaker's subjective judgment or personal opinion. When used in an interrogative sentence, its function is to ask for the listener's personal judgment or opinion. When used in the dictionary form (と思う) or masu-form (思います) as a declarative statement, the subject is always the speaker and never another person. For example, in (2) the person doing the thinking is 私(I), not 山田先生(Yamada-sensei). If the speaker wishes to say that the person doing the thinking is 山田さん, then use of the form 思っている is required, as in 山田さんは(田中さんが来ない)と思っている (Yamada-san thinks that (Tanaka-san will not come)). However, 思う can refer to a third person's judgment when it is used in *ta*-form, as in the example below.

(例) 山田さんは来ないと思った。／ I thought Yamada-san wouldn't come./Yamada-san thought (someone else) wouldn't come.

In this case, the original sentence can be interpreted as either "I thought Yamada-san wouldn't come" or "Yamada-san thought (someone else) wouldn't come."

b ...とおもっている

- (1) 私は自分のしたことが正しいと思っている。／ I think what I did was right.
- (2) イギリスに留学してよかったと思っている。／ I feel that studying in the U.K. was very good for me.
- (3) 警察はあの男が犯人だと思っている。／ The police think that man is the culprit.
- (4) その実力で合格できると思っているの。／ Do you really think your ability can get you a passing grade?

Follows a clause and expresses an opinion, judgment, or belief on the part of the speaker or another person. The difference between 思っている and 思う (see Usage 1a above) is that 思う is

interpreted to mean that the speaker's judgment has been made on the spot, while 思っている implies that someone has held a certain opinion or belief from some point in the past until the present. Also, 思っている can express the opinion or judgment of another person, as in (3) and (4), while 思う cannot.

c ...とおもわれる

- (1) このままの状態では環境汚染は進む一方だと思われる。／ There is reason to believe that if things are left as they are, environmental pollution will only get worse.
- (2) 私にはこのことが正しいとは思われません。／ This doesn't seem right to me.

Means "a certain judgment is formed spontaneously." Used when stating an opinion objectively rather than arbitrarily, or for softening the impact of an assertion. Often used in academic papers, lectures, and other kinds of written language. と can be replaced by ように to form the expression ように思われる.

② ...とはおもわなかつた

- (1) まさか今日あの人人が来るとは思わなかつた。／ I never thought that person would come today!
- (2) こんな街中にこんな静かな公園があるとは思わなかつた。／ I didn't expect there to be such a quiet park like this right in the middle of downtown.

B: いや、ぼくも隣に越してくるのが君だとは思わなかつたよ。／ Well, I never thought you were the person moving in next door either!

Means that the speaker views a situation or event as completely unexpected. Usually implies a feeling of surprise.

③ R-たいとおもう

- (1) アメリカに留学したいと思います。／ I want to go to the U.S. to study.
- (2) 結婚式には是非参加したいと思っております。／ I'd very much like to attend your wedding ceremony.
- (3) 一流会社に就職したいと思っている。／ I'd like to work for a top-ranked company.
- (4) では、ご一緒に乾杯をしたいと存じます。／ I would now like to ask you all to join me in a toast.

思う is combined with ...たい, which expresses a wish or desire on the part of the speaker, to soften the directness of the ...たい expression and make the statement more polite. 存じます can be used instead of 思う/思います, as in (4), to create an even politer expression. Sentence-final use of ...たい(です) gives an impression of childishness and is not appropriate in formal conversation among adults, in which case たい is usually followed by 思う or のだ.

④ ...おもう

[Na におもう]

[A-くおもう]

- (1) 先生に指導していただけることになって、本当に幸せに思います。／ I am very happy to have the opportunity to be instructed by you.

When 思う follows the conjunctive form of *i*-adjectives and *na*-adjectives that express feelings or emotions, it expresses how the speaker feels. The pattern XをYに(Yく)おもう is also used, as in (2) and (3). To ask about the listener's impression, どう思う/思いますか are used, as in the example below.

- (例) あの人についてどう思いますか。／ What do you think of that person?

5 V-ようとおもう

- (1) 今日はゆっくり休もうと思う。／ I'm going to take it easy and rest today.
- (2) この仕事をやめようと思っている。／ I'm thinking of quitting this job.
- (3) A: 夏休みはどうするつもりですか。／ What are you planning to do this summer vacation?
B: ヨーロッパを旅行しようと思っています。／ I'm going to tour Europe.
- (4) 将来、どんな仕事をしようと思っているんですか。／ So what sort of work are you going to do in the future?

When combined with the intentional form of a verb, と思う expresses the speaker's plans or intentions. In interrogative sentences, the function of this combination is to ask about the listener's

intentions. When と思う is used with the dictionary form, as in the following example, it indicates that the speaker's plans are uncertain; this form cannot be used to express intention.

- (例) 私は来年アメリカに行くと思う。／ I think I'll go to the U.S. next year.

given duty of the prime minister. What do you, as prime minister, think about this?

Expresses a mild assertion of opinion. Often used when the speaker thinks there is a possibility that the listener has a different opinion, or when the speaker offers an opinion with which it is difficult for the listener to agree. When an even more euphemistic expression is desired, ように思われる is used.

⑦ N(のこと)をおもう

the right thing.

Means that the speaker is reconsidering a past situation or event. Used when one's knowledge or opinion has changed and one can now look at things differently. For example, in (1), the phrase あの人来るかどうか (whether or not he's going to come), which is derived from the question あの人来るですか (Is he going to come?), replaces それ (that) in the sentence あなたはそれを知っていますか (Do you know that?). かどうか is followed by predicates such as 知らない (not know), 分からない (not know), あやしい (is doubtful), 自信がない (not be sure), and 決める (decide).

protect the global environment.

Used to change an interrogative sentence containing a question word (who, what, how, etc.) into the equivalent of a noun phrase; this phrase is then embedded into another sentence. For example, in (1), the phrase 彼がいつ亡くなったか (when he died), derived from the sentence 彼はいつ亡くなりましたか (When did he die?), replaces それ (that) in the sentence あなたはそれを知っていますか (Do you know that?). The predicate preceding か takes the plain form.

8 ...からか／...せいか／...のか

The part of the sentence including か tends to take a form that expresses a reason, such as からか, せいか, ためか, のか. For example, (2) means "It feels cool today. This might be because of the wind."

- (6) 外交官になるには語学力が必要だ。／You need to be good at languages to be a diplomat.
- (7) 彼は10ヶ国語ができるらしい。／I heard that he can speak ten different languages.

Attaches to a noun and indicates that the noun is the subject of an action or state, as in (1), (2), (3), and (4), or that the noun is the object of a state, as in (5), (6), and (7). When used in proverbs or idioms, it sometimes attaches to words other than nouns, as in 負けるが勝ち (Sometimes you have to lose to win).

② NがNだから

- (1) 親が親だから、子供があんなふうに生意気になるのだ。／With such parents, it's no wonder the child is so bratty.
- (2) もう時間が時間だし、今から行つてもあのレストランは閉まってるかもしれないよ。／Considering what time it is now, the restaurant might be closed by the time we get there.

買うのはあきらめた。／I was wandering around the department store and found a pretty necklace. I really liked it, but with the price being what it was, I decided not to buy it.

(4) A: 再就職しようと思ったけど、なかなかむずかしいわ。／I thought I'd try to go back to work, but it's really quite difficult to find a job.

B: そりや、年が年だもの。70すぎた人間なんか今どきどこも雇ってくれないわよ。／Well, it's your age. These days no one wants to hire someone in his seventies.

The same noun is repeated and then followed by a word expressing a reason, such as だから, ので, し, だもの, or もので. In many cases, this pattern expresses a negative evaluation of the noun and is used to describe an inevitable result that arises from it. For example, (1) means the parents are too indulgent of their children, (2) means it is too late to go to the restaurant, (3) means the price is far too expensive, and (4) means that, in B's opinion, A is too old to get another job.

③ NがNだけに

- (1) こここの料理は、素材が素材だけに味も格別だ。／The food here is exceptionally tasty because of the ingredients.
- (2) この店は味は大したことはないが、場所が場所だけにたいでいつも満員だ。／The food at this restaurant isn't particularly good, but its location means it's almost always full.
- (3) この店はとても気に入っているのだが、場所が場所だけにそうしそうちゅうは来られないのが残念だ。／I really like this shop, but because it's located where it is, unfortunately I can't come very often.
- (4) その映画は戦時中の日本軍の侵略をあつかっており、ほんぐんじょうろんかぜつざん扱つたもので、多くの評論家が絶賛して

すぐ さくひん ないよう ないよう

成績は格段に悪かった。／ The movie
deals with the aggression of the Japanese
army during the war. It is an excellent
work that many critics have praised highly,
but because of the subject matter, box
office returns were markedly worse than
those of ordinary movies made for enter-
tainment.

(5) 学長が収賄容疑で逮捕された。今まで

には騒がれないよう注意してきた。しか
し、今回はことがことだけに、マスコミの
取材からは逃れられないだろう。／ The
president of the university was arrested on
suspicion of bribery. There have been mi-
nor scandals before, but care was always
taken to keep the media from making
anything of them. However, this time,
with the situation being what it is, there
will be no stopping the mass media from
covering the story.

Repetition of the same noun indicates that a certain outcome is natural or inevitable, considering the characteristics of that noun. NがNだけに is followed by a description of the natural or inevitable outcome. The listener/reader does not know the exact nature of the noun's characteristics until s/he reaches the description in the latter part of the sentence. For example, in (1), the description 味も格別だ (exceptionally tasty) tells us the ingredients are good. However, in the sentence 素材が素材だけに大した料理はできやしない (Because the ingredients are what they are, the food can't be very good), the interpretation is that the ingredients are bad. (2) means a place that is conveniently located and easy to get to. On the other hand, (3) means a place that is inconveniently located and hard to get to. ことがことだけに in (5) is an idiomatic expression. In this example, it means "because this situation is serious."

④ NがNなら... (が)

- (1) 時代が時代なら、この本も売れたかも
しないが、今の時代では人間の生き
かたとほんわかひとよを問うような本は若い人には読まれな
い。／ If times were different, this book
might have sold well, but in this day and
age, young people don't read books that
raise questions about how to live.
- (2) 世が世ならあいつも出世できただろう
に。／ In another time and place, she
probably would have been successful.
- (3) 俺も大学が大学ならもう少しましな仕事
にもつけたのだろうが、この大学ではせい
ぜいこの会社ぐらいがいいところだ。／
I suppose if I had graduated from a better
university, I could have found a better job,
but this is the best company anyone from
a university like mine could hope to work
for.

Repetition of the same noun indicates that the speaker is making the supposition "if the conditions were suitable...." NがNなら is accompanied by expressions such asだろうが, だろうに or かもしれないが, and a statement or description of the actual state of affairs then follows. (1) means "if it were a time when many people thought seriously about how to live," (2) means "if people in society evaluated him correctly," and (3) means "if I had graduated from a better university." This pattern is used to hypothesize a situation that is better than reality; it means "if the situation were X, a good result like Y would follow." Because the situation hypothesized is one that is actually impossible, a sense of pity, regret, or resignation is implied.

⑤ NがNならNもNだ

- (1) この生徒はいつも教師に口答えばかりし
て困る。親もすぐ学校にどなりこんでくる
し、まったく、親が親なら子も子だ。／
This student always causes trouble to his
teachers by answering back. His parents

often come storming into the school with complaints, too. With such parents, it's no wonder the children behave the way they do.

- (2) まったく、おじさんがおじさんなら、おばさんもおばさんだよ。おじさんが頑固なのはわかっているんだから、嘘でも「ごめんなさい」と言えば喧嘩なんかすぐにおさまるのに。／(to an aunt and uncle) Honestly, you two are both just as bad as each other. (to the aunt) You know he's obstinate, so if you say "I'm sorry," even if you don't mean it, the quarrel will quickly be resolved.

The first noun (repeated in NがNなら) is different from the second noun (repeated in NもNだ), but the two nouns are related. The expression as a whole conveys a negative evaluation: both N's are equally bad. (1) means that the parents and child are equally problematic, and (2) means that both the uncle and aunt are bad, because they are equally stubborn. Used to criticize both parties or elements.

Used when a result is the opposite of one's intention or expectation. Example (1) means "contrary to expectation, something said out of kindness to another person made him angry," and (4) means "one would expect that bringing a box of cookies would make someone happy, but instead it would make her feel beholden." Example (5) means "I thought I hurt the other person because I said such an awful thing, but it was actually a good chance for him to reflect on his conduct." - (5) 今度の旅行はどこへ行こうかな。／ Where should I go on my next trip?
- (6) 最近なんでこんなに疲れやすいのかなあ。／ I wonder why I get tired so easily these days.

かな is formed by attaching な to か, which is a marker indicating a question. かな is used at the end of a sentence and conveys the feeling of asking oneself a question. Although it expresses self-directed wondering or pondering, when uttered to another person it can be interpreted as an

indirect request for assistance, permission, etc. Not combined with polite forms. A casual expression used in spoken language. The final sound な may be lengthened so it is pronounced as ...かなあ.

【がな】

- (1) 山田さんはまだ来ないの？ 遅れずに来るように言っておいたんだがな。／ Yamada-san hasn't come yet? I told her not to be late!
- (2) 今度の試験も駄目だった。一生懸命勉強したつもりなんだがなあ。／ I did badly on this test, too...and I was sure I had studied so hard for it.
- (3) あした運動会だろう？ 雨が降らないといいがなあ。／ Tomorrow is the sports day, right? I sure hope it doesn't rain.
- (4) 彼らもう少し本気で仕事に取り組んでくれるようになるといいんだがなあ。／ I wish they would get a little more serious about their work.
- (5) 田口君、今、暇？ ちょっと手伝ってくれるとありがたいんだがな。／ Taguchi-kun, are you free right now? It'd be great if you could give me a hand for a second.

Consists of the contradictory conjunction が combined with the particle な. Used at the end of a sentence and indicates either bewilderment at the gap between one's intention and the actual outcome, or a wish for something that has yet to occur. As in example (5), it can be used to make a request. It cannot be attached to a sentence in polite form. It is a spoken language expression used by men when they are talking to themselves or to someone close. The final sound な is sometimes lengthened so it is pronounced as ...がなあ. A similar expression, ...けどな, is used by women.

(8) ちょっと待って。今山田君が言ったそのアイデア、ちょっとおもしろいかもしれないよ。／ Wait a second, the idea that Yamada-kun just mentioned could be interesting.

Expresses a supposition on the part of the speaker at the time of utterance. Means there is a possibility of something being the case. Compared to にちがいない and だろう, the degree of probability indicated by かもしれない is low, and there is a possibility it won't happen. Sometimes used in the form のかもしれない, which consists of かもしれない combined with のだ.

As in (8), かもしれない may be used when the speaker wants to avoid an absolute declaration and soften his/her manner of expression. It may also be used by the speaker to preface an assertion, in expressions like 御存知かもしれません which consists of かもしれない combined with のだ.

In spoken language, かもしれない is used. In written language—including narrative passages in novels, in which different perspectives may be adopted freely—かもしれないなかった can be used, as seen in the following example.

Used by the speaker to state a differing opinion, after having first acknowledged the possibility that something the other person has said, or a general opinion, may be true.

③ …ば／…たら …かもしれない

a …ば／…たら V-るかもしれない

(1) ここで代打がホームランでも打てば、形勢は逆転するかもしれない。／ If the pinch hitter hits a home run here, the momentum of the game could be reversed.
 (2) もう少しがんばれば、志望校に合格できるかもしれない。／ If I try a little harder, I may be able to pass the exam for the college I want to get into.

These examples can be paraphrased as さあ、春だ。がんばるぞ (Now, it is spring. I will work hard!) and さあ、ごはんができたぞ。食べよう/食べなさい (Now, dinner is ready. Let's eat!/Start eating!). 【させる】

Expresses causation. When the verb in V-せる is a Group 1 verb, the vowel in the final syllable of the dictionary form changes from -u to -a and then せる is attached, as in 行く→行かせる and 飲む→飲ませる. For Group 2 verbs such as 食べる, せる is attached to the stem 食べ and the conjugation pattern is 食べる→食べせる. The causative form of する is させる, and 来る becomes こさせる. In spoken language, the forms 行かす, 飲ます, 食べさす, and so on may also be used.

A causative sentence essentially conveys the meaning that one person orders or directs another

person to do something. However, in actual usage the causative form expresses a broader range of meaning, including coercion, instruction, non-interference, permission, and so on.

The subject Nが in Nが (intransitive) V becomes Nを in the causative sentence. Example (5) expresses a sense of self-reproach on the part of the speaker, because even though the incident in question was not intentional and s/he was not the direct cause, the child was under his/her care when the incident took place.

A causative sentence with the form XがYにV-させる is rephrased from Y's point of view to create the form YがXにV-させられる, which is a passive sentence. It means that Y is forced by X to do something against his/her will, and that Y thinks this action is bothersome or objectionable. With Group I verbs such as 行く and 読む, the causative passive form tends to become 行かされる and 読まされる (instead of 行かせられる and 読ませられる).

- (3) やっぱり、不合格だったか。だから、もっと簡単な大学を受けろと言ったのだ。／ So, just as I expected, you didn't pass. That's why I told you to try for an easier university.

Used to express a current state of affairs after dis-

covering a certain fact; conveys the feeling that the speaker accepts the state of affairs as a natural result having arisen from that fact. In conversation, this pattern is used when the cause or reason for something has become clear from something the other person has said, and it is accompanied by sentence-final particles such as ね, indicating confirmation, or か, indicating understanding. The first syllable in だから is stressed and held slightly longer.

③ だから⟨question⟩

- (1) A: みんなお前のためにこんなに遅くまで働いているんだ。／ Everyone is working this late because of you.
B: だから、どうだって言うの。／ So, what are you saying?
- (2) A: できることは全部やったつもりです。／ I've tried to do all that I can.
B: だから、何なんですか。／ So what?
- (3) A: たった一度会っただけだよ。／ I've only met her once.
B: だから?／ So?

Used in conversation, with だから followed by a question. Does not express cause and effect, but is used in response to a statement made by the listener, in order to demand clarification of the intention behind that statement. Means "so what is it that you're trying to say?" Can be replaced by それで or で. In some cases, as in (3), it is pronounced with a rising tone and the question part is omitted. Because this usage of だから has an impolite nuance, even if the sentence ends in a polite form, it is usually not possible to say ですから.

④ だから⟨assertion⟩

- (1) A: ちょっと、どういうことですか。／ Hey, what's going on?
B: 別に特別のことはないよ。／ Nothing in particular.
A: だから、どういうことって聞いているんだよ。／ So I'm asking you, what's going on?!

- (2) A: なぜで電話してくれなかつたの。／
Why didn't you call me?
B: だから、時間がなかつたんだ。／I told
you, I didn't have time to.

Used in conversation. Does not express cause and effect, but is used when the speaker is trying to make the listener understand his/her intention, in situations when his/her opinion differs from the listener's. Means "what I want to say is this." (2) is an example of using だから to make an excuse. Because it expresses a strong assertion, it sounds forceful and often has an impolite nuance.

【だからこそ】

- (1) A: どうして彼女はその不審な電話のこととを社長に話さなかつたんでしょうか。／I wonder why she didn't tell the company president about that suspicious phone call.
B: 彼女は社長に信頼されていたんです。だからこそまず自分で調べようとしたんだと思います。／The president trusted her. That's precisely why she wanted to check into it by herself first, I think.

B: だからこそ、今すぐ老人医療の見直しをやらなければならないんだよ。／That's exactly why we have to review the system of medical care for elderly people right now.

Combines a clause expressing a reason with the focalizer こそ. Used at the beginning of a sentence, it refers to the preceding sentence and conveys the meaning "for that reason," with emphasis on the reason. だから on its own would be sufficient for stating an ordinary reason. だからこそ is used to strongly assert the justification for a reason. Often used in debate or argument, when one person takes the other person's statement and uses it as a reason to assert what s/he herself/himself wants to say. のだ tends to be used at the end of the sentence.

【だからといって】

(4) 確かに、あの会社は待遇がいい。しかし、だからといって今の仕事をやめるには反対だ。／ It's true that the salary and benefits at that company are good. But even so, I'm still against you quitting your current job.

- (7) 教授はこの実験を大学院の学生にさせたがっているが、今のような研究態勢では無理なのではないだろうか。／ The professor wants to have graduate students do this experiment, but that may not be possible, given current trends in research.

Used to express the wishes or desires of a third person. Takes the form V-たがっている when a current situation is being expressed.

When たがる is not used, indirect expressions such as たいと言っている, たいらしい, and たいそうだ are used instead. たがる is not used when the speaker says something from the perspective of a third person, as in the example below.

- (例) A: 山本さん、どうしてパーティーに来なかったんでしょう。／ I wonder why Yamamoto-san didn't come to the party.
B: 佐野に会いたくないからだよ。／ Because she doesn't want to see Sano.

- (例) 彼は僕が社長になりたがっていると思っているらしいが、僕はそんなつもりはまったくない。／ He seems to think I want to become company president, but I have no such intention at all.

Once I've come this far, I can make my way home alone.

- (7) そんなにたくさん食べたらおなかをこわしますよ。／ You'll upset your stomach if you eat so much.

Usage for when Y expresses a statement about matters which have not yet come about. The dictionary form of the predicate, or such a predicate combined with the supposition だろう, are used at the end of sentences.

In (1)-(4), both X and Y are matters which have not yet come about, and when X comes about, then Y will follow. もし or 万一 are sometimes used when making suppositions about uncertain matters which have not yet come about or matters which are unlikely to come about. (4) is a usage which simply describes future matters that will come about in sequence, and has less of a suppositional meaning.

In (5)-(7), X has already come about, and based on this a supposition Y is made. X often includes こ/そ/あ words (e.g. ここ, そんな) to indicate a current status.

たら tends to be used for isolated matters, and is unlikely to be used for general conditions expressing a universal truth or law. However, in spoken language, it is sometimes used for expressing repetition of one's habit or a certain matter, as the following examples show:

- (8) いつも、5時になつたらすぐ仕事をやめて、テニスをします。／ I always stop working right away and play tennis when it is five o'clock.
- (9) ここは冬になつたら雪が1メートルぐらいつもる。／ We get about three meters of snow here when it's winter.
- (10) ふだんは昼ご飯を食べたら昼寝をしますが、今日は買物に行かなければなりません。／ I usually take a nap after lunch, but I have to go shopping today.
- (11) 古くなつたらすぐに新しいのに買いいかえるというような生活では、お金は貯まらない。／ You can't save money if you have

the kind of lifestyle where you always buy new things when something gets old.

(8)-(11) express the meaning "after X is accomplished, Y will be done." X expresses a time frame in which Y will come about or that the action will be repeated within that time frame. In this case, たら can be replaced by と.

b ひょうじつ + 表出・働きかけ

- (1) この仕事が完成したら、長い休みをとるつもりだ。／ Once this job is completed, I intend to take a long vacation.
- (2) もしも1千万円の宝くじに当たったら、何でも買ってあげますよ。／ I'll buy you anything you want if I win 10 million yen in the lottery.
- (3) 教師になったら子どもたちにものを作る楽しさを教えたい。／ If I become a teacher, I want to teach children the joy of making things.

- (9) もしも遅れたら、連絡してください。／ Please let me know if you'll be late.

- (10) かいぎが終わったら食事をしに行きましょう。／ Let's go and have dinner after the meeting is finished.

Expresses meanings such as "When X comes about, let's do/I want to do Y" and "When X comes about, do Y/don't do Y/I can do Y/please do Y." Y contains "expressive" expressions which indicate the speaker's will/hope or "indicative" expressions, such as commands, prohibitions, permissions, requests, or invitations.

Usually used to express a specific actual outcome about Y, which will come about when X has occurred. X expresses matters that precede Y, and can be replaced by expressions such as "when this happens," "when you do...," or "after this." As shown below, when たら is preceded by a situational predicate such as ある, an *i*-adjective, or a noun, it means "if that's the situation"; moreover, if such a situation obtains, the expression shows the will or hope of the speaker or a demand or recommendation to the listener.

When the sentence concerns the listener's schedule or wish, it is closer to Usage 6 of たら (<introductory utterance>).

- (11) 暫 ^{ひま}があつたら海外旅行をしたい。／ I'd like to travel abroad if I have time.

- (12) 暑 ^{あつ}かつたら、窓 ^{まど}を開けてください。／ Please open the window if you're hot.

- (15) 熱 ^{ねつ}があつたら休んでもいいよ。／ You may take time off if you have a fever.

When compared to たら, と and ば have more restriction on their usage. と cannot be used with "expressive" or "indicative" expressions and when X is a verb indicating action or change, it is odd to use ば for "expressive" or "indicative" meaning.

- (×) 結婚すれば仕事をやめたい。／ I want to quit my job if I marry.

- (○) 結婚したら仕事をやめたい。／ I want to quit my job when I get married.

- (×) お風呂に入ればすぐ寝なさい。／ Go to sleep as soon as if you have a bath.

- (7) どのぐらい勉強 ^{べんきょう}したら日本語 ^{にほんご}の新聞 ^{しんぶん}が 読めるようになりますか。／ How long do you have to study to be able to read a Japanese newspaper?

Used in interrogative sentences which require an answer from the listener, in the form X たら Y か.

- (1) and (2) are interrogatives, seeking "yes" or "no" answers; (3)-(7) are cases of interrogatives

with question words such as "what" and "how"; (3)-(5) are cases where the Y in "is it Y, if X?" is unknown; and (6)-(7) are cases where X is unknown.

In interrogative sentences where the method or means X for getting a good result is asked about, as in (6) and (7), たら can be replaced by ば, but in interrogatives where it is asked what action Y will take when X comes about, as in (2)-(5), たら is mostly used, and the use of ば is unnatural.

- (×) 結婚すれば仕事をやめるつもりですか。／ Do you intend to quit your job if you marry?
- (○) 結婚したら仕事をやめるつもりですか。／ Do you intend to quit your job when you get married?
- (×) 大学を卒業すればどうしますか。／ What are you going to do if you graduate from university?
- (○) 大学を卒業したらどうしますか。／ What are you going to do after graduating from university?

d 疑問詞+V-たら...のか

- (1) なんどい わ 何度言つたら分かるんだ?／ How many times do I have to tell you so you understand?

- (6) いittai いま おもつた 一体どうしたら今の思いを伝えることが

できるのか?／ Just how can I best convey my thoughts now?

This is an ironic expression where the たら form of the verb is attached to question words such as 何/どれだけ/どんなに. Means "no matter how ..., things won't happen the way one wants them to," and expresses irritation or despair regarding the situation. These sentences end with のか or のだ/のだろう(か). V-たら can be replaced by V-ば.

e ...たらどんなに...か

- (1) 宝くじに当たったらどんなにうれしいだろう。／ How happy I would be if I won the lottery!
- (2) 合格したら両親はどんなに喜んでくれるだろうか。／ How happy my parents would be if I passed the examination!
- (3) 子供たちがもどってきたらどんなにぎやかになることか。／ How lively it will be when the children return!

Means "how good it will be if X comes about." Used when expressing a strong wish that X will be realized or expressing the feeling that if it comes about, then one would be really happy. だろう(か) or ことか are used at the end of the sentence.

② ...たら<counter-factual>

a ...たら...だろう/...はずだ

- (1) せいいみつけん さる ておくあのとき精密検査を受けていたら、手遅れにならなかっただろう。／ Had there been a detailed check-up at that time, it wouldn't have been too late.

- (5) あの時の「薬の害」という本を読んでいたら今ごろ苦しまなくともよかったのに残念だ。／ What a pity. Had I read the book *The Harm of Medicine* in those days, I might not have had to suffer as I do now.
- (6) A: 面接試験、うまくいった?／ Did the interview test go all right?
B: うまくいっていたら、こんな顔していよいよ。／ I wouldn't look like this if it had gone well.
- (7) 点数があと 10 点高かったらこの大学に合格できるんだけど。／ I would be able to pass the entrance exam to this university if only my score were ten points higher.

Used to make a supposition different from what has actually happened or the opposite of what has actually happened, and expresses what something would have been like if such were the case. In most cases, the verb is put into the stative form V-ていたら.

When making a supposition which is contrary to the facts in the past, the *ta*-form of predicates, such as だろう/はずなのに, is used at the end of the sentence. On the other hand, when making a supposition which is contrary to the current situation, the dictionary form, such as ...するのに/のだが, is used, as in (6) and (7).

In this usage, たら can be replaced by ば, but たら is more colloquial. Refer to ば (Usage 4) for a more detailed explanation of conditional sentence patterns expressing counter-factual matters.

b …たらどんなに…か

- (1) 背があと 10 センチ高かったらどんなによかっただろうか。／ How nice it would be if only I were ten centimeters taller.
(2) 10 年前に彼女に会っていたらどんなによ

- かつただろう。／ How nice it would have been had I met her ten years ago.
- (3) 祖母が生きていたら、どんなに喜んだことか。／ If my grandmother were alive, how pleased she would have been.
- (4) 今すぐあなたに会えたらどんなにうれしいだろうか。／ How happy I would be if I could meet you right now!

Used when X is impossible or contrary to reality, and means "how good it would have been if X were the case." Expresses the feeling that one has the strong wish that X will come about, but regrets that such a thing cannot ever happen.

When making a supposition contrary to what has already come about, だろうか is used, as in (1)-(3), and when something has not come about yet, and it seems impossible that it will ever happen, だろうか is used, as in (4).

③ …たら…た<already-realized condition>

- (1) 空港に着いたら友達が迎えに来ていた。／ When I arrived at the airport, my friend was waiting to meet me.
- (2) トンネルを出たら一面の銀世界だった。／ Coming out of the tunnel brought us into a winter wonderland.
- (3) 変な音がするので隣の部屋に行ってみたらねずみがいた。／ I went to the room next door because I heard a strange sound, and there was a mouse.
- (4) 山田さんは無口でおとなしい人だと思っていたが、よく話をしたらとても面白い人だということが分かった。／ I thought Yamada-san was a quiet, timid person, but when I spoke to him, I realized that he was a very amusing person.

- (10) 落ちてもともとと思って試験を受けたら、思いがけず合格した。／ I took the examination thinking I would fail, but I unexpectedly passed it.
- (11) 部屋の様子が変だと思ったら、案の定、空き巣に入られていた。／ I thought something about the room seemed strange and, just as I feared, someone had broken in.

The XたらYた pattern is used to indicate that both the former and the latter have already come about. It is used when the speaker realizes Y at the point when X has already come about, or when a new situation happens as a result of it. Following Y are expressions stating that something has occurred beyond the speaker's control, or some fact has been newly discovered or realized.

(1)-(4) are usages in which the speaker discovers situation Y at the scene where action X has already been done. The discoverer, 私, is not mentioned in Y as in ...たら、私は...した, but instead the speaker uses expressions to portray the situation, such as ...たら...ということが分かった, ...たら...がいた or ...たら...があった.

- (×) 隣の部屋に行ったら、私はねずみを見た。／ If I go to the room next door, I saw a mouse.
- (○) 隣の部屋に行ったら、ねずみがいた。／ When I went to the room next door, there

was a mouse.

Expressions of state, such as V-ていた or Nだった, are used for Y where newly-realized discoveries are expressed, as in (1) and (2).

On the other hand, if V-た is used instead of V-ていた, the meaning changes as follows.

- (例) 空港に着いたら友達が迎えに来た。／ After I arrived at the airport, my friend came to meet me.

In the example above, the active expression 来た is used instead of 来ていた. This is used to indicate that after the speaker arrived at the airport, the friend arrived to meet him, rather than that the speaker found the friend upon arrival, as in (1) above.

As in (10) and (11), when what follows the supposition in the second clause is the expected outcome, 案の定 or やっぱり are used; when the result is unexpected, then 案外、意外なことに or 思いがけず are frequently used.

たら in this usage is often replaced by と. However, if X and Y both indicate the same person's consecutive action of which that person has control, only と can be used, and not たら.

- (×) 男は部屋に入ったら友達に電話した。／ If the man entered the room, he phoned his friend.
- (○) 男は部屋に入ると友達に電話した。／ The man called his friend when he entered the room.

While と is used in novels or stories, たら is used to describe things which the speaker has directly experienced.

4 ...たらさいご

- (1) 彼は寝たら最後、まわりでどんなに騒いでも絶対に目をさまさない。／ Once he falls asleep, he won't wake up no matter how noisy it is around him.
- (2) 賭事は一度手を出したら最後ずるずると抜けられなくなる人が多い。／ With gambling, many people cannot break free from it once they have given it a try.
- (3) すっぽんは一度かみついたら最後どんな

ことがあっても離れない。／Once a snapping turtle bites something, it won't let go no matter what happens.

Means that once something has happened, because of its characteristics or a strong determination, the situation will not change subsequently. Often used in the form 一度...たらさいご絶対に....

have more socializing and whatnot to do so I still can't save any money after all.

Repeats the same adjectives or verbs twice, before and after. Describes a contrasting circumstance that, despite what happens, will ultimately not differ from the present one.

Some sentences express the meaning "there are problems but they are not too bad/they can be managed somehow," as in (1) and (2), while other sentences see the situation as undesirable, indicating that "either way it is troublesome/a problem," as in (3)-(5).

i-adjectives are normally used in the form A-かつたら A-かつたで, but sometimes the なかつたらないで form is also used, as in (1).

...ば...で is a synonymous expression.

⑥ ...たら〈introductory utterance〉

Used to indicate under what condition the action in the second part of the sentence may be carried out, by restricting the scope or giving a warning or explanation in advance. It is, to a certain extent, a fixed idiomatic expression. It can be replaced by ば.

a ...たら + 依頼・勧め〈introductory utterance〉

- (1) もし差し支えなかつたら事情を聞かせてください。／Please tell me the circumstances, if you don't mind.
- (2) よろしかつたら、もう一度お電話くださいませんか。／Would you call me again, if you don't mind?
- (3) よかつたら、週末、家にいらっしゃいませんか。／Would you like to visit our home this weekend?

Idiomatic expression used for politely asking the convenience of the other person when making a request or recommendation.

b ...たら〈introductory utterance〉

- (1) 私から見たら、こんなことはたいした問題ではない。／From where I stand, it doesn't seem like a serious problem.

- (3) 一時代前と比べたら、家事は格段に楽になったと言える。／ It can be said that housework has become far easier in comparison with a generation ago.

This is one way of warning in advance from what viewpoint the utterance or judgment in the latter part of the sentence is made. It follows verbs that express a statement, an idea, or a comparison, such as 見る (see), 思う (think) and 比べる (compare), in the first part of the sentence. It is to a certain degree an idiomatic expression.

からしたら or から言ったら are synonymous expressions.

⑦ V-たら (suggestion, recommendation)

- (1) 立って見てないで、ちょっと手伝ってあげたら。／ Why don't you lend a hand instead of just standing and watching?
- (2) 危ないからやめといたら。／ It's dangerous, so don't do it.
- (3) そんなに疲れているなら、すこし休んだら?／ How about resting a little, if you're so tired?

This is an expression to recommend that the listener take a certain action. The latter half of V-たらどうか is omitted. It is usually used when speaking to someone with whom the speaker is on familiar terms. When it is necessary to speak politely, たらどうですか or いかがですか are used without abbreviating the latter half.

Can be replaced by V-ば; however, たら has the nuance that the speaker is seriously recommending something, while the use of ば can contain the nuance that the speaker in fact is merely stating an option without any particular preference.

(3) and (4) are examples of when the listener simply won't follow the speaker's warning or recommendation; they imply the speaker's irritation. The latter half of (6) is abbreviated and pronounced with a rising tone.

- (4) 一日で仕上げるのはちょっと無理だ。／It's impossible to finish it in one day.

- (5) A: 10時ではいかがでしょうか。／What about ten o'clock?

B: 10時はちょっと都合が悪いんですけど。／I'm afraid ten o'clock is not convenient for me.

Used to soften the tone by attaching it to negative expressions such as 大変 (serious/problematic), 無理 (impossible), むずかしい (difficult).

c ちょっと<unfinished sentence>

- (1) A: この写真ここに飾ったらどう?／How about putting this picture here?

B: そこはちょっとね...。／There? Well...

- (2) A: ご都合が悪いですか。／Is that not a good time for you?

- (3) A: このコピー機空いていますか?／Is this photocopy machine free?

B: あ、すみません。まだ、ちょっと...。／Oh, sorry, not just yet I'm afraid.

Used in conversation. Only ちょっと is uttered and the rest of the sentence is omitted. Hints at negative content used for avoiding something which is difficult to say. (1), for example, indicates that the speaker doesn't like the place very much. Also used to soften the tone in expressions of refusal. When the latter sentence is omitted, as in (2) and (3), it is used on its own instead of expressions of refusal, and is so understood by the listener. When using it for positive meaning such as acceptance, the latter part of the sentence is not normally omitted.

③ ちょっと(positive evaluation)

- (1) この本、ちょっとおもしろいよ。／ This book is quite interesting.
- (2) この先にちょっといいレストランをみつけた。／ I found a pretty nice restaurant just up ahead.

B: そうですね。／ Yeah, it will.
- (4) A: 新しい職場はどう?／ How is your new workplace?
B: 課長さんがちょっとすてきな人なの。／ The section chief is kind of attractive.

When attached to a good evaluation or an expression which indicates attribution, ちょっと indicates that the speaker judges something to be "better than usual," rather than "a little." A euphemistic expression. Close to かなり in meaning. すこし does not have this type of usage.

④ ちょっと...ない

- (4) あの人のあんな演説は、ちょっとほかの人にはまねができないだろう。／ I don't think many others can match those presentation skills of his.

Used with a negative expression for emphasis, but is in fact often used when evaluating something of higher or greater value than usual. (1) is an expression for praising a good film.

B: そうですか。じゃあ、あとでよろしく。／ I see. OK, I'll leave it with you (please call me later).

Used with negative expressions. Softens the negative phrase. Does not mean "little." B's words in (1), for example, are a euphemistic expression for saying that the speaker actually "doesn't know at all," not "there is just some part which he doesn't know."

⑤ ちょっと(appeal)

- (1) ちょっと、そこのおくさん、財布落としま

したよ。／ Excuse me, madam, you've dropped your wallet.

also when reaching a large number which was a milestone or a target, as in (4), or when a situation has gradually changed and reached the final stage which the speaker was expecting, as in (5) and (6).

Places more emphasis on the matter that has occurred than the way in which it was reached. Example (1) below places emphasis on the result that has been completed. やっと in (2), on the other hand, emphasizes the steps towards the result, meaning "it took a long time because of hard construction work."

(例1) 1995年トンネルはついに完成した。／ The tunnel was finally completed in 1995.

(例2) 1995年トンネルはやっと完成した。／ At long last, the tunnel was completed in 1995.

we can explore ways to move forward for
developing.
- (4) その選手はけがした足をかばいつつ、最
後まで完走した。／ Favoring his injured
leg, the athlete ran the race to completion.

Expresses that the same subject does one action
while also doing another. Has roughly the same
meaning as ...ながら, but ...つつ tends to be used
in written language.

② R-つつ〈adversative connective〉

a R-つつ

- (1) 夏休みの間、勉強しなければいけない
と思いつつ、毎日遊んで過ごしてしまっ
た。／ I knew I had to study during the
summer vacation, but I spent it having fun
every day.

- (2) 早くたばこをやめなければいけないと思
いつつ、いまだに禁煙に成功していない。
／ Even while thinking that I really ought
to quit smoking right way, I still haven't
succeeded in giving it up.
- (3) その言い訳はうそと知りつつ、わたしは
彼にお金を貸した。／ I lent him money,
all the while knowing that the pretext was
a lie.
- (4) 青木さんは事業のパートナーを嫌いつ
つ、常に協力を惜しまなかった。／ Ao-
ki-san, even while disliking his project
partner, never held back from cooperating
with him.

Used to link two contrary matters. For example,
(1) means "although I thought." Close to the adver-
sative use of のに or ながら. "All the while know-
ing it was a lie" in (3) is an often-used idiomatic
expression.

b R-つつも

- (1) 彼は、歯痛に悩まされつつも、走り続け
た。／ He continued running even while
being bothered with a toothache.
- (2) 「健康のために働き過ぎはよくないのよ」

しさに紛れて忘れてしまった。／ All the

distracted by being busy and forgot all
about it.

無視したことが、今回の大事故につな
がったと思われる。／ It is believed that

- (7) その時代は静かに終わりつつあった。／ The era was quietly ending.

Used to express that an action or effect is moving in a certain direction. Often corresponds to て^{いる}, but there are also a few differences. つつある in (1)-(3) can be replaced by ている without changing the meaning very much, but when it is used with verbs which express instantaneous change, as in (4)-(7), replacing it will alter the meaning of the sentence. When used with verbs which express such change, using つつある gives the meaning that a change has taken place and is heading in the direction of completion. て^{いる}, on the other hand, expresses that the situation after the change has been completed. Therefore if 死につつある(dying) in (6) is replaced with 死んでいる(dead), the sentence would not make sense.

In addition, つつある cannot be used with verbs which have no meaning of completion, so 彼女は泣きつつある cannot be used.

ャンセルはできないって。／ I called

B: うん、英語の先生だよ。／ Yes, an

English teacher.

- (6) A: 山田さん、お酒、きらいなんだって?
／ So I hear Yamada-san doesn't like drinking?
- B: ああ、そう言ってたよ。／ Yes, he said so.
- (7) A: あの店のケーキ、おいしいんだって?
／ I hear the cake in that shop is really good, right?
- B: いや、それほどでもないよ。／ No, not especially.
- (8) A: 鈴木さんがあす田中さんに会うんだって?／ So Suzuki-san is meeting Tanaka-san tomorrow?
- B: うん、約束してるんだって。／ Yes, they have an appointment, apparently.

This is a combination of のだ/んだ and the quotation って. Expresses that something is information acquired by hearing it from someone else. (5)-(8), with a rising tone at the end of the sentence, are expressions used for asking the listener to confirm what the speaker has heard. Both men and women use it in informal speech. のだって/のだって are almost never used; they usually become んだって and んですって.

んですって is normally used by women. Note that in this case even though です is used, it cannot be used when speaking to a person of higher status. For example, あのは先生なんだそうです should be used instead of ...先生なんですって.

different expression that has the same meaning. For example, in (4), following the listener's statement, the speaker is replacing it using his own words. While close to すなわち, つまり is more like spoken language. Hence in conversation, like example (4), replacing it with すなわち would be unnatural.

Can also be used in the form つまりは. In (4), つまり is used in spoken language conjunctively. Often replaced by 結局 or 要するに.

B: いくらお金をもらっても、この土地を売るつもりはない。帰ってください。／ I don't want to sell this land no matter how much money I receive. Please go away.

Used to deny the speaker's intention to do something. When using this sentence pattern, the speaker denies his intention to do what the listener is likely to predict or expect under a certain circumstance. 【て】

[N / Na で]

[A-くて]

[V-て]

で is attached to nouns and na-adjectives. In the case of i-adjectives, it takes the form くて. ない has two forms: なくて and ないで. In the case of verbs, で is used for those whose dictionary form ends in グ, ヌ, プ and ム, while all others take て.

dren up.

- (10) めずらしい人から手紙をもらってうれしかった。／ I was happy to receive a letter from someone who rarely writes me.

Used for loosely linking two clauses. ...て can be used twice, as in (3) and (4).

By linking sentences which express actions, this describes matters that take place in sequence, as in (1) and (2). Also used to express contrast, a possible reason, a means of action, or circumstances related to such, depending on the context.

In sentences expressing an attribute or state by the use of adjectives, this is sometimes used to list two attributes or to mention a possible reason. When an adjectival clause or description of a characteristic follows an expression of activity, as in (10), it often expresses a possible reason for something.

When several actions or situations alternate, or when one is describing something unrelated to a time sequence, たり is used instead of て.

Contracted form of それで, and is normally used in spoken language. In most cases, で can be replaced by それで, but when broaching a request, as in (5), it can also be replaced by そこで.

B: まだ。できたら呼んであげるから、もう少し待ってて。／Not yet. I'll call you when it's ready, so just wait a little more.

Expresses that the speaker (or someone on the side of the speaker) is doing something for someone else. When the listener is the one receiving the favor, unless the listener and the speaker are socially equal as well as close, as in (5), it will sound rude. In spoken language, the form is often changed to V-たげる, as in 話してあげる→話したげる or 読んであげる→読んだげる.

...にV-てあげる cannot be used when the action relates to someone's body parts or belongings, or when speaking directly to someone.

Uses a transitive verb to express that a situation exists as a result of someone's action. In some cases, depending on the context, it can have the meaning "do something in preparation for the future."

In this pattern, the semantic object of the verb becomes the subject and the person who has taken the action is often not expressed, but the existence of that person is implied. There is an expression 窓があいている, similar to 窓があけてある, but the former doesn't imply an agent. In あけてある, the existence of the agent is felt even though it is not expressed, while this is not felt in あいている. In addition, when the passive is used, as in (11), the existence of the agent is felt more strongly. Refer to 【ておく】 for the difference between てある and ておく.

- (4) 『手紙』珍しいものをたくさんお送りいただき本当にありがとうございました。／ 《in a letter》 Thank you so very much for sending many unusual things.

The humble form of ...てもらう. Expresses the meaning that someone does an action for the speaker or someone on the listener's side. Usually implies that the recipient is aware of receiving a favor or benefit. に is normally used for the person who does the favor, but から may also be used if a transfer of information or things is being expressed.

② V-ていただく<instructions>

- (1) まず、1階で受け付けをすませていただきます。それから3階の方にいらして下さい。／ First of all, please complete the registration on the first floor, and then continue up to the third floor.
- (2) この書類に名前を書いていただきます。そして、ここに印鑑を押していただきます。／ We will first ask you to write your name here. Then please stamp your seal here.

Used when giving polite instructions. Can only be used by the person giving instructions. Instead of V-ていただく, it often takes the form お/ご...いいただく, as follows.

- (例) 3才以下の子様はコンサート会場への入場をご遠慮いただきます。／ We ask that children under three refrain from entering the concert venue.
- (例) クレジットカードはご利用いただけません。／ I'm afraid credit cards cannot be used.

(3) すみません、もう少し席をつめていただきたいんですが。／ Excuse me, could you put the chairs a little closer to each other?

A humble expression corresponding to ...てもらいたい. Used when describing something that one wants the listener to do. If used in the ...ていただきたい form, often expresses a strong demand, although the form itself is polite. The form ...ていただきたいのですが, where the sentence is not finished, is used when making a hesitant request.

④ V-ていただける<request>

(1) A: ご注文の品ですが、取り寄せますので、3日ほど待っていただけますか。／ The goods you ordered need to be sent for, so could you wait for three days or so?

(7) 5分ほど待っていただける?／ Could you wait for five minutes or so?

(8) こちらにいらしていただけない?／ Would you come this way?

Expresses a polite request by using いただける, the potential form of ていただく. いただけませんか is a somewhat more hesitant expression than いただけますか, and it is often used when you don't think the listener would necessarily agree to the request. Examples (7) and (8) are used when a woman makes a friendly request in a refined manner of someone of the same status or below. お/ご...いただける, an even politer form, is also often used.

(例) 修理に少し時間がかかります。すみませんが、もう少々お待ちいただけないでしょうか。／ The repairs are taking a little time. I'm sorry, but could you wait a little longer?

Used with suppositional expressions such as ...ば, ...たら, ...と and describes a situation which will be favorable to the speaker if the listener takes the action. The speaker's reaction is expressed by such phrases as ありがたい (grateful), うれしい (pleased), or 助かる (be saved trouble).

- (5) 彼は、自分の書いた批評が彼女をおこらせていはしまいかと、おそるおそる挨拶した。// He greeted her with great hesitation, thinking that the review he had written might have angered her.

まい is a written expression for indicating negative supposition, and しまいか is equivalent to しないだろう. The sentence as whole is more or less the same as ていないだろうか. For example, (2) expresses that the speaker thinks that his daughter is probably having a hard time abroad.

With verbs that express an action or effect, ている indicates that the action/effect is in progress. (5) and (6) express actions that continue into the present from a point in the past. Note, however, that not all verbs indicate continuation of an action when used with ている. For example, in the sentence 彼はアメリカに行っている, 行く does not mean "He is on his way to the U.S." but rather "He is now in the U.S." See Usage 2.

Expresses a state that is the result of an action or effect. Verbs that express a change of state, such as 始まる(begin), 乾く(dry), あく(open/become empty), and 閉まる(close), have this meaning when used with ている, as do 行く(go), 来る(come), and 帰る(return). Verbs such as 知る(know), 持つ(have), and 住む(live) also express a state when followed by ている. These verbs do not usually express actions in progress. However, they can be used to express repetition, as in Usage 3. Some verbs, like 着る(wear), can be used to express either an action in progress or a resulting state, depending on the context.

【くれ】

① V-てくれ

Used in patterns such as V-ないでくれ, V-ないでもらえないか, and V-ないでください to request someone not to do the action indicated by V. Constructed by changing the V-て part of the V-てくれる form to a negative *te*-form.

Used in informal spoken language. Sometimes the latter half of the sentence is omitted, as in example (3). V-ないでください(ませんか) / いただけませんか / いただけないでどうか are the polite forms of the same expression. V-ないでほしい is also used.

【てくれる】

① V-てくれる(benefit)

- (5) せっかく迎えに来てくれたのに、すれ違いになってしまってごめんなさい。／ You took the trouble to come meet me and then we just missed each other—I'm sorry!

This is an expression which makes the person doing an action the subject, and it is used for expressing that the person does something for the benefit of the speaker or someone associated with the speaker. Used when the person conducts the action voluntarily. V-もらう is often used if the action is conducted at the request of the speaker.

If only the verb is used instead of V-てくれる, the sentence will mean that the action was done for someone other than the speaker or someone associated with the speaker, so care is needed. For example, 鈴木さんが自転車を修理した means that Suzuki-san fixed a bicycle, and 鈴木さんが自転車を修理してくれた means "Suzuki-san fixed a bicycle for me." If the speaker does not use the V-てくれる form, despite the fact that the action was done for his/her benefit, the sentence will sound odd.

- (×) 誰もそのことを私に教えてくれなかつた。／ No one told me about it.
- (○) 誰もそのことを私に教えてくれなかつた。／ No one told me about it.
- (×) おいしいリンゴを送って、ありがとう。／ Sent delicious apples, thank you.
- (○) おいしいリンゴを送ってくれて、ありがとう。／ Thank you very much for sending me delicious apples.

This expression may also be used sarcastically, when a certain action causes the speaker an inconvenience or problem, as seen in the following example.

- (例) 大事な書類をどこかに置き忘れるなんて、まったく困ったことをしてくれたな。／ You've certainly given me a lot of trouble by misplacing an important document somewhere!

② V-てくれる(request)

- (1) この本、そこの棚に入れてくれる?／ Can you put these books on the shelf there?
- (2) ちょっとこの荷物運んでくれないか?／ (a man speaking) Hey, can you carry this luggage for me?
- (3) すみませんけど、ちょっと静かにしてくれませんか。今大事な用事で電話してるんです。／ Sorry, could you be quiet? I'm in the middle of an important phone call.
- (4) もしよかったら、うちの子に英語を教えてくれないか?／ Is there a chance you could teach my child English?

This is an expression to request an action for the

speaker or someone associated with the speaker. The plain form is used towards a subordinate or someone equal and close. ...でくれないか is used by men. ...でくれませんか creates a politer impression than ...でれますか. Used when cautioning someone, as in example (3).

③ V-てやってくれないか

- (1) 息子にもう少し勉強するように言ってやつくれ。／Can you tell my son to study a bit more?
- (2) 山田君に何か食べるものを作ってやつてくれないか。／Can you maybe make something for Yamada-kun to eat?

Used when requesting the listener to conduct an action for a third person (someone other than the speaker and the listener). Used when the speaker, the listener, and the third person in question are close to one another and all are somehow associated with the speaker.

【てこそ】

[V-てこそ]

- (1) 一人でやってこそ身につくのだから、むずかしくてもがんばってやりなさい。／Keep working on it, even if it's hard, because it's only by doing it yourself that you will learn.
- (2) この木は雨の少ない地方に植えてこそ価値がある。／It's only worth planting this tree in areas with little rain.
- (3) 互いに助け合ってこそ本当の家族といえるのではないだろうか。／Isn't it only by helping each other that you can be called a real family?
- (4) この問題は皆で話し合ってこそ意味がある。規則だけ急いで決めてしまうというやり方には反対だ。／This issue has meaning only if everyone discusses it together. I'm opposed to rushing to make decisions only about rules.

- (5) 今あなたがこうして普通に暮らせるのは、あの時のご両親の援助があつてこそです。／The reason you can live normally now is only because of your parents' support at that time.

In this expression, こそ is attached to the verb *te-form* for emphasis. A positive expression follows V-てこそ to express the meaning "only by doing ... does it become meaningful and render a good result." When it expresses the reason for the positive result, as in example (5), こそ can be replaced by ばこそ.

- (例) ご両親の援助があればこそです。／It is completely owing to your parents' support.

【てさしあげる】

[V-てさしあげる]

- (1) 昨日は社長を車で家まで送ってさしあげた。／I took the president home by car yesterday.
- (2) A: あなた、お客様を駅までお見送りしてさしあげたら?／《wife speaking to husband》Why don't you take our guests to the station to see them off?
B: うん、そうだな。／OK, I'll do that.
- (3) 田中さんをご存じないのなら、私の方から連絡してさしあげましょうか。／If you do not know Tanaka-san, shall I contact him for you?

Expresses that the speaker (or someone on the side of the speaker) does an action for other people. Often used when the person receiving the action is superior or equal to, but not close to, the speaker. Used to express, in a humble way, that the speaker does something for someone who is having problems or cannot do the action which the speaker can do. However, it can also give the impression of forcing something upon someone.

Thus, it is strange to use this form when directly addressing a higher-status person. When one does use it, it will sound impolite unless one avoids using the forms V-てさしあげます／ましょう, as

in (3), in order to soften the impression of forcing something upon someone. In polite speech, humble forms such as お送りした and ご連絡しました are usually used.

Expresses an emotion or feeling arising naturally

from a source beyond the control of the speaker. Often used to express an irrepressibly strong emotion. Usually preceded by an expression of emotion, feeling, or desire; use of words denoting an attribute or evaluation leads to awkward constructions.

(×) 歌が下手で仕方がない。／ Her singing can't help but be poor.

(○) 歌がとても下手だ。／ Her singing is really poor.

In addition to directly expressing emotion or feeling, this construction can also be used in cases when a situation lies beyond the control of the speaker and results in problems or annoyance.

(例) 年のせいか物忘れをしてしかたがない。／ It might just be age, but I'm getting awfully forgetful.

In situations such as (2)-(4), when the speaker is trying to confirm the accuracy of the inference, では functions as an expression of asking or confirmation. Expresses criticism or blame by repeating the other party's words. Used in spoken language, but only when the speaker is addressing someone with lower status or someone with whom s/he has a close relationship. As in (2)-(4), it often takes the form ジゃない。

③ ...ではなくて→【ではなくて】

【ではないか】

[N / Na / A / V ではないか]

Attaches to plain forms and expresses surprise on the part of the speaker, or the intention to press the addressee for acknowledgement. With nouns or the dictionary form of na-adjectives, ではないか can be attached directly without using だ. However, for non-dictionary forms, だった／ではない／ではなかつた must be inserted.

This is a fixed expression consisting of the negative interrogative form of だ, and it has the tone of written language or a somewhat formal situation. Usually used by men. In casual conversation, men use the form ジゃないか and women the forms ジゃない or ジゃないの. The form ジゃん, which is even more casual, is used by both sexes. In polite language, the forms ではないですか and では

ありませんか are used. Always appears in the dictionary form and cannot be used in the *ta*-form; this, as well as the fact that it cannot be combined with だろうか are what distinguish it from ではないか2.

① ...ではないか(surprise, discovery)

- (1) やあ、大野君ではないか。／ Well, if it isn't Ono-kun!

- (2) これはすごい、純金ではないか。／ This is really something—pure gold, right?

- (3) なんだ、中身、空っぽではないか。／ What's this? There's nothing inside it, is there?

- (4) この店の料理、結構おいしいではありませんか。／ Wouldn't you say that this restaurant has pretty good food?

- (5) このレポートなかなかよくできているではありませんか。／ This report really is actually rather good, isn't it.

Expresses surprise at an unanticipated discovery. If the discovery is something desirable, then ではないか conveys a favorable impression, as in (4) and (5). If the discovery is contrary to one's expectations, then the meaning is disappointment or discouragement, as in (3).

② ...ではないか(criticism)

- (1) A: 悪いのは君のほうではないか。／ Aren't you the one who's really at fault?

- B: 僕はそうは思いませんが。／ I don't see it that way.

- (2) A: 病人を連れ出したりしたら、ダメじゃないか。／ Don't you think it's a bad idea to take a sick person out on a jaunt?

B: すみません、気がつかなくて。／ I'm sorry, I wasn't thinking.

Used to reproach or criticize an addressee of the same or lower status. The purpose is to make the addressee acknowledge properly that s/he is responsible for an undesirable state of affairs. Used with falling intonation.

③ ...ではないか (confirmation)

- (1) A: 同級生どうきゅうせいに田中さんたなかという女の子おんなこがいたじゃないか。／ Wasn't there a girl in your class named Tanaka-san?

- (3) 地下道ちかどうなどによくいるではありませんか。ああいう男おとこが。／ Aren't they usually in places like underground passageways—that kind of man?

Used to remind the listener of a person or thing s/he already knows, or to bring attention to something that can be seen or heard at the present location. Since this usage is associated with a desire to confirm that the listener has understood, it is often spoken with rising intonation, and it can be

substituted with other expressions of confirmation such as だろう and でしょう.

Because this usage is almost exclusively conversational, the form ではないか is actually not used very often. The forms ジゃないか, ジゃありますか, and ジゃないですか are used instead.

④ V-ようではないか

- (1) このクラスみんなでディベート大会ないかいに申し込もうではないか。／ Why don't all of us in this class apply for the debate contest?

- (2) とにかく、最後まで頑張がんばってみようではないか。／ Anyway, can't we give it our best right up to the end?

- (3) 遠くからはるばる来たのだから、お金かねの心配などしないで十分楽しもうではないか。／ Since we've come all this way, let's not worry about money and things, let's just enjoy ourselves!

- (4) 売けんかられた喧嘩けんかだ。受けて立たとうじゃないか。／ They're asking for a fight. What's to stop us from taking the challenge?

Attached to the intentional form of a verb, this is used to suggest joint action or to express strongly one's personal intention. A slightly formal expression, ordinarily used by males.

【ではないか₂】

[N / Na (なの)ではないか]

[A / V のではないか]

Although this form can be attached directly to nouns or to *na*-adjectives without inserting の, in the case of *i*-adjectives and verbs, の must be inserted, resulting in the form のではないか₂. This point distinguishes ではないか₂ from ではないか₁. In casual speech, men use (ん)じゃないか and women use forms such as (ん)じゃないか and (ん)じゃないの. The polite forms are (の)ではないですか and (の)ではありませんか.

⑤ ... (の)ではないか

- (1) あそこを歩あるいているのは、もしかして山やま

した 下さんではないか。／ Might that be Yamashita-san walking over there?

- (2) こんな大きなアパートは一人暮らしにはちょっとぜいたくではないか。／ Isn't such a big apartment a little too luxurious for someone who lives alone?
- (3) もしかしたら、和子は本当は良雄が好きなのではないか。／ Isn't it possible that Kazuko is really in love with Yoshio?
- (4) この話は結局ハッピーエンドになるのではないか。／ It looks like this story might just wind up with a happy ending.
- (5) ファーストフード産業が伸びれば伸びるほどごみも増えるのではないか。／ As the fast food industry gets bigger and bigger, won't that just create more trash?
- (6) この品質でこの値段は、ちょっと高いのではないか。／ Isn't this price a little steep for something of this quality?
- (7) これからますます環境問題は重要なのではないか。／ Won't environmental problems become even more and more serious from now on?

Attached to expressions in the plain form, this expresses a conjecture on the part of the speaker, with the sense of "I can't say for certain, but isn't it likely that...." The speaker's degree of conviction is lower than in the case of だろう.

② …(の)ではないかとおもう

- (1) こんなうまい話は、うそではないかと思う。／ I have a hard time believing such a good deal to be true.
- (2) どちらかというと妹さんの方がきれいなのではないかと思う。／ If I had to say, I think the younger sister is probably the prettier of the two.

す。／ The deal was too good to be true, so apparently Yamada-san thought it was most likely a scam.

- (4) もしかすると、彼女はこの秘密を知っているのではないかと思う。／ I think that there's a good chance she might know the secret.
- (5) この条件はわれわれにとって不利ではないかと思われる。／ This condition might possibly work to our detriment.

This construction is formed by attaching 思う to ではないか. When the dictionary form 思う is used, it always expresses the speaker's judgment; when 思った is used, as in (3), the judgment of a third-person subject can be expressed. The form 思われる, which is used in (5), has the tone of written language. This form is often used for the purpose of softening what would otherwise sound like a strong or dogmatic opinion; it does not necessarily mean that the speaker is in doubt of something.

【ではないだろうか】

[N / Na (なの)ではないだろうか]

[A / V のではないだろうか]

- (1) ひょっとして、これは悪い病気ではないだろうか。／ This might perhaps be a serious illness.

- (5) 彼らはもう出発してしまったのではないだろうか。／ But hasn't he already left?
- (6) もしかして、私はだまされているのではないか。／ Maybe I've been fooled.

This expression is similar to ではないか2 in the sense that it presents a conjecture on the part of the speaker. However, the degree of conviction expressed here is lower, making it a rather mild statement of possibility. The polite form is ではないでしょうか。 As in (3), when it is used in conversation it means that the speaker wants to confirm his/her conjecture with the listener.

【ではなかったか】

[N / Na (なの)ではなかったか]

[A / V のではなかったか]

This is essentially a written language expression used to make conjectures about a past condition or to complain about a difference between the past and present. In spoken language, forms such as (ん)じゃなかったか (men) and (ん)じゃなかつたの (women) are used.

Expresses to the listener a feeling of criticism, dissatisfaction, or regret regarding an undesirable state of affairs in the present that is different from the past. のではなかったか is used in written language. As in (3), it can also take the form ではなかつたのか. When used with the dictionary form of a verb, as in (4), means "though something should have been done, in reality it wasn't."

- (6) 始める前は、こんなに大変な仕事だとは思ってもみなかった。／ Before I started, I never believed this would be such hard work.

Often used in the form てもみなかつた to emphasize that something was not done. There is a limited set of verbs that can be used with this form. 思ってもみなかつた is an idiomatic expression that is commonly used after a certain situation has actually arisen to convey the meaning "this was completely unexpected."

⑥ V-てもみないで

- (1) 本を読んでもみないで、何が書いてあつたかどうしてわかるだろう。／ If you don't even try reading the book, how can you know what it said?
- (2) 食べてもみないで、文句を言うのはやめてください。／ Please stop complaining, when you haven't even tried eating it.

A slightly more emphatic way to say V-ないで. Often used to express criticism.

⑦ Nにしてみれば→[にしてみれば]

【ても】

[N / Na ても]

[A-くても]

[V-ても]

A combination of the *te-form* of a predicate and も. For nouns and *na*-adjectives, it becomes でも. In informal spoken language, the forms たって and だって are also used.

① ...ても(converse condition)

- (1) この仕事は、病気でも休めない。／ I can't take time off from this job even if I get sick.
- (2) その車がたとえ 10万円でも、今の私には買えない。／ Even if that car cost only 100,000 yen, I'm not in a position to buy it now.
- (3) 不便でも、慣れた機械の方が使いやすい。／ It's easier to use a machine that you're used to, even if it's a little inconvenient.
- (4) 風が冷たくても平気だ。／ Even if the wind is cold, it doesn't bother me.
- (5) ほしくなくても、食べなければいけない。／ Even if you don't want to, you have to eat something.
- (6) 国へ帰っても、ここの人々の親切は忘れないだろう。／ Even after I return home, I don't think I'll ever forget the kindness of the people here.
- (7) 今すぐできなくても、がっかりする必要はない。／ You don't have to be discouraged if you can't do it right away.
- (8) わたしは、まだ勉強不足だから、今試験を受けても受からないだろう。／ I still haven't studied enough, so if I took the test now, I doubt I'd pass.

- (9) たとえ両親に反対されても彼との結婚はあきらめない。／ Even if my parents are against it, I'm not going to give up on marrying him.

Expresses a converse condition that negates the resultative conditional "If X happens, then Y results" (XならばY). For example, the ...ても constructions in (1) and (6), respectively, negate the relationship between the conditions "If I get sick, I can take time off" and "After I return home, I'll forget the kindness of the people here"; these express that even if condition X arises, condition Y will not result. Example (9) shows how the adverb たとえ is sometimes used with this construction.

② …ても (parallel condition)

Presents two or more conditions and expresses that no matter which condition is realized, the outcome will be the same.

a …ても

- (1) 2を二乗すると4になりますが、-2を二乗しても4になります。／ If you square 2 you get 4, and if you square minus 2 you also get 4.
- (2) 飛行機で行くと料金は片道2万円ぐらいですが、新幹線で行っても費用はだいたい同じです。／ The fare for a one-way plane ticket is about 20,000 yen, but going by shinkansen (bullet train) costs about the same.
- (3) A: 演奏会、あと20分で始まるんですが、タクシーで行けば間に合うでしょうか。／ The concert starts in about twenty minutes—can I still make it if I take a taxi?

B: 会場は駅の近くですから、歩いて行っても間に合うと思いますよ。／ The hall is near the station, so I think you can make it in time even if you walk.

When two clauses expressing different condi-

tions that yield the same outcome are presented sequentially, as in XならばZ and YならばZ, the second conditional clause is expressed with ても, in the form Y (であつ)ても Z. Since this construction conveys the meaning that either condition will yield the same result, it can be rephrased as XでもYでもZ.

- (例) 2を二乗しても、-2を二乗しても4になります。／ Either squaring 2 or squaring minus 2 will yield 4.

b …ても…ても

- (1) うちの子供はニンジンでもピーマンでも好き嫌いを言わいで食べます。／ Our child isn't picky—she'll eat carrots and green peppers and everything.
- (2) 天気がよくても悪くとも、雨が降っても風がふいても、新聞配達の仕事は休めない。／ Whether the weather is good or bad, whether the rain falls or the wind blows, delivering newspapers is a job that doesn't allow for holidays.
- (3) 道を歩いてもデパートへ入っても人でいっぱいいた。／ Whether I walked on the streets or went into department stores, there were crowds of people everywhere.
- (4) 辞書で調べても先生に聞いても、まだこの文の意味が理解できない。／ Even after consulting my dictionary and asking my teacher, I still don't understand what this sentence means.
- (5) スポーツをしても映画を見ても気が晴れない。／ Even playing sports or watching movies doesn't lift my spirits.

The construction XでもYでも (...ても) Z juxtaposes two (or more) conditions and conveys the meaning that either (or any) one of them will yield the same result.

c V-てもV-なくても

- (1) 今回のレポートは出しても出さなくても、成績には全く影響ありません。／ Your

grade will not be affected at all, regardless of whether or not you submit this report.

- (2) 全員が参加してもしなくとも、一応 いちおう 人数分の席を確保しておきます。／
All members will participate, but I will ensure there are enough seats for everyone.

Whether everyone comes or not, I will at least make sure there are enough seats for all the members.

- (3) 1日 にち ぐらいなら 食べても たべなくても たい 重はたいして 変化しない。／ Eating or not eating for just one day won't change your weight that much.

In forms like ... してもしなくとも, this juxtaposes an affirmative condition with a negative one to express the idea that, whichever the case, the outcome will not change.

d V-てもV-ても

- (1) このズボンは洗っても洗っても汚れが落ちない。／ I've washed and washed these pants but still can't get them clean.
- (2) 宿題が多すぎて、やってもやっても終わらない。／ I have so much homework that even though I work and work I'm still never finished.
- (3) 働いても働いても、暮らしは全然楽にならない。／ No matter how hard I work, it never gets easier to make a living.

The same verb is repeated in order to emphasize that, no matter how much effort one makes, the desired outcome cannot be obtained. Although the final clause is usually a negative expression, there are cases, as shown below, when an affirmative expression may follow. Even in these cases, however, the implication is that the outcome is undesirable.

- (例) 追い払っても追い払ってもついてくる。／ No matter how often I chase it away, it keeps on following me.
- (例) 雑草は取っても取ってもすぐ生えてくる。／ I weed and weed, but they grow back in no time at all.

③ 疑問詞...ても

When question words such as 何, どこ, だれ, どれ, いつ, and どう are used with a ても conditional, the meaning is that, no matter what the condition is, the resulting situation is inevitable. (When a negative form follows, it means that the situation will fail to occur.)

a いくら...ても

- (1) いくら華やかな職業でも、つらいことはたくさんある。／ No matter how spectacular the occupation, there will be many difficult challenges.
- (2) いくら高い車でも、使わなかったら宝のもちぐされた。／ However expensive a car may be, if you don't use it, it's a waste of a valuable possession.
- (3) 給料がいくらよくても、休日のない職場には行きたくない。／ No matter how good the salary is, I don't want to work at a place where there are no days off.
- (4) いくら騒いでも、ここは森の中の一軒家だから大丈夫だ。／ This is the only house in the middle of a forest, so you can make as much noise as you want.
- (5) いくらお金を貰っても、この絵は絶対手放せない。／ No matter how much money I might get for it, I'll never give up this picture.
- (6) このビデオの会話は、いくら聞いてもよく分からない。／ I can't understand the conversation on this video, no matter how many times I listen to it.

いくらXても expresses that the frequency or degree of an action or situation is very great. Used to say that, although this is a powerful condition, it has no effect on the realization of a outcome.

The outcome is usually contrary to anticipation or expectation. For example, in (1), the expectation that "If you have a spectacular occupation, it must always be enjoyable" is contradicted by

the second clause "...there will be many difficult challenges." In (6), the resulting situation is "I still don't understand," which runs counter to the expected outcome "If I listen to this video many times, I should be able to understand it."

b どんなに...ても

- (1) このコンピューターはどんなに複雑な問題でも解いてしまう。／ This computer can solve any problem, no matter how complex.
- (2) どんなにつらくても頑張ろう。／ I will keep on trying, no matter how hard it gets.
- (3) どんなに熱心に誘われても、彼女はプロの歌手にはなりたくなかった。／ No matter how fervently she was scouted, she did not want to become a professional singer.
- (4) どんなに大きい地震がきても、この建物なら大丈夫だ。／ No matter how big an earthquake may hit, this building is safe.
- (5) 妻はわたしがどんなに怒っても平気である。／ My wife stays calm, no matter how angry I get.

Usage is the same as いくら...ても (Usage a) above. どんなに can be replaced by いくら, but the latter is more conversational.

c 疑問詞...ても

- (1) だれが電話して来ても、取りつがないでください。／ No matter who calls, please don't put them through.
- (2) どんな仕事でも、彼は快く引き受けてくれる。／ He readily agrees to do any kind of work.
- (3) 本は、どこで買っても同じ値段だ。／ Books are the same price wherever you buy them.
- (4) あの人はいつも見ても美しい。／ She's beautiful no matter when you see her.
- (5) 何をしても、あのショックが忘れられない。／ I never get tired of the food at that

い。／ Whatever I do, I can't forget the shock I felt.

Means どのような場合でも Y (no matter what the situation is, Y holds true). No matter what element is linked to the question word, this expresses that the end result will always be situation Y (or, in the case of a negative form, that it will always fail to be Y).

d どうV-ても

- (1) どう言ってみても、かれの決心を変えさせることはできなかった。／ No matter how I put it, I couldn't find a way to make him change his mind.
- (2) どう計算してみても、そこへ着くまで 10 時間はかかる。／ No matter how you calculate, it's going to take ten hours to get there.
- (3) どうがんばっても、前を走っている三人を追い抜くのは無理だと思った。／ I thought that, no matter how hard I tried, it was going to be impossible for me to overtake the three runners in front.

Uses a verb of intentional action to express that, no matter what measures are taken, the outcome will not meet one's expectations.

e なん+助数詞+V-ても

- (1) 何回聞いても名前が覚えられない。／ However many times I hear them, I can't remember names.
- (2) この論文は何度読み返しても、理解できない。／ No matter how many times I re-read this paper, I can't make sense of it.
- (3) 何回話し合っても、この問題は簡単には解決できないだろう。／ This is not a problem that will be easily solved, no matter how many times we talk about it.
- (4) あの店の料理は何度食べてもあきない。／ I never get tired of the food at that

restaurant, no matter how often I eat it.

- (5) あの映画は何回見ても面白い。／That movie is always fun to watch.

Uses an action verb to express the notion that no matter how many times the action is done, the outcome is still the same. The outcome expressed in the last part of the sentence is often contrary to expectation, as in (1)-(3). However, it can sometimes be a desirable situation, as in (4) and (5).

④ ...ても...ただろう

- (1) たとえ、努力しても合格できなかっただろう。／I don't think I could have passed even if I'd tried.
- (2) 彼は頭がいいので、努力しなくても合格できただろう。／He's really smart, so he probably could have passed without much effort.
- (3) 人をだまして金儲けをするような商売では、たとえ成功しても両親は喜んでくれなかっただろう。／In a business where you earn money by deceiving people, I doubt that my parents would have been happy for me even if I'd succeeded.

This is a counter-factual conditional that negates the propositional relation X していたら Y していただろう (if someone had done X, then s/he probably would have done Y). In the form X しても Y しなかつただろう (even if someone had done X, s/he probably wouldn't have done Y), it is used to state the assumption that even if X had happened, it would have had no effect on the fact that Y did not happen.

For example, (1) denies the conditional relationship in the resultative counter-factual conditional "If he had worked hard, then he probably would have passed" (which means he didn't work hard and thus failed). (1) means "He did not actually work hard, but even if he had, the result probably still would have been failure." (2) negates the resultative counter-factual conditional "If he hadn't worked hard, then he probably wouldn't have passed" (which means he actually did work hard and thus passed). (2) means "He did work

hard, but even if he hadn't, the result probably still would have been success."

⑤ ...ても...た

- (1) 雨でも運動会は行われた。／The sports meet was held even though it rained.
- (2) 頭が痛くても学校を休まなかった。／He didn't miss school even when he had headaches.
- (3) ドアは強く押しても開かなかつた。／The door wouldn't open, even when I pushed hard on it.
- (4) いくら待っても彼女は現れなかつた。／No matter how long we waited, she didn't show up.
- (5) この本は難しそぎて、辞書を引いて読んでも、ほとんど理解できなかつた。／This book was too difficult—I could hardly understand any of it, even reading it with a dictionary.

The construction X ても Y た, which uses the *ta*-form at the end of the sentence, expresses the fact that both X and Y happened. For example, (1) means "it rained, but the sports meet was held." While the ても form used here is similar in meaning to が, けれども, or のに, when ても is used after an action verb, it conveys the nuance that the action was repeated, or that although the action was carried out to an extreme degree, the anticipated outcome was not obtained. Thus, in sentences like (4), which include いくら, it is not possible to replace ても with が, けれども, or のに.

- (×) いくら待ったが／けれど／のに|彼女は現れなかつた。／We waited how long, {but/however/even though} she didn't show up.

⑥ V-ても R-きれない

- (1) 彼の親切に対しては、いくら感謝してもしきれない。／I cannot thank him enough for all of his kindness.
- (2) 学生時代になぜもっと勉強しておかなか

かったのかと、悔やんでも悔やみきれない。／ There is no limit to the regret I feel that I didn't study harder during my school days.

- (3) ここで負けたら、死んでも死にきれない。／ I can't bear to die if we lose now.

The same verb is repeated to emphasize its meaning. For example, (1) shows deep appreciation, and (2) emphasizes a strong sense of regret. This construction is rather idiomatic, and the range of verbs that can be used is limited. 死んでも死にきれない in (3) is a strong expression of being unable to give up on something or feeling deep regret.

7 V-てもどうなるものでもない

- (1) いまから抗議してもどうなるものでもない。／ Raising an objection now won't accomplish anything.
- (2) もう一度彼に会ってもどうなるものでもないと彼女は思った。／ She concluded that even if she met with him one more time, it would still be pointless.
- (3) 性格は直らないのだから、あの人には説教してもどうなるものでもない。／ His personality can't be mended, so even giving him a lecture will accomplish nothing.

Means that even if some action is attempted, it will not lead to a solution. Conveys a feeling of resignation.

- (3) 医者に止められているので、甘いものは食べたくても食べられない。／ No matter

how much I want to, I can't eat sweets, since my doctor has told me not to.

An idiomatic expression that combines the ても form of V-たい with the negative form of a V-れる potential verb. Means "even if I want to, I cannot." Used to emphasize that circumstances do not allow a certain action, or to make an excuse.

- (4) わたしの姉は貧乏な画家と結婚した。でも、とても幸せそうだ。／ My older sister married a painter with no money. But she seems very happy.

Placed at the beginning of a sentence to indicate that what follows will contradict what was stated previously. Less formal than しかし and more conversational in tone. Not used in the middle of a sentence.

(×) 友達はアルバイトをやめたでも、わたしは

やめられなかった。／ My friend quit her part-time job, and but I couldn't quit.

- (○) 友達はアルバイトをやめたが、わたしはやめられなかった。／ My friend quit her part-time job, but I couldn't quit.

- (2) この算数の問題は大人でもむずかしい。／ This arithmetic problem is difficult even for an adult.
- (3) この森は、夏でも涼しい。／ This forest is cool even in the summer.

The pattern XでもY gives X as an extreme example that would usually not be thought of as compatible with Y, in order to express the notion that because X is Y, other things are all the more Y.

② N(+助詞)でも

- (1) コーヒーでも飲みませんか。／ Would you like something to drink, like coffee, or...?
- (2) 待っている間、この雑誌でも見ていてください。／ While you're waiting, please feel free to take a look at this magazine.

(11) 寒いからなべものでもしたらどうですか。／ Since it's so cold, how about having nabe (hot pot) or something?

Used to give an example, with the implication that there are also other choices. Depending on the context, it is often used to indicate a specific thing in an indirect manner.

For example, (1) suggests "coffee or some other kind of drink," but in (2) what is actually being referred to is the concrete action of "looking at this magazine." In (9)-(11), でも is used to give an example in a suppositional expression that means "for example, what if you (we) do such-and-such?" However, it should be noted that in usages like (9), what the speaker actually wants to say is something like "Why don't you get out of the heat?" which is an expression that doesn't include でも. In general, でも is often used in indirect statements.

③ R-でもしたら

- (4) こどものころ、妹を泣かしでもしたら、いつも一番上の兄に怒られた。／ When I was a child, if I ever did something like make my little sister cry, my oldest brother would always get mad at me.

When でもしたら is attached to the stem of a verb, it expresses the notion of a worst-case scenario. Often used to caution someone by raising the possibility of an accident, illness, or something else that would cause problems in the event of its occurrence.

① V-てもかまわない(permission)

Since granting permission is something that is usually done by someone in authority, use of this form by someone of lower status to someone of higher status often sounds rude.

b V-てもよろしいですか

V-もらう is used to express, from the speaker's point of view, that someone has performed an action that benefits the speaker (or someone in the speaker's in-group). When the speaker has requested the action, the form V-もらう is often

used. When the other party has performed the action of his/her own accord, it is often the case that s/he is made the subject of the sentence and the form V-てくれる is used instead.

With expressions such as 教えてもらう (be taught), 貸してもらう (be lent), and 送ってもらう (be sent), in which objects or knowledge are transferred from another party to the speaker (or his/her in-group), the form からV-てもらう may also be used, as in 友だちからタイ料理の作り方を教えてもらった (I learned Thai cooking from my friend).

including that of cautioning another person, as in (5) and (6).

This pattern has the same meaning as Usage 1 of てん (above) but uses という as a connector. という can be inserted after a noun, but it is most often used to connect てん with a clause. という does not have to be used with verbs and adjectives, but it must be used when nouns and na-adjectives are followed by the predicative だ.

【と】

[N / Na だと]

[A-いと]

[V-ると]

Attaches to the dictionary form of a predicate. Although it is usually used with plain forms, in polite language it is also used in the form ですと or ますと. Expresses the relation that the second event is realized because of the condition created by the first event.

- (8) 生活が安定すると退屈になるし、不安定するとストレスがたまる。／When life is stable, it gets boring, and if it's too unstable, it causes stress.
- (9) 月にかさがかかると翌日は雨になる。／When the moon has a halo, it will rain the next day.
- (10) 来年のことを言うと鬼が笑う。／Don't count your chickens before they're hatched (lit. If you talk about next year, the devil will laugh).
- (11) 夜爪を切ると親の死に目に会えない。／If you cut your nails at night, you'll never say your last goodbyes to your parents (lit. If you cut your nails at night, you won't be able to see your parents at the time of their death).

Expresses a conditional relationship that applies not to a specific person or thing, but to people or things in general. Means "if X happens, then Y is inevitable." The end of the sentence is always in dictionary form, and *ta*-forms, conjectural forms, and so on are not possible. As in (7), sometimes と is combined with ものだ, which signifies that a certain characteristic is intrinsic to the thing or situation at hand.

Often used to express a relationship in which the event stated in the second clause occurs automatically or spontaneously after the event in the first clause. Thus, this pattern is often used to state laws of nature. Both (10) and (11) are proverbial expressions.

② ... と⟨repetition, habit⟩

Expresses repeated habits or actions of a particular person or thing. Often accompanied by adverbs such as 必ず(invariably), いつも(always), 每年(every year), or よく(often). Unlike

the generic condition expressed in Usage 1, this usage concerns a particular subject, and either the dictionary form or *ta*-form may be used at the end of the sentence.

a ... と ... る

- (1) おじいさんは天気がいいと裏山に散歩でかける。／Grandfather strolls in the hills behind our house whenever the weather is fine.

- (8) 僕がデートに遅れると彼女は必ず不機嫌になる。／My girlfriend always gets upset when I'm late for a date.
- (9) 彼は給料が入ると飲みに行く。／He goes out drinking whenever he gets paid.

Indicates the repetition of a present habit or action of a particular person or thing. The dictionary form of a predicate is used at the end of the sentence.

b ...と...た(ものだ)

- (1) 子供のころ天気がいいと、この辺を祖母とよく散歩をしたのだ。／ When I was a child, if the weather was nice, I often used to take walks with my grandmother around here.

- (6) あのころは一日働くと、一ヶ月遊んで暮らせたものだ。／ At that time, I could goof off for a month on just one day's work.

The *ta*-form of a predicate is used at the end of the sentence to express the repetition of a past habit or action of a particular person or thing. Often accompanied by the phrase たものだ, which expresses reminiscence.

[3] ...と(yet-to-be-realized condition)

a ...と+未実現のことがら

- (1) ここをまっすぐ行くと右手に大きな建物が見えます。／ If you go straight here, you'll see a large building on your right.
- (2) このボタンを押すとドアは開きます。／ If you push this button, the door will open.

- (3) この小説を読むと世界観が変わるかもしれません。／ Your view of the world may change if you read this novel.

- (10) こんなにおいしいといいくらでも食べてしまいそうだ。／ When it's this delicious, I could eat as much as there is.

Used to say that "if/when X occurs, then Y will occur," with respect to a particular person or thing. The Y clause always expresses an unrealized situation, but the X clause may express either an unrealized situation or one that has already come about.

(1)-(6) are cases in which X has not been realized, and (7)-(10) are cases in which X has already been realized. (6) is a threat directed at an addressee who is on the verge of moving. In this situation it would also be possible to say 動いたら撃つぞ (If you move, then I'll shoot), but the use of と implies that both actions will occur virtually simultaneously, giving the threat more impact than when it is expressed with the たら form. (7) and (8) are ways to warn or admonish someone who is overeating and someone who is lax about studying, respectively.

The Y clause may be followed by expressions to

emphasize a fact, or expressions of conjecture such as だろう or かもしれない. However, expressions meant to exert an effect on the other party, including commands, requests, and invitations, cannot be used. V-よう intentional forms cannot be used either.

(×) 雨天だと明日の試合は中止しよう。／ When it's rainy, let's cancel tomorrow's match.

(○) 雨天なら明日の試合は中止しよう。／ If it rains, let's cancel tomorrow's match.

Since と conveys a strong implication that a condition has already been realized or is very likely to be realized in the future, there is a tendency to avoid combining it with the word もし, which signifies a hypothetical situation.

(×) もし雨天だと試合は中止になります。／ Supposing when it rains, the match will be canceled.

(○) もし雨天なら試合は中止になります。／ If it rains, the match will be canceled.

b ...と+疑問詞...か

(1) A: お酒を飲むとどうなりますか。／ What happens if you drink alcohol?

B: 顔が赤くなります。／ My face turns red.

(3) A: この道をまっすぐ行くと、どこに出ますか。／ Where does this road lead to, if we follow it straight ahead?

B: 国道1号線に出ます。／ It leads to National Highway No. 1.

This is like the form するとどうなるか (if such-and-such is done, what is the outcome?). と is followed by an interrogative clause such as どうなるか or 何があるか, which contains a question word and a verb that expresses some kind of unintentional action, such as change or existence. Expressions denoting actions that are consciously controllable, such as どうするか, cannot be used

unless they indicate a habitual behavior or characteristic.

(×) 水は100度になるとどうしますか。／ What will you do when water reaches a temperature of 100 degrees Celsius?

(○) 水は100度になるとどうなりますか。／ What happens when water reaches a temperature of 100 degrees Celsius?

The particle と is similar to the pattern するとどうなるか in that the focus of the question is usually on the second half of the sentence. It is difficult to use in patterns like どうするとどうなるか, where the focus of the question is on the first half of the sentence. In these cases, it is more natural to use ば or たら rather than と.

(×) どうするとドアは開きますか。／ What do you do then the door opens?

(○) どうすれば／したらドアは開きますか。／ What should be done so that the door opens?

④ ...と...た<already-realized condition>

The situations specified before and after と are previously-realized conditions. Typically, the *ta*-form appears in sentence-final position, but in novels and other literary works, the dictionary form is sometimes used to express the historical present. In almost all cases, a verb is used both before and after this expression. Often used in stories and novels. In conversation, たら is more commonly used.

a ...と...た<trigger>

(1) 教えられた通りまっすぐ行くと、つきあたりに郵便局があった。／ When I went straight down the road I had been shown, there was a post office at the end.

(2) 駅に着くと、友達が迎えに来ていた。／ When I arrived at the station, my friend was already there to meet me.

(3) トンネルを出ると、そこは銀世界だった。／ Passing through a tunnel brought us into a winter wonderland.

- (4) お風呂に入っていると、電話がかかつてきた。／ It was while I was sitting in the bath that the telephone rang.
- (5) 街を歩いていると、見知らぬ男が声をかけてきた。／ When she was walking about the town, a strange man called to her.
- (6) 夜になると急に冷え込んできた。／ When evening came, it suddenly turned cold.
- (7) 午後になるとだいぶ暖かくなった。／ When afternoon came, it became much warmer.
- (8) ベルを鳴らすと、女の子が出て来た。／ When I rang the bell, a young girl came out.
- (9) 仕事をやめるとたちまちお金がなくなつた。／ When I quit my job, my money ran out in no time.

Expresses a relationship between two situations, such as when the occurrence of the first situation makes the speaker aware of the second, or the first situation is a trigger that brings about the second. (1), (2), and (3) show that as soon as the first action is carried out, the speaker "discovers" the second situation. (4) and (5) are scenarios in which a new situation arises while the first action is taking place. In (6) and (7), the first half of the sentence expresses a time-related condition that leads to the realization of the second situation. (8) and (9) express a relation in which the first action triggers the occurrence of the second one.

In all cases, the second situation must be part of the same overall situation as the first one, and it must also be something the speaker can observe from the outside. The following example describes an internal physical sensation of the speaker. Here the particle と is not possible, and たら must be used instead.

- (×) 昨夜この薬を飲むと、よく効いた。／ On taking this medicine last night, it worked really well.
- (○) 昨夜この薬を飲んだら、よく効いた。／ When I took this medicine last night, it

worked really well.

In almost all cases, a verb is used in both clauses. However, when this pattern is used to express the discovery of a situation, a predicate noun or adjective may conclude the second sentence, as shown in (3) above and the example below.

- (例) 外に出ると、予想以上に寒かった。／ On going outside, I found it much colder than I had imagined.

b ...と...た(successive events)

- (1) 男はめざまし時計を止めると、またベッドへ戻った。／ After shutting off his alarm clock, the man climbed back into bed.
- (2) わたしは、東京駅へ着くとその足で会社へ向かった。／ After reaching Tokyo Station, I continued on to the office.
- (3) 母は受話機を置くと、ためいきをついた。／ After putting down the receiver, Mother let out a sigh.

Expresses a situation in which the same person performs two actions in succession, the first one leading to the second. Both actions are intentional. Although the *ta*-form is usually used at the end of the sentence, in stage directions for things like screenplays the dictionary form may be used, as below.

- (例) 《シナリオ》良雄は、手をふくと、ギターを手に取る。／(script)Yoshio wipes his hands, then picks up the guitar.

The <successive events> usage of と is often found in novels or stories. With this usage, たら is unnatural, and it is almost never possible to use たら instead of と. This と can be replaced by the *te*-form of the verb, but it is not always possible to replace the *te*-form of the verb with と. For example, the *te*-form can be used to link three or more successive actions, but と cannot be used to do so.

- (×) 父は家に帰ると、ご飯を食べると、すぐ布団に入った。／ When my father came home, when he ate dinner, he soon got into bed (lit. his *futon*).
- (○) 父は家に帰って、ご飯を食べて、すぐ布団に入った。／ My father came home, ate

dinner, and soon got into bed.

While the *te*-form expresses successive actions that are part of the same situation, と divides one situation into two parts. It is used to depict, from an external point of view, the change that arises as the first situation switches into the second one.

⑤ ...とすぐ

- (1) 彼はうちへ帰るとすぐテレビのスイッチを入れる。／As soon as he gets home, he turns on the TV.
- (2) 放送局は、駅を降りて右へ曲がるとすぐです。／The broadcasting station is just after you take the first right from the station.
- (3) うちへ帰るとすぐテレビのスイッチを入れた。／I turned on the TV as soon as I got home.
- (4) 彼らは土地の開発許可が降りるとすぐ工事にとりかかった。／As soon as they got the land development permit, they started construction.
- (5) 彼女は大学を卒業するとすぐ結婚した。／She got married right after she graduated from college.
- (6) スポーツをやめるとすぐ太り出した。／As soon as he stopped playing sports, he started to put on weight.

This is a combination of the conditional expression と and the adverb すぐ. It means that a first event is followed immediately by the occurrence of a second.

⑥ ...と<introductory utterance>

- (1) 正直に言うと、そのことについてはあまりよく分からないのでです。／To be honest, I really don't know very much about that.
- (2) 母に言わせると、最近の若者は行儀が悪くなっているようだ。／If you ask my mother, apparently young people these

days have worse manners.

- (3) 本当のことを申し上げますと、手術で助かる見込みは 50 パーセント以下ではないかと思います。／If I may speak frankly, I think the chances of success for this operation may be less than fifty percent.
- (4) 実用的な点からみると、あまり使いやすい部屋ではない。／Looking at it from the point of view of practicality, it's not a very easy-to-use room.
- (5) 今となって考えてみると、彼の言うことももっともだ。／Looking back on it now, what he said was also on the mark.
- (6) 昨年に比べると、今年は桜の開花がちょっと遅いようだ。／Compared with last year, this year the cherry blossoms seem to be coming into bloom a little later.

When と is used after verbs of utterance, thought, or comparison, such as 言う (say), 見る (see), 考える (think), or 比べる (compare), it functions as an introductory expression indicating the viewpoint or stance from which the thing that follows will be stated. In this usage, と can often be substituted with the forms たら, ば, and なら.

Although this is a somewhat formal expression, it can be used in spoken language.

【といい】

[N / Na だといい]

[A-いといい]

[V-るといい]

- (5) 私を疑いたければ存分に疑うといい。／ If you want to doubt me, then go ahead and doubt!

Follows the dictionary form of a verb and expresses the notion of encouraging another person to take an action. Depending on the context, it can also be used to express a hands-off attitude, as in (5), which has the sense of "do as you like." Cannot be used to dissuade someone from taking an action. In such cases, the form V-ないほうがいい is used.

- (×) 今買わないといい。／ It's good not to buy it now.
- (○) 今買わないほうがいい。／ You shouldn't buy it now.

Similar expressions include たらいい and ばいい, but といい implies the encouragement that "generally speaking, doing such-and-such is appropriate." The form といい cannot be used in interrogative expressions inquiring what one

ought to do. In that case, たらいい／ばいい are used instead. When answering such questions, however, it is possible to use not only たらいい／ばいい but also といい. Then たらいい／ばいい convey the meaning that "such-and-such would be sufficient" to obtain a particular result. On the other hand, といい means that "such-and-such is generally an appropriate course of action."

- (×) うまくいかない時はどうするといいですか。／ What's good to do when things don't go well?

Expresses a desire for something to happen. Often used with が, けど, のに, or (のに)なあ at the

end of the sentence. When accompanied by が, けど, or のに, the implication is concern that "such-and-such may not be realized," or that the present state of affairs does not reflect what is hoped for. However, のに is not usually used regarding one's own actions.

- (×) 僕も行けるとよかったですのに。／ I should have been able to go, too....

- (1) 聞くところによれば、あの二人は離婚したそうだ。／ According to what I hear, apparently those two have divorced.
- (2) 現地記者の話すところによると、戦況は悪化する一方のようである。／ The reporters on location are saying that the war situation is steadily worsening.
- (3) 特派員の伝えるところによると、アフリカの飢饉はさらに悪化しているらしい。／ What we hear from the special correspondents is that the famine in Africa seems to be getting even worse.

Uses verbs that denote the output or transfer of information, like 聞く (hear), 話す (speak), or 伝える (tell), and is followed by a clause that specifies the information that has been relayed. The sentence often ends with expressions such as らしい (seem/appear), そうだ (they say/I hear), or とのことだ (so they say). Often used in news reports.

④ V-る／V-ている ところのN

- (1) 私が知るところの限りでは、そのようなことは一切ございません。／ As far as I know, that is not the case at all.
- (2) 彼が目指すところの理想の社会とは、身分差別のないすべての人が平等であるような社会であった。／ The ideal society to which he aspired was one in which there is no discrimination according to status but equality among all people.

This expression is a rather direct translation of relative pronouns used in Western languages. In Japanese it is possible to say, for example, 彼の目

指す理想の社会 (the ideal society he aspires to), so there is usually no need to use this expression; when it is used, it sounds like a translation. Used mostly in written language.

⑤ V-るところまでV

- (1) 墮ちるところまで墮ちてしまった。／ She sank as low as it was possible for her to sink.
- (2) とにかく、行けるところまで行ってみよう。／ At any rate, let's try to go as far as we can.
- (3) 時間内にやれるところまでやってみてください。／ Please try to do as much as you can in the allotted time.

The same verb is used at the beginning and end of this pattern to express the notion that an action or change reaches its utmost limit or an ultimate stage. When the potential form V-れる is used, as in (2) and (3), the meaning is that the action is performed to the greatest extent possible.

⑥ V-ているところをみると

- (1) 平気な顔をしているところをみると、まだ事故のことを知らせられてないのだろう。／ From the calm expression on his face, I would guess that he hasn't heard about the accident yet.
- (2) 大勢の人が行列しているところを見ると、安くておいしい店のようだ。／ Judging from the long line of people, it looks like a good restaurant with reasonable prices.

Used when the speaker is stating a supposition based on firsthand experience. At the end of the sentence, expressions such as らしい (seem/appear), ようだ (like/as if), or にちがいない (must be-without a doubt) are often used. The forms ...ところから and ...ところからみて may also be used.

- (例) 高級車に乗っているところから、相当の金持ちだと思われる。／ Seeing as he drives a luxury car, we can presume he's quite wealthy.

【ところ₂】

① V-たところ(resultative)

- (1) 先生にお願いしたところ、^{さっそくしょうだく}早速承諾の^{へんじ}お返事をいただいた。／ On making a request of my teacher, I immediately received a reply of consent.
- (2) 駅の遺失物係に問い合わせたところ、届いているとのことだ。／ Upon contacting the lost and found office at the station, I was told that my article had been turned in.
- (3) ホテルに電話したところ、^{なまえ}そのような名前の人には泊まっていないそうだ。／ When I called the hotel, I was told that there was no one by that name staying there.
- (4) 教室に行つてみたところが、^{がくせい}学生は一人も来ていなかった。／ When I went and took a look at the classroom, there wasn't a single student there.

ところ is attached to the *ta*-form of an action verb to express the occurrence of a situation and the triggering of a discovery. The situations that appear before and after this expression are not in a direct cause-effect relationship; rather, their relationship is something like "when I did..., by chance/it so happened that such-and-such was the case." The situation in the second clause is a discovery on the part of the speaker that was triggered by the action in the first clause, and this discovery is stated using language that denotes a previously-realized fact. Sometimes ところ is followed by the particle が, as in (4), creating the form V-たところが. In this case, the second clause usually expresses a situation contrary to expectation.

② V-たところが(adversative connective)

- (1) 親切のつもりで言ったところがかえって恨まれてしまった。／ I spoke with the intention of being kind, and instead I find myself being resented.

- (2) ^{たか}^{かね}高いお金を出して買ったところが、すぐ壊れてしまった。／ I spent a lot of money to buy it, and it broke right away.
- (3) 仕事が終わって急いで駆けつけてみたところが、講演はもうほとんど終わっていた。／ After finishing work I rushed to get there as soon as I could, only to find that the performance was already almost over.

This adversative usage can be replaced by のに (even though) and expresses that an outcome is contradictory to anticipation or expectation. In contrast to the resultative usage shown above, が is usually not omitted.

【どころ】

① ...どころか

[N / Na(な) どころか]

[A-いどころか]

[V-るどころか]

- (1) 病気どころか、びんびんしている。／ We thought she was sick, but there she was in the pink of health!
- (2) A: あの人、まだ独身でしょう。／ That person is still single, right?

- (5) 風雨は弱まるどころか、ますます激しくな

る一方だった。／ The wind and rain did not abate but, on the contrary, continued to increase in intensity.

- (6) この夏休みはゆっくり休むどころか、仕事に追われどおしだった。／ This summer vacation has been anything but relaxing—I've been swamped with work the whole time!

Attaches to nouns, adjectives, etc. When used with *na*-adjectives, as in (3), the *na* is sometimes inserted, but it can also be omitted. The fact stated after どころか is the exact opposite of what was stated before it. Used to state a fact that completely overturns the anticipations or expectations of the speaker or listener.

In (2), for example, Speaker B doesn't just say "No, s/he isn't" in response to Speaker A's assumption that the person in question "is single"; instead, Speaker B tells Speaker A that the person actually "has three children," with the effect of thoroughly refuting Speaker A's original assumption.

[2] ...どころか...ない

[...どころか...も...ない]

[...どころか...だって...ない]

- (1) 最近の大学生の中には、英語どころか日本語の文章さえうまく書けない者がいる。／ These days there are some college students who can't even write well in Japanese, let alone English!

- (5) お前のような奴には、1万円どころか1円だって貸してやる気はない。／ I wouldn't lend one yen to someone like you, let alone 10,000 yen!

The meaning and conjunctive use of this expression correspond to those of 1 (see above). どころか is followed by expressions of negation such as さえ(も)...ない, も...ない, and だって...ない to express not only that the average standard or expectation will not be met, but also that one far easier or far lower will not be met, either.

(1), for instance, means that although it is generally expected that Japanese university students should have the ability to use English as a foreign language, some students have such a severe lack of writing ability that they cannot even write properly in Japanese, which should be easier for them than English.

[3] ...どころではない

[Nどころではない]

[V-ているどころではない]

- (1) この1か月は来客が続き、勉強どころではなかつた。／ I've had a string of visitors this past month, so I haven't done much studying.

- (3) 仕事が残っていて、酒を飲んでいるどころではないんです。／ I still have work to do, so this is hardly the time to go drinking.

- (4) A: 今晚一杯いかがですか。／ How about getting together for a drink tonight?

B: 仕事がたまっていて、それどころではないんです。／ I have a pile of work to

do, so that's out of the question.

Attaches to verbs and action nouns to convey the meaning that "this is not a situation or case in which such-and-such can be done." As in (4), sometimes a demonstrative like それ (that) is used to refer to the previous utterance. Example (4) could be paraphrased as 酒を飲んでいるどころではない, which means "This is not a time to go drinking."

④ Nどころのはなしではない

Nどころのさわぎではない

- (1) 受験生の息子を二人もかかえ海外旅行
どころの話ではありません。／ With two sons studying for entrance exams, the last thing we should be talking about is an overseas trip.

- (3) 原子力発電所の事故発生でバカンスど
ころのさわぎではなくなつた。／ The accident at the nuclear power plant put an end to any talk of a vacation.

Used with nouns or action nouns and has essentially the same meaning as Usage 3 above. Implies that "this is no time to be making irresponsible comments like that!"

もしていられないんです。／ As a matter of fact, I have an article deadline, so I really can't take it easy at all.
- (6) A: 来週のパーティには是非いらしてくださいね。／ Please tell me you'll come to the party next week!
B: ところが、その日急に予定が入つてしまつたんです。／ Actually, something unexpected has come up that I have to do that day.

Used to connect two sentences when the content of the second sentence contradicts or clashes with what is naturally anticipated or expected from the first sentence. Also used when there is a relationship of contrast between two situations, as in (3) and (4). In conversations like (5) and (6), it is used to tell the addressee something like, "That's what you may think, but the reality is different." In other words, this usage signals a discrepancy between the other person's expectations and reality.

In all cases, the sentence after ところが^s contains an expression that indicates an established fact. Non-factual expressions, including expressions of intention, desire, command, or conjecture, cannot be used. Note the examples of incorrect usage given below.

- (×) 合格はかなり難しそうだ。ところが、受験してみるつもりだ(意志)／挑戦してみたい(希望)／頑張れ(命令)／ひょっとしたら受かるかもしれない(推量)。／ It looks like it will be difficult to pass. However, I intend to try to take the test. (intention)/...I want to take up the challenge. (desire)/...do your best! (command)/...I might just pass after all. (conjecture)

② ところが^s(discovery)

- (2) 友人の家に電話した。ところが、1週間前から海外旅行に行って留守だという。／ I called my friend's house. But I was told that he's not home because he's been out of the country on a trip since a week ago.

Used when the speaker is surprised by a new turn of events, or an event that was hard to anticipate from the situation or course of events described in the previous sentence. The sentence after ところが^s is information newly-discovered by the speaker that contradicts what would naturally be anticipated from the situation described in the previous sentence.

This usage of ところが^s does not usually allow for substitution with expressions like しかし, けれども, or だが, and when substitution is possible, the meaning of the sentence changes.

【ところだ】

① Vところだ^s(phase of a situation)

ところだ attaches to verbs and is used to report the current status or progress of a situation or event. ところだった expresses that something was at a

Placed after the dictionary form or *ta*-form of a verb and preceded by a conditional clause marked by …ば, …たら, etc. Expresses that, although the reality is different, the speaker can imagine a situation that would arise if a certain condition were realized.

- (5) 頑丈な作りですから倒れたところで壊れる心配はありません。／ It's sturdily made, so even if it falls over there's no worry that it will break.

ところで attaches to the *ta*-form of a verb and expresses that, even if that action is taken, it will not

yield the expected result. The clause describing the result contains the *nai*-form of a predicate or expressions that convey a negative judgment or evaluation, such as 無駄だ (it's useless) or 無意味だ (it's meaningless) (see (1) to (3)). May also be used to express a positive evaluation, with the sense "it's all right/no problem even if you do..." as in (4) and (5). In this case, the relationship between the two clauses is that even if the first situation occurs, it will not affect the second. Sometimes used with adverbs like たとえ (however/even if), どんなに (no matter how), and いくら (how much), and/or "何 + counter" expressions (e.g. 何人 (how many people), 何冊 (how many copies/volumes), 何回 (how many times)).

Takes the form ...ところに or ...ところへ and means "when I was ...ing" or "when I did...."

Used to express the occurrence of an event that alters or changes a situation that is at a certain stage. In most cases, the event is one that impedes or blocks something's progress, as in (1) and (2). However, it can also be something that changes the current situation for the better, as in (3).

【ところを】

help from a man I had never seen before.

This pattern contains two verbs, with the second one denoting an action that exerts a direct effect on the development of the situation expressed by the first. The second verb is a verb of sight or discovery, such as 見る (see), 見つける (find), 見つかる (be found), or 発見する (discover), or a verb that denotes cessation, capture, attack, or rescue, such as 呼び止める (call to a halt), 捕まる (catch/capture), 捕まる (be caught/be captured), 襲う (attack), or 助ける (save/help). These all share the meaning of halting or obstructing the development of the action or event denoted by the first verb.

Used by the speaker to express that s/he is taking the addressee's situation into consideration when s/he is making a difficult or unreasonable request or causing inconvenience to the other person. Often used to preface requests, apologies, or expressions of gratitude. As in (6) and (7), sometimes the previously-stated circumstances are referred to with a demonstrative, resulting in forms like そのところ (regarding that point).

【とされている】

- (1) 仏教で生き物を殺すのは十惡のひとつとされている。／ In Buddhism, killing a living creature is considered to be one of the ten evil deeds.
- (2) 地球の温暖化の一因として、大気中のオゾン層の破壊が大きくかかわっているとされている。／ One of the biggest causes of global warming is believed to be the destruction of the ozone layer in the atmosphere.

Means "is thought to be..." or "is considered as...." With a nominal predicate, だ is often omitted,

yielding the form Nとされている. Typically used in formal writing, such as news reports or scholarly papers.

【としたら】

Formed by attaching the particle と to したら. Means something like "supposing that is true," "supposing that such-and-such exists/occurs," or "based on this fact/the present state of affairs." Used to establish the conditions for the supposition "if one were to think such-and-such." Can hardly ever be replaced by たら alone.

- (5) 責任があるとしたら、私ではなくあなたのほうです。／ If someone is responsible for this, it's not me but you.

Means "supposing we assume that such-and-such is a fact," or "in the event that such-and-such occurs or exists." としたら is followed by an expression of the speaker's intention, judgment, or evaluation. Sometimes accompanied by 仮に (supposing that.../granting, for the sake of argument, that...) or もし (if/provided that...). としたら can be followed by expressions of intention or evaluation; in such cases, とすると and とすれば are not natural.

- (×) 宝くじがあたった!とすると/とすれば、家を買おう。/{When/If} I'd win the lottery, then I'll buy a house.

② ...としたら(already-realized condition)

- (7) 同級生に駄で出会わなかつたとしても、やっぱり授業をさぼって映画に行つただろ。／ Even if I hadn't run into a classmate at the station, I probably still would have cut class to go see a movie.

Takes the pattern X としても Y (even if X, then Y). Expresses that "even if X were true/had happened, it would not have caused or hindered the occurrence of Y." Y expresses something that contradicts or deviates from what is expected from X.

When X is a verb, the pattern V-たとしても (ta-form) is the most common, as shown in (4)-(7). However, the pattern V-るとしても (dictionary form) is also used, as shown in (3). (3) means "if something like studying abroad happens in the future," and the time frame indicated by Y is essentially the same as that for the occurrence of X. On the other hand, V-たとしても means "even if/when situation X has arisen," so this pattern expresses that X occurs before Y. For example, (4) means "even if we do take a taxi, the end result will probably still be that we won't make it in time."

In (6) and (7), X expresses a situation that is contrary to fact, and Y expresses a result that probably would have happened anyway: "In fact, Kato-san did warn me, but even if s/he hadn't..." and "I did actually run into a classmate, but even if I hadn't...."

③ ...はいいとしても

- (4) あのホテルは、部屋はいいとしても、従業員の態度がよくない。／ The rooms at that hotel might be all right, but the employees don't have a very good attitude.

Placed after nouns and clauses. Takes the pattern X はいいとしても Y (even if I accept X, still Y). Y contains an expression of negative evaluation, such as よくない (not good), and the pattern as a whole means "even if I consider X to be all right, I cannot say the same about Y." This expression is used to contrast two situations, X and Y. It means that while X lies within the range of what is permissible, Y does not.

【とする】

She cast a sharp glance at me.

- (10) 昨日からの雪は、一夜明けた今も依然として降り続いている。／ The snow started yesterday, continued overnight, and is still falling steadily.

This pattern combines the verb する with an adverb that has the particle と attached to it. Indicates that something has a certain appearance or condition. As shown in (4), と is not obligatory for words like ぼんやり (vaguely) and はっきり (clearly), which can be used as adverbs without it. In (7)-(9), して can be dropped. Other adverbs that combine with する include ちゃんと (properly), ゆったりと (easily/comfortably), かっかと (briskly/furiously), 悠々と (calmly/leisurely), 悠然と (with composure), and 毅然と (resolutely).

(1)-(4) can be replaced by Nにする, but metaphorical usages like the one shown in (5) do not allow this.

【とすると】

すると is attached to the particle と and refers to the preceding clause. Means “if we assume that to be a fact,” or “in the event that...occurs,” or “based on the present situation/facts.” Followed by the expression of a judgment that would hold in the event that the preceding assumption is made. This pattern is used to establish a set of hypothetical conditions and conveys the meaning “in the event that a certain assumption is made.” と by itself does not have this meaning, so とすると can hardly ever be replaced by と.

Placed after a noun denoting a person. Means "if I look at it/think about it from that person's perspective." More common in written language. In spoken language, the forms にしたら and/or にしてみれば are often used.

【とすれば】

Formed by attaching すれば to the particle と. Refers to the preceding clause and means "if we assume that to be a fact," "in the event that...occurs," or "based on these facts/the present situation." Used by the speaker to establish a set of hypothetical conditions and conveys the meaning "in the event that a certain assumption is made." ば by itself does not have this meaning, so とすれば can hardly ever be replaced by ば.

とたん is placed after the *ta*-form of a verb and expresses that one action or change is followed immediately by the occurrence of another action or change. Since it is used at the time and place that the speaker notices the second action or change, it is often associated with an implication of unexpectedness. Accordingly, it cannot be used when the verb in the second clause refers to an intentional action on the part of the speaker. In such cases, expressions like とすぐに (soon after) or やいなや (no sooner than) are used instead.

- (x) 私は家に帰ったとたん、お風呂に入った。／ Just as I got home, I took a bath.

It is a formal, mainly written expression and is often used in idiomatic expressions, such as この時とばかりに攻め込む/攻めかかる "now is the time to strike/attack" and えいととばかりに切りつける/切りかかる "slash at/strike at (someone) with all one's might" (lit. States a conjecture based on a current state of affairs. The first clause contains the speaker's conjecture, and the second presents the reason or basis for this conjecture. For instance, in (2) above, the speaker states the conjecture 夜中に雨が降ったようだ (it looks like it rained during the night) in the first clause, and this conjecture is based on the state of affairs 水たまりができる (there are puddles) given in the second clause. The second clause describes a fact that the speaker has actually observed.

【とも】

とも attaches to inflected words and has the same meaning as ても. However, since it is a literary usage, it sounds old-fashioned in comparison to ても.

① ...とも

[A-くとも]

[A-かろうとも]

- (1) *田中さんの送別会には、少なくとも 30 人に* は集まるだろう。/ At least thirty people will come to the farewell party for Tana-ka-san.

- (3) *どんなに辛かろうと、苦しかろうと必ずやり遂げてみせます。* / No matter how painful and difficult it may be, I will accomplish this without fail.

とも attaches to the -く and/or -かろう forms of i-adjectives. In spoken language, -くとも is commonly used instead of -くとも. In (1), とも is followed by an estimate of quantity and means "even if I were to estimate in such-and-such a way..." (in this case, "even if I were to make a low estimate..."). Similar usage is found in expressions

such as 多くとも 10 人 (no more than ten people), 長くとも 30 分 (no longer than thirty minutes), 遅くとも 5 時までに (by no later than five o'clock), and so on. The も in とも is often omitted when -かろうと is repeated, as in (3).

(1) 申し訳ありません。私どもの責任です。／

I am very sorry. This is our fault.

(2) 手前どもの店では、この品物は扱っておりません。／ I'm afraid that we don't carry this product.

(3) 《けんかのことば》野郎ども、みんなそろってかかって来い。／《fighting words》Hey, you bunch of jerks, bring it on!

(4) 政界は偽善者どもの集まりだ。／ Political circles are gatherings of hypocrites.

Indicates a plural number and attaches mainly to nouns that refer to people. Similar to たち. However, when it attaches to a first-person pronoun, it is more polite than 私たち because it conveys a humble attitude. Another difference is that 私たち may or may not include the listener, but 私ども always excludes the listener. As shown in (3) and (4), when ども is used with a second- or third-person pronoun, it usually conveys a sense of contempt towards that person. Other examples include 女ども (the women), 者ども (all of you), and so on.

【ども₂】

[V-ども]

(1) 行けども行けども、原野は続く。／ No matter how far I go, there is nothing but endless plains.

(2) 声はすれども、姿は見えず。／ I can hear a voice, but I can't see anyone.

(3) 振り向いて見れど、そこにはだれもいなかった。／ Though I looked back, no one was there.

V-ども attaches to the stem of the ba-form of

verbs and has the same meaning as V-ても and Vけれども. For example, the ども clause in (1) means 行っても行つても (no matter how far I go), and the one in (2) means 声はするけれども (I can hear a voice, but...). (1) and (2) are idiomatic expressions, and (3) is a literary expression. Except for these special usages, and also the form といえども (even though/just because), V-ども is not used very often.

【ともあろうものが】

Means "such a (competent, honorable, etc.) person (does something unexpectedly)." Placed after a noun indicating social status, role or occupation, it is used to describe an action that, according to conventional wisdom, a person in such a role should not have performed. ともあろうものが is followed by an expression that conveys surprise, anger, or suspicion. もの can be replaced by other words that refer to people, such as 人 (person) or 人物 (person/figure).

(例) 国会議員ともあろう人物がこのような巨額の脱税を平気で行うのだから、議員のモラルも低下したものである。／ The professional morals of politicians have really deteriorated when a member of the Diet, of all people, thinks nothing of evading such an enormous amount of tax.

Means "X is not definite, and there is a possibility of the opposite." It is often used in the pattern V-ないともかぎらない, in which case it means there is still a slight possibility that something might happen under circumstances in which it is regarded as less than probable. A similar expression is とはかぎらない.

than spending time debating the pros and cons of that action. ともかく can be replaced by とにかく.

【ともすると】

When used with a question word such as どこ (where), いつ (when), だれ (who) or どちら (which), ともなく means "but it is not possible to specify the exact place, time, person, or thing." When a particle is used, it is placed immediately after the question word.

② V-ともなく

- (1) どこを眺めるともなく、ぼんやり遠くを見つめている。／ He is gazing absently into the distance, at nothing in particular.

- (2) 娘が「ムサカ」とやらいうギリシャ料理を作ってくれました。／ My daughter cooked me a Greek dish called something like *moussaka*.

Means "called something like..." and is used after a name that the speaker does not remember precisely. In (1), とやら is attached directly to a particle, but this can be considered to be an abbreviation of the phrase やらいう人 (a person called something like...), with いう人 (a person called) omitted.

- (2) 結局あの二人は結婚して、田舎で仲良く暮らしているとやら。／ I heard that those two ended up getting married and are living happily together in the countryside, or something.

とやら follows information that the speaker has heard from someone else and means, "it may not be completely accurate, but I heard something like this." Although the meaning of とやら is similar to that of とか聞いている, のことだ and そうだ, とやら conveys a strong sense that the information quoted is not very precise because the speaker's recollection is vague. とやら is rarely used in everyday spoken language.

- (5) 教師はどんな学生に対してもわけへだたなく付き合う必要がある。／ Teachers need to be able to deal impartially with any kind of student.
- (6) 彼はどんなことにも興味をもつ人間だ。／ He is a person who is interested in anything and everything.

The pattern どんなN+助詞+も expresses that the situation or state of affairs described after this clause holds true in all cases, regardless of the particular characteristics of the thing or person referred to by N.

【どんなに】

【どんなに ... だろう(か)】

- (1) 希望校に合格できたらどんなにいいだろうか。／ How great it would be if I could pass the entrance exam for the school of my choice.
- (2) 息子の戦死を知ったら両親はどんなに悲しむことでしょう。／ How sad his parents would be if they knew that their son had died in the war.
- (3) 父が生きていたらどんなに喜んでくれたことだろうか。／ How pleased my father

would have been for me if he were alive!

- (4) 子供が無事だと分かった時、私はどんなにうれしかっただろう。／ How delighted I was when I found out that my child was safe.
- (5) 私はこの日がくることをどんなに望んだことだろう。／ How eagerly I had waited for this day!

The pattern どんなに...だろう(か) combines with expressions of joy, sorrow, hope, and so on to create exclamatory statements indicating that the degree of emotion is far greater than what is usual. In (1)-(3), this pattern is used to make a conjecture about something that hasn't actually happened and conveys the meaning of "if X were so, then surely (I) would be/would have been extremely Y." On the other hand, in (4) and (5) it expresses that someone actually was very happy or did eagerly look forward to something.

② どんなに...ても

- (1) どんなに金持ちでも愛情に恵まれなければ幸福とは言えない。／ No matter how rich you are, you cannot claim to be happy without being loved.
- (2) たとえどんなに苦しくても最後まで頑張ります。／ No matter how hard it will be, I'll make every effort to see this through to the end.
- (3) どんなに働いても暮らしあつとも楽にならない。／ No matter how hard I work, it doesn't get any easier to make ends meet.

Means that, regardless of the degree or level of the condition indicated by this clause, what is stated in the subsequent clause is always true (or, in the case of a negative form, not true). どんなに...ても can be immediately preceded by たとえ (if; even if) and replaced by いかに/いくら...ても (however/no matter how (much)).

【ないか】

...ないか is used mainly by male speakers. However, ...ない?, which is an abbreviated form of

polite expressions such as ...ませんか and か, is used by both male and female speakers.

① V-ない(か)<invitation>

- (1) ちょっと、食べてみない?／ Want to try some of this?
- (2) 今度、いつしょにスキーに行かないか。／ Why don't we go skiing sometime?
- (3) そろそろお茶にしませんか。／ How about taking a break for tea pretty soon?
- (4) ちょっと寄っていきません?／ Would you like to drop by there?

When combined with verbs expressing a volitional action, the pattern V-ない(か) is used to suggest that an interlocutor take some action or to invite him/her to do something together. The polite form of V-ない(か) is V-ませんか. V-ない(か) forms are usually pronounced with rising intonation, and か can be omitted.

② V-てくれない(か)<request>

- (1) お塩、とっくれない?／ Can you pass me the salt?
- (2) ちょっと手伝ってくれませんか。／ Would you help me for a moment?
- (3) この本、2、3日貸してもらえない?／ Can I borrow this book for a few days?
- (4) 5時までにおいでくださいませんか。／ Would it be possible for you to be here by five o'clock?
- (5) 明日もう一度ご来店いただけないでしょうか。／ Could you come to our shop again tomorrow?

This pattern, used in the forms V-てくれないか and V-もらえないか, expresses a request from a speaker to an interlocutor. It is more polite when used in forms such as V-てくださいませんか/いただけませんか/いただけませんでしようか or お/ご...くださいませんか, as in (4), and お/ご...いただけないでしようか, as in (5).

Note that when this pattern is used with もらう and いただく, the potential forms もらえる and い

ただける should be negated to create the forms V-てもらえないか／いただけないか. Also, when いただく and くださる are attached to honorific expressions such as おいでになる (to come/to be here) or Sino-Japanese verbs such as 来店する (to come to a shop), になって and して are usually omitted and the forms おいでいただけませんか／くださいませんか and ご来店いただけませんか／くださいませんか are used.

V-てくれないか forms are often pronounced with a rising intonation, and か can be omitted. In polite language, these forms can also be replaced by ...願えないか (lit. "can't/couldn't I ask...?"), as shown below.

- (例) もう一度ご来店願えないでしょうか。／ Could we ask you to come to our shop again?

③ V-ないか(imperative)

- (1) おい、待たないか。／ Hey, can't you wait?
- (2) だまらないか。／ Can't you shut up?
- (3) いい加減でやめないか。／ It's about time you stopped.
- (4) 早く起きないか。／ Why don't you get up now?
- (5) さっさと出かけないか。／ Why don't you hurry up and get going?

Used to order an interlocutor to take action immediately when s/he does not seem to be doing so. For instance, (1) means "Wait!" and (2) "Shut up."

These expressions are similar to imperatives. However, because they are used in situations where an interlocutor is reluctant to take immediate action, they often convey the sense that the speaker is irritated or upset. V-ないか is pronounced with falling intonation in a demanding tone and does not have a polite form. It is used by male speakers.

④ ...ない(か)(confirmation)

[N／Na ではないか]

[A-くないか]

[V-ないか]

- (1) A: 彼が犯人じゃないですか。／ Isn't he

guilty?

- B: そうかな。／ We'll see.
- (2) A: 子供には無理じゃないですか。／ Isn't this impossible for a child?
 - B: 大丈夫ですよ。／ It should be all right.
 - (3) A: 君にはちょっと難しくないですか。／ Isn't this a bit difficult for you?
 - B: ええ、でもやってみます。／ Yes, but I'll try.
 - (4) A: この部屋、変な匂いがない?／ Doesn't this room smell strange?
 - B: うん、なんだかちょっと。／ Yeah, a bit....
 - (5) A: ちょっと駅から遠すぎませんか。／ Isn't it a little too far from the station?
 - B: そうですか。歩いて 15 分ぐらいですか。／ Do you think so? But it's only about a fifteen-minute walk.
 - (6) 彼の様子、ちょっと変だと思いませんか。／ Don't you think something about him looks a bit strange?

Used to ask the listener to confirm whether or not what the speaker is thinking is correct. Even though this pattern takes negative forms such as Xじゃないか (isn't it X?), what the speaker wants to confirm is a positive state of affairs, Xである (it is X). When the listener agrees with what the speaker says, s/he responds with はい／うん、そうだ, and when the listener disagrees, s/he uses いいえ／いや、そうではない. When the speaker wants to confirm an event that has apparently already taken place, s/he uses the *ta*-form, as below.

- (例) A: 何か物音がしなかったか。／ Didn't you hear a noise?
- B: いや、僕には何も聞こえなかったけど。／ No, I didn't hear anything.
- (例) A: 私に電話がかかって来ませんでしたか。／ Wasn't there a phone call for me?
- B: いいえ。／ No, there wasn't.

⑤ ...ない(か)〈mild assertion〉

[N／Na ではないか]

[A-くないか]

[V-ないか]

- (1) 彼が、東大に合格したなんて何かの間違
いではないか。／ Wasn't it some kind of
mistake that he passed the entrance exam
for Tokyo University?
- (2) 最近の彼の言動はちょっと変じやない
か。／ Don't you think that lately he's been
behaving a little strangely?
- (3) このスープ、ちょっと、塩味が薄くない?／
Doesn't this soup need a little more salt?
- (4) やめといたほうがよくなかった。／ Wouldn't
it be better if you just let it drop?
- (5) そんなに働いたら病気にならないか。／
Don't you think that working so hard will
make you sick?

Used to make a mild assertion of personal opinion. Conveys the speaker's feeling that "I think this might be so" and is used to make an inconclusive statement that leaves room for a little doubt. As shown in (5), the use of ...ないか often implies the speaker's anxiety or concern.

...ないか is often replaced by expressions implying conjecture or doubt, such as (の)ではないか, (の)ではないだろうか／(の)ではなかろうか／(の)ではあるまいか or ないかしら／ないかな. When talking about a past event, (では)なかったか is used, as illustrated below.

- (例) 昨日見かけた人、山田さんの奥さんじゃ
なかつたか。／ Wasn't the person we saw
yesterday Yamada-san's wife?

In spoken Japanese, when ...ではないか attaches to a noun or a *na*-adjective it is usually replaced by ジゃないか.

⑥ ...じゃないか→【じゃないか】、【じゃない か₂】

⑦ ...ではないか→【ではないか】、【ではない か₂】

【ないかしら】

The ないかしら pattern consists of the negative form of an inflected word combined with かしら, which expresses a sense of uncertainty on the part of the speaker. It is used for both self-addressed questions and questions addressed to an interlocutor. In the past, ないかしら was conventionally used by female speakers. However, now it is infrequent, and ないかな is used instead.

① ...ないかしら〈wish, desire〉

[V-ない／V-れない かしら]

[V-てくれないかしら]

- (1) またあの人から手紙が来ないかしら。／
I do hope I will receive a letter from him
again.
- (2) お金持ちと結婚できないかしら。／ I wish
I could marry a rich man.
- (3) バス、すぐに来てくれるないかしら。／ I do
hope the bus comes soon.
- (4) ちょっと手伝ってくれないかしら。／ I
wonder if you could help me for a
moment.

When ないかしら is used with the negative form of an action verb, the negative form of the potential V-れる, or the pattern V-てくれない, it expresses the speaker's hope or desire. When a sentence like (4) is directly addressed to a listener, it can be understood as a request from the speaker.

② ...ないかしら〈conjecture, concern〉

[N／Na ではないかしら]

[A-くないかしら]

[V-ないかしら]

- (1) 向こうからくる人、鈴木さんじゃないか
しら。／ Could that be Suzuki-san over
there, walking this way?
- (2) この着物、私にはちょっと派手じゃないか
しら。／ I wonder if this *kimono* is a little
too showy for me.
- (3) このご飯、ちょっとかたくないかしら。／ I
wonder if this rice isn't a bit undercooked.

- (4) あんなに乱暴に扱ったらこわれないかしら。／ I wonder if it might not break if it's handled so roughly.

Expresses a conjecture, as in "I'm not absolutely sure, but it just might be so," or a feeling of anxiety or concern, as in "I have the sense that/I'm worried about...." If the speaker is talking to him/herself, ないかしら functions as a self-addressed question, but if this expression is used to address a listener, it means "Don't you think so?" and functions as an appeal for the listener's judgment.

【ないかな】

...ないかな consists of the negative form of an inflected word combined with かな, which expresses uncertainty on the part of the speaker. It is used for both self-addressed questions and questions addressed to others. Unlike かしら, ないかな can be used by both male and female speakers. However, since this expression is not polite language, when it is used to address others it should be used only with interlocutors who have a close relationship to the speaker.

① ...かな(あ)〈wish, desire〉

[V-ない／ V-れない かな]

[V-てくれないかな]

- (1) 早く夏休みにならないかなあ。／ I can't wait for summer vacation.
- (2) 今夜いい夢が見られないかな。／ I hope I'll have a good dream tonight.
- (3) 息子が一流大学に入ってくれないかな。／ I wish my son would enter a top-class university.

When ないかな takes the negative form of a verb referring to an action, a change of state, or existence, or the negative form of the potential V-れる, it means "I hope so" or "I wish it would happen." Expresses the speaker's hope, wish, or desire.

② ...かな(あ)〈conjecture, concern〉

[N／Na ではないかな]

[A-くないかな]

[V-ないかなあ]

- (1) その人、森田さんの奥さんじゃないかな。／ I wonder if that person isn't Mori-ta-san's wife.
- (2) 彼だったら大丈夫じゃないかな。／ If it's him, I guess he'll be fine with it.
- (3) こっちのほうがよくなないか。／ Isn't it better this way?
- (4) 子供にはちょっと難しそうないかな。／ Isn't this a little bit too difficult for a child?
- (5) この靴、ちょっと小さくないかな。／ I wonder if these shoes aren't a bit small.
- (6) そんなことを言って、彼女怒っていないかな。／ I wonder if she's upset because I said such a thing to her.

When used with the negative form of a predicate, ...かな(あ) expresses a conjecture, like "I'm not completely sure, but it just might be so," or a feeling of anxiety or concern, like "I'm concerned/I have the sense that...." If the speaker is talking to him/herself, ...かな(あ) functions as a self-addressed question, but if this expression is addressed to a listener, it means "don't you think so?" and functions as an inquiry regarding the listener's judgment.

【ないことはない】

[V-ないことはない]

- (1) A: とても明日までには終わりそうにないんですけど....。／ There doesn't seem to be any way for me to finish this by tomorrow....
B: いや、やる気があればできることはありませんよ。／ Well, if you are motivated enough, it's not impossible.
- (2) A: 彼女は来ないんじゃないかな。／ She isn't coming, is she?
B: 来ないことはないと思うよ。遅れても必ず来ると言っていたから。／ I don't think she's not coming. She said she'd

come for sure, although she might be late.

- (3) A: 1週間でできますか。／Can you do this in a week?

B: できないことはないですが、かなり頑張らないと難しいですね。／It's not totally impossible, but unless I try really hard, it'll be difficult.

- (4) A: 行きたくないの?／Don't you want to go?

B: 行きたくないことはないけど、あまり気がすまないんだ。／It's not that I don't want to go, but I can't say I'm very enthusiastic about it.

ないことはない is used in response to a statement an interlocutor has made, either to deny the statement completely, with the meaning "that is not at all the case," or to defer making a firm judgment, with the meaning "that is partly true/possible, but not necessarily 100% so." (1) and (2) are instances of the former use, and (3) and (4) of the latter.

More precisely, in (1) B responds to A's negative statement, which means "I can't do this," by saying, "it's not impossible for you to do it," implying that B thinks A actually can do it. On the other hand, in (3), B's response means "I can do it, but I won't guarantee it," which implies "there is a possibility that I can't do it."

The latter usage of ないことはない (above) can be rephrased as ないともない. However, this is not possible for the former usage.

【ないともない】

[V-ないともない]

- (1) よく考えてみれば、彼の言うことももっともだと思えないこともない。／If I think about it carefully, I can see that what he said wasn't totally without reason.

- (2) 言われてみれば、確かにあのときの彼は様子がおかしかったという気がしないともない。／Now that you mention it,

I can't deny that his behavior at the time seemed somewhat strange.

- (3) この会社は社長一人の意見で動いていふと言えないこともない。／It wouldn't be completely wrong to say that this company operates solely according to the opinion of the president.

ないともない is a double negative expression that conveys the affirmative meaning "there is such an aspect/possibility." Means that although something is not completely X, it is possible to say that some aspect of it is X. Used when the speaker wants to withhold a firm judgment. Related expressions such as 言えなくもない (it wouldn't be impossible to say...) and 気がしなくもない (not be without the sense that...) are often used.

【ないで】

ないで is the *te*-form of a negated verb. It indicates the manner, situation, or circumstances in which the action or state referred to after ないで is realized.

① V-ないで<attendant circumstances>

- (1) 息子は今朝もご飯を食べないで出かけた。／My son left the house again this morning without eating breakfast.

- (2) 彼女は一生結婚しないで独身を通した。／She didn't marry, she remained single for her entire life.

- (3) 傘を持たないで出かけて雨に降られてしまった。／I went out without an umbrella and got rained on.

- (4) 予約しないで行ったら、満席で入れなかった。／I went without making a reservation, so I couldn't get in because every seat was taken.

- (5) 歯を磨かないで寝てはいけません。／Don't go to bed without brushing your teeth.

Followed by a main verb clause X, V-ないで has

the meaning of “do X without doing Y.” In written language, ...^{ずに} is also used. Cannot be replaced by V-なくて.

② V-ないで<instead of>

- (1) 親が来ないで子供が来た。／ The child came, but not the parents.
- (2) ロンドンには行かないでパリとローマに行った。／ Instead of London, I went to Paris and Rome.
- (3) 運動してもちっともやせないで、かえって体重が少し増えた。／ Even though I'm working out, I'm not losing weight at all—instead I've gained a little.
- (4) 頑張っているのに成績はちっともよくならないで、むしろ下がってきてる。／ Even though I'm trying my best, my marks aren't getting any better—if anything, they're getting worse.

V-ないで is used to make a contrastive statement about two things. Means “do such-and-such instead of doing something else,” or “such-and-such happens instead of something else.” Often implies that what follows V-ないで is a result that contradicts the speaker's expectation or anticipation. In written language, ...^{ずに} is also used.

It is not impossible to replace V-ないで with V-なくて. However, 不くて does not convey the contrastive meaning of 代わりに (instead of). Rather, it means that two situations or states of affairs have been realized at virtually the same time. Thus, when the speaker wants to express contrastive meaning, ないで must be used.

③ V-ないで<cause>

- (1) 子供がちっとも勉強しないで困っています。／ I don't know what to do, because my child isn't studying at all.
- (2) やつが来ないで助かった。／ I was relieved that the guy didn't come.
- (3) 試験にパスできないでがっかりした。／ I was disappointed because I couldn't pass

the exam.

- (4) 起きられないで授業に遅れた。／ I was late for class because I couldn't get up in the morning.
- (5) 大事故にならないでよかった。／ I'm glad it didn't turn into a big accident.

Means “because someone does not do X” or “because something does not happen.” Often followed by expressions that indicate an emotion or evaluation, such as 困った (didn't know what to do) in (1) and 助かった (was relieved) in (2), or expressions that present a chronological relationship between situations or events, as in (4). In this usage, ないで can be replaced relatively freely by なくて.

【ないである】

[V-ないである]

- (1) 手紙は書いたけれど出さないである。／ Although I wrote a letter, it still hasn't been sent.
- (2) 頂き物のメロンがまだ手をつけないであるから、召し上がれ。／ This melon, which we received as a gift, hasn't been touched yet, so have some.
- (3) このことはまだ誰にも知らせないである。／ I haven't told this to anyone yet.

ないである means “leave something as it is, without doing X.” It is used in cases when people deliberately continue not to do something. The transitive verb in “transitive verb + てある” patterns such as 手紙はもう出してある (The letter has already been sent) is used in the negative form. The expression (せ)ずにある is more common than ないである.

【ないでいる】

[V-ないでいる]

- (1) 昨日から何も食べないでいる。／ I haven't eaten anything since yesterday.
- (2) このことは夫にも話さないでいる。／ I haven't told this even to my husband.

- (3) 雨の日曜日は部屋から一步も出ないでいた。／ I didn't set foot outside all day Sunday because it was raining.
- (4) 祖母は自分一人では起き上がるることもできないでいる。／ My grandmother is unable to get up by herself.

ないでいる means “remain in the same state, without doing (being able to do) X.” It can be replaced by ... (せ) ずにいる. The subject of a sentence with ないでいる must be a person or animal with feelings and/or intentions, so expressions such as the following are not acceptable:

- (×) 雨が降らないでいる。／ The rain is still not falling.

【ないでおく】

[V-ないでおく]

- (1) 時間がないので昼ご飯は食べないでおこう。／ We're running out of time, so let's skip lunch.

- (3) 他人がさわるとわからなくなると思ったので、机の上は掃除しないでおきました。／ I didn't clean the desk because I thought you wouldn't be able to find things if someone else moved them.

Means “intentionally leaving something as it is, without doing X,” for some sort of reason or purpose. It is also possible to say ...せずにおく.

【ないでくれ】

- (1) 危険なことはしないでくれよ。／ Don't do anything dangerous.
- (2) ここではたばこを吸わないでくれ。／ Don't smoke here.
- 【てくれ】②

【ないですむ】

[V-ないですむ]

- (1) 道がすいていたので遅刻しないですんだ。／ I wasn't late, because there wasn't much traffic on the road.
- (2) 電話で話が着いたので行かないですんだ。／ I didn't have to go, because we reached an agreement over the phone.

Means “it turns out to be all right not to do something that was previously planned,” or “something that was predicted can be avoided.” Used when an unfavorable situation or circumstance can be averted.

【ないではいられない】

[V-ないではいられない]

- (1) こんな悲しい話を聞いたら、泣かないではいられない。／ I can't help but cry when I hear such a tragic story.
- (2) 言わないほうがよいことは分かるが、話さないではいられなかつた。／ I know I shouldn't have said anything, but I couldn't help talking about it.
- (3) あの映画を見たら、誰だって感動しないではいられないだろう。／ Anyone who sees that movie can't help but be impressed by it.
- (4) 子供のことでは、日々悩まされないではいられない。／ I can't stop worrying about my child every single day.

This pattern attaches to the negative form of a verb and expresses the meaning that the subject cannot control him/herself by force of will but rather does something spontaneously, in spite of him/herself. Verbs that refer to a person's actions or a change in someone's thoughts or feelings are used, such as 泣く (cry), 思う (think) and 感動する (be impressed/moved by). This pattern implies that the speaker views the spontaneous response as natural. In written language, ...せずににはいられない can be used instead.

【ないではおかないと】

[V-ないではおかないと]

- (1) この作品は読む者の胸を打たないではおかないとだろう。／ This piece cannot but move the reader's heart.
- (2) 彼女の言動はどこか私を苛立たせないではおかないとある。／ There is something in her behavior that cannot but irritate me.
- (3) 彼女のこと、白状させないではおかないと。／ I'm not going to let you get off without confiding in me about your girlfriend.

Used after the negative form of a transitive verb or the negative causative form of an intransitive verb (V-させない). Expresses that a certain state or action will be brought about by a strong external force, regardless of the intention of the person concerned. Since this is essentially a written expression, it usually takes the form せずにはおかないと.

【ないではすまないと】

[V-ないではすまないと]

- (1) 知り合いに借りたキャンプ用のテントをひどく破ってしまった。新しいのを買って返さないではすまないと。／ The camping tent I had borrowed from an acquaintance got badly torn. I'm not going to get away without buying a new one to replace it.
- (2) こんなひどいことをしたんでは、お母さんにはかられないではすまないと。／ You're not going to get off without a talking-to from your mother, after doing such a terrible thing.
- (3) 罪もない人々にこのような過酷な運命を強いてしまった。いつの日にかその報いを受けないではすまないと。／ I have forced a cruel fate on innocent peo-

ple. There's no way that I can avoid getting my just reward for this someday.

Used with the negative form of a verb, ないではすまないと means that one has no choice but to take (or undergo) some action. For instance, (1) means that the speaker must buy a new tent, since s/he cannot return the torn one. ないではすまないと usually conveys a negative evaluation of the situation in question and is a formal expression.

【ないでもないと】

Used with the negative form of a verb or the negative adjective ない, ないでもないと means that it isn't possible to say that something never happens; on the contrary, there are times that it does occur or exist. ないこともない and なくもない are also used.

① V-ないでもないと

- (1) A: 納豆はお好きですか。／ Do you like nattoo (fermented soybeans)?
B: 食べないでもないですが、あまり好きじゃありません。／ It's not that I avoid eating it, but I don't like it very much.
- (2) A: ねえ、行きましょうよ。／ Come on, let's go.
B: そんなに言うなら行かないでもないけど。／ If you're going to insist, I guess I might go.
- (3) 自分にも悪い点があったことは認めないでもない。／ I admit that I was wrong too, in some respects.
- (4) 考えてみれば、彼の意見ももっともだとう気がしないでもない。／ When I think about it, I can't say that his opinion was completely without reason.

ないでもないと is used with the negative form of a verb and means that a certain action or perception is to some extent possible. When used with verbs of thought or perception, such as 言う (say), 考える (think/consider), 思う (think), 認める (acknowledge), 感じる (feel), and 気がする (have the

sense that), it means "to somehow have a feeling (that)."

② Nがないでもない

- (1) 時には一人になりたいと思うことがないでもない。／ I sometimes want to be alone.
- (2) 娘は、見合いで結婚するつもりがないでもないらしい。／ It seems that my daughter is not completely against the idea of an arranged marriage.
- (3) 海外旅行をしたい気もないではないが、なかなかその時間がとれない。／ It's not that I don't want to go abroad, but I just can't seem to find the time for it.

Used mainly with nouns that refer to intentions or feelings. Means it would not be true to say that a person has no such intentions/feelings at all. When preceded by N + も, this expression can take the form Nもないではない, as in (3).

【ないでもよい】

[V-ないで(も)よい]

- (1) この欄には何も書かないでもよい。／ You don't need to write anything in this column.
- (2) 明日は来ないでいいですか。／ Is it OK if I don't come tomorrow?
- (3) そんなことは言わないでもいいじゃありませんか。／ Isn't something like that better left unsaid?

Means "need not do X" and functions in much the same way as V-なくともいい. Can also be used in the form ないでいい, without も. In spoken language, なくともいい is used more often than ないでもよい. -ずっとよい is also used (e.g. 行かずともよい "you don't need to go"), but this sounds old-fashioned.

【ないと】

[N / Na でないと]

【A-くないと】

[V-ないと]

① ...ないと+マイナス評価の内容

- (1) 急がないと遅刻するよ。／ Hurry up, or you'll be late.
- (2) 勉強しないと怒られます。／ If I don't study, they get angry at me.
- (3) 注意しないと病気になるぞ。／ If you aren't careful, you'll get sick, you know.

- (5) 早く来てくれないと困るよ。／ I'm going to have a problem if you don't come soon.

When ないと is combined with an expression in sentence-final position that conveys a negative evaluation, such as 遅刻する (be late) or むずかしい (be difficult), it means that something unfavorable will happen if a certain situation or state of affairs is not realized. Often used when the speaker wants to urge, encourage, or advise the listener to do the action expressed in the ...ないと clause.

② ...ないと...ない

- (1) 平均 70 点以上でないと合格できない。／ You can't pass without an average score of 70 or above.
- (2) 世の中の動きに敏感でないとすぐれた政治家にはなれない。／ Unless you are sensitive to changes in society, you cannot be a great politician.
- (3) 背が高くないとファッションモデルにはなれない。／ You can't be a fashion model unless you're tall.
- (4) 食べないと大きくなれないよ。／ You won't grow up to be big and strong if you don't eat.

- (5) 早く出ないと間に合いませんよ。／Hurry up and go, or you won't make it.
- (6) 気温が高くないとうまく発酵しない。／It doesn't ferment well if the temperature isn't high enough.

Means that if a certain situation or state of affairs is not realized, another situation or state of affairs will not be realized either. It is also possible to say なくては...ない or なければ...ない, but ないと...ない sounds more colloquial.

③ ...ないと いけない／だめだ

- (1) 風邪を防ぐには十分な休養を取らないといけません。／To avoid catching a cold, you should get plenty of rest.
- (2) レッスンを休むときは、絶対連絡しないといけないよ。／You must let them know when you aren't coming to class.
- (3) 映画はまずおもしろくないといけない。ほかの点は二の次だ。／Above all, a film must be interesting. Everything else is secondary.
- (4) こういう仕事は若い人でないとだめだ。山田君にやってもらおう。／This kind of job has to be done by someone young. Let's get Yamada-kun to do it.

Means that something is necessary, essential, or obligatory. As shown in the example below, the second half of the clause (いけない or だめだ) can be omitted.

- (例) 車はやっぱり頑丈でないとね。／At any rate, a car should be solidly built.

なくてはいけない and なければいけない can also be used, but ないといけない and だめだ sound more colloquial. It is also possible to say なくてはならない and なければならない, but there is no such form as ないとならない.

- (×) 早く行かないとならない。／It'll be that I must go soon.
- (○) 早く行かなければならない。／I must go soon.

→【なければ】②

【ないといい】

[N / Na でないといい]

[A-くないといい]

[V-ないといい]

- (1) あそこの奥さん、もうちょっとおしゃべりでないといいんだけど。／If only his wife wouldn't talk quite so much.
- (2) 新しく配置される部局の仕事、あまり大変でないといいのだが。／I hope the job in the department I've been newly assigned to won't be too hard.
- (3) これほど毎日忙しくないといいのだが。／I wish I weren't so busy every day.
- (4) この世に試験なんかないといいのになあ。／I wish there were no such thing as exams in this world.
- (5) 雨にならないといいが。／I hope it doesn't rain.

Combines with the negative form of a predicate and expresses the speaker's hope or wish that a situation will not come about. Usually used when a situation or event has already happened, or when there is a risk or fear that it will happen. It is more natural to use softeners such as いいのに/が/けれど after this expression than it is to use it at the end of a sentence. It is also possible to say なければいい。

【ないともかぎらない】

- (1) 今日は父の命日だから、誰かが突然訪ねてこないともかぎらない。／Today is the anniversary of my father's death, so there's no guarantee there won't be anyone stopping by unannounced.
- (2) 鍵を直しておかないと、また泥棒に入られないともかぎらない。／There is still a possibility that our house will be broken into again, unless we fix the lock.
- (3) 間違えないとも限らないので、もう一度確認した方がいい。／You should check

it one more time, because you can never be sure you haven't made a mistake.

- (4) 事故じゃないとも限らないし、ちょっと電話を入れてみた方がいいかもしれない。
It might well have been an accident, so maybe you should try to give them a call.

Means that something is not 100% certain. Often used to say that the listener should not complacently assume that nothing will happen but be prepared to take some kind of countermeasure. Usually attaches to negative-form expressions. However, いつ死ぬともかぎらない (below) is an exception. This is an idiomatic usage that takes an affirmative expression and means "no one knows when s/he is going to die."

- (例) 人間いつ死ぬともかぎらないのだから、やりたいことはやりたい時にやった方がいい。／ Since we don't know when we're going to die, we should do whatever we want, whenever we want.

【ないまでも】

[V-ないまでも]

- (1) 毎日とは言わないまでも、週に2、3度は掃除をしようと思う。／ I'm not saying every day, but I'd like to do the cleaning at least two or three times a week.
- (2) 絶対とは言えないまでも、成功する確率はかなり高いと思います。／ Even though I cannot say it is definite, I think there is a fairly high probability that it will succeed.
- (3) 予習はしないまでも、せめて授業には出て来なさい。／ Even if you haven't prepared for it, you should at least come to class.
- (4) 授業を休むのなら直接教師に連絡しないまでも友達に伝言を頼むか何かすべきだと思う。／ If you're going to be absent from class, even if you can't contact the teacher directly, you should at least ask a friend to give her a message or something.

Used with the negative form of a verb, ないまでも means "such a great extent is not necessarily expected, but at least this lesser extent is expected." The first clause presents a situation or state of affairs of greater extent in terms of quantity or importance, followed by one of lesser extent in the second clause. As shown in (1) and (2) above, this expression is often used in the forms ...とは言わない／言えないまでも, in which case it means "one won't/can't ask that much, but at least this much is expected." Expressions of obligation, such as すべきだ and ...た方がよい, or expressions of intention, command, or desire are used at the end of the sentence. V-ぬまでも conveys the same meaning but sounds more literary and formal.

【ないものか】

[V-ないもの(だろう)か]

[V-れないもの(だろう)か]

- (1) この混雑は何んかならないものか。／ Can't anything be done about this congestion?
- (2) この橋が早く完成しないものか。／ If only they would finish this bridge soon.
- (3) この状況をどうにかして打開できないものか。／ I wish there were some way out of this predicament!
- (4) 私の力でこの人たちを助けてあげられないものだろうか。／ Isn't there some way that I could help these people?

Used with the negative form of a verb or the negative potential form V-れない, ないものか expresses the speaker's strong hope that an action or change s/he wants will somehow be realized. This expression is often used with respect to situations that are difficult to realize. As shown in (4), it sometimes takes the form ないものだろうか.

【なお】

① なお(degree)

- (1) あなたが来てくれればなお都合がよい。／ If you could come, it would be even better.

- (2) 薬を飲んだのに、病状はなお悪化した。
／ Even though I took the medicine, my condition kept getting worse.
- (3) 祖父は老いてもなお精力的に仕事を続いている。／ Even though my grandfather is getting old, he is still working energetically.
- (4) 退院するまでには、なお1週間ぐらい必要だ。／ You still need another week before you can be released from the hospital.
- (5) 反対されるとなおやってみたくなる。／ The more they oppose me, the more I want to do it.

Means that one thing has a comparatively higher degree of something than another, in which case it is similar to 一層 (all the more), もっと (further), さらに (still more), and そのうえ (on top of that). In other contexts, it means that the same situation continues as before, in which case it is similar to まだ (still/yet), 相変わらず (as usual), and 今もなお (still). When the first and second clauses contrast in meaning, as in (5), the meaning of なお is close to that of かえって (instead/all the more).

② なお〈provisional clause〉

- (1) 入学希望者は期日までに、入学金を納入してください。なお、いったん納入された入学金は、いかなる場合にもお返しきできませんので、ご了承ください。／ Prospective students should pay the enrollment fee by the due date. Also, please note that once the enrollment fee has been paid, it is not refundable under any circumstances.
- (2) 毎月の第三水曜日を定例会議の日とします。なお、詳しい時間などは、1週間前までに文書でお知らせすることになります。／ The day for the regular meeting will be the third Wednesday of every month. Note that further details, including the time, will be communicated in writing no

- later than one week in advance.
- (3) 参加希望者は葉書で申し込んでください。なお、希望者多数の場合は、先着順とさせていただきます。／ Applicants are requested to register by postcard. Please also note that if the number of applicants exceeds the limit, selection will be made on a first-come-first-served basis.
- (4) 明日は、2、3年生の授業は休講になります。なお、4年生のみが対象の授業は、通常どおり行いますので注意してください。／ Classes for second- and third-year students will be canceled tomorrow. However, please be aware that classes for fourth-year students will be held as usual.

Used to add a proviso, supplementary explanation, exception, or special case to a topic that has just been concluded, or to present a new topic that is not directly related to the previous sentence. As illustrated in (4), when the sentence after なお adds information that is not consistent with the expectation created by the previous sentence, the meaning of なお is similar to that of ただし (but/however). なお is not used often in spoken Japanese. However, it is used often in posted notices, written announcements, explanatory notes in academic papers, and other written contexts.

【なおす】

① R-なおす〈volitional〉

- (1) 出版の際に論文の一部を書き直した。／ I rewrote part of my thesis when I published it.
- (2) 俳優がセリフを間違えたため、同じ場面を3度も撮り直さなければならなかつた。／ Since the actor bungled his lines, we had to re-shoot the same scene three times over.
- (3) 答案をもう一度見直してください。／ Please check your answers one more time.
- (4) 顔を洗って出直して来い。／ Don't come

back till you've sorted yourself out. (lit.
“Wash your face before you come back.”)

- (5) 一度はこの大学をやめようと思ったが、
おもなおも思つて卒業まで頑張ることにした。

／ I was once tempted to leave this university, but then I thought better of it and decided to hang on till graduation.

When attached to the stem of a verb expressing an intentional action, なおす means to repeat an action that was done before. It is often used when the result of the previous action is considered unfavorable and the action is repeated in order to correct the original result. Except for a few cases such as 出る (leave/go out), なおす usually attaches to transitive verbs. Other examples include 言い直す (correct oneself/restate), 考え直す (think over/reconsider), し直す (do over again/try again), 立て直す (restore/rearrange), 建て直す (rebuild), 作り直す (reconstruct/remake), 練り直す (rework/revise), 飲み直す (go somewhere else for another round of drinks), 焼き直す (reheat/rework), and やり直す (do again/start over again).

② R- なおす (non-volitional)

- (1) 今年になって景気が持ち直した。／ The economy has rebounded since the beginning of this year.
- (2) 病人はだいぶ持ち直した。／ The patient has recovered considerably.
- (3) 勇敢な態度を見て彼に惚れ直した。／ I fell in love with him all over again when I saw his courageous attitude.
- (4) 部長のことを見直した。／ I have come to think better of our department head.

When なおす is attached to the stem of a non-volitional verb, which refers to a situation or state of affairs that does not involve any intentional action on the part of a person, it expresses the meaning of a spontaneous change for the better. For example, 持ち直す means that the economy (1) or a patient's condition (2) improves. (3) and (4) mean that someone has newly recognized someone else's merits and reassessed his/her overall value.

A limited range of verbs can combine with なおす for this usage, including those in the examples above and also 気を取り直す (take heart/pull oneself together). This usage of なおす is different from Usage 1 (above) in that there is no intention on the part of the subject to amend or redo something.

【なか】

① Nのなか

- (1) 部屋の中にはだれがいるの。／ Who's in the room?
- (2) 他人の心の中は外からは見えない。／ You can't look inside somebody else's mind.
- (3) 箱の中からバネ仕掛けの人形が飛び出した。／ A spring-loaded doll popped out of the box.

Refers to the inside of certain spatial boundaries.

② Nのなかで

- (1) 3人兄弟の中では、次男が一番優秀だ。／ Of the three brothers, the second one is the most talented.
- (2) ワインとビールと日本酒の中で、ワインが一番好きだ。／ Out of wine, beer and Japanese sake, I like wine the best.
- (3) この中で一番背が高い人はだれですか。／ Who is the tallest person of all of those here?

Indicates the boundaries of comparison for three or more items. In some cases, as in (2) above, specific candidates for choice are listed using the pattern NとNとNの中で.

③ ...なかを

[Nのなかを]

[A-いなかを]

[V-るなかを]

- (1) 激しい雨の中をさまよった。／ I roamed about in the heavy rain.

- (2) 雪が降る中を5時間もさまよい続けた。
／I wandered around for five hours in the falling snow.
- (3) お忙しい中をご苦労様です。／Thank you for taking the time to help out.
- (4) 本日はお足元の悪い中をわざわざお出でいただき、まことに有り難うござります。／We really appreciate your coming all the way here today in such terrible weather.

The pattern ...中を expresses the situation or circumstances in which the action subsequently referred to takes place. The second half of the sentence usually contains a verb of motion, such as 歩く (walk), さまよう (wander/roam) or 来る (come). Since なかを originally means "to move from one place to another," as in the examples above, this usage is connected to the notion of "spatial boundaries" in Usage 1. Example (3) is interpreted to mean お忙しい中を(お出でくださり) (... (for coming) during such a busy time), but the phrase お出でくださり (for coming) is omitted. In (3) and (4), なかを can be replaced by ところ.

【ながす】

[R-ながす]

- (1) このレポートは、何の調査もせずに、思いついたことを適当に書き流しているだけだ。／In this paper I'm just writing down anything that comes to mind, without doing any research.
- (2) 彼が着物を軽く着流した姿は、なかなか粹である。／He cuts a fine figure, wearing his *kimono* so casually.
- (3) ざっと読み流しただけですが、なかなか面白い本ですよ。／I just skimmed through it quickly, but it was really quite an interesting book.
- (4) 彼のいうことは聞き流しておいてください。／Please pay no attention to what he says.

- (5) 老政治家は検察の執拗な追及も軽く受け流している。／The old politician is effortlessly brushing off the prosecutor's tenacious cross-examination.

When ながす is attached to a verb stem, it means that the action referred to by the verb is performed in an easy and relaxed manner, without a great deal of effort. If used to indicate a response to another person's action, ながす means to dodge or evade that action without giving it serious consideration. 着流す in (2) means to wear a *kimono* casually, without putting on a *hakama* (a long pleated skirt worn over a *kimono*). It is often used in the noun form 着流し (casually dressed/in *kimono* with no *hakama*).

【ながら】

[R-ながら<simultaneity>]

- (1) 音楽を聴きながら勉強や仕事をするひとのことを「ながら族」という。／People who listen to music while studying or working are called *nagarazoku*.
- (2) その辺でお茶でも飲みながら話しましょう。／Let's talk somewhere over a cup of tea or something.
- (3) 母は鼻歌を歌いながら夕飯の用意をしている。／My mother is humming a song while preparing dinner.
- (4) よそ見をしながら運転するのは危険です。／It's dangerous to take your eyes off the road while driving.
- (5) 飛行機は黒煙をあげながら真っ逆さまに墜落して行った。／The airplane was trailing thick black smoke as it went into a nosedive.
- (6) 液体はぶくぶくとガスを発生させながら発酵を続いている。／The liquid is generating bubbles of gas as it continues to ferment.

Links two verbs in a sentence and expresses that two actions are proceeding concurrently. In this

usage, the second verb presents the main action of the sentence, and the first verb (in the *nagara* clause) presents a secondary action that depicts the circumstances in which the main action is carried out. For instance, in (1), “studying or working” is the main action, and it is accompanied by the action of “listening to music.” In the same way, the incorrect *ながら* sentence below means that the action of getting on the train and the action of reading the book were carried out simultaneously. It cannot be interpreted to mean that the subject was reading a book on the train.

- (×) 電車に乗りながら本を読んだ。／ I read a book while I was boarding the train.
- (○) 電車に乗って本を読んだ。／ I got on the train and read a book.

Both of the verbs must have the same subject (see incorrect example below), and in most cases they refer to the intentional actions of a person. However, as illustrated in (5) and (6), in some cases the subject may be an airplane, a natural phenomenon, or something else capable of moving or changing by virtue of its own power.

- (×) 私は本を読みながら、彼はウイスキーを飲んだ。／ While I was reading a book, he drank whiskey.

② ...ながら(appearance, manner)

[Nながら]

[R-ながら]

- (1) いつもながら見事なお手並みですね。／ Your work is marvelous, as always.
- (2) この清酒メーカーは、昔ながらの製法で日本酒をつくっている。／ This refined *sake* maker uses the traditional method of manufacture.
- (3) 被害者は涙ながらに事件の状況を語った。／ In tears, the victim related the circumstances of the incident.
- (4) 生まれながらのすぐれた才能に恵まれている。／ She is gifted with a great natural talent.
- (5) この子は生まれながらにして優れた音楽的感性を備えている。／ This child

was born with exceptional musical sensitivity.

When attached to a noun or the stem of some verbs, *ながら* expresses a state or situation that continues as it is without change. For instance, *生まれながら* and *昔ながら* mean “just as it is, ever since a certain time,” and these expressions are similar to *生まれつき* (by nature) and *昔のまま* (as it was before), respectively. *涙ながらに* means “in a tearful state” and can be replaced by *涙を流して* (weeping). Expressions that exemplify this usage are relatively fixed, and only a small number of words, including those in the examples above, can precede *ながら*.

③ ...ながら(も/に)(adversative connective)

[N／Na ながら]

[A-いながら]

[R-ながら]

- (1) このバイクは小型ながら馬力がある。／ In spite of its small size, this motorbike has impressive horsepower.
- (2) 敵ながらあっぱれな態度であった。／ Although he was my foe, I must admit he behaved admirably.
- (3) 子供ながらになかなかしっかりとした挨拶であった。／ That was quite a good speech, for a child.
- (4) 残念ながら、結婚式には出席できませんでした。／ Unfortunately, I will not be able to attend the wedding.
- (5) 狹いながらもようやく自分の持ち家を手に入れることができた。／ Cramped as it was, I was finally able to get my own home.
- (6) 何もかも知っているながら教えてくれない。／ Even though he knows everything, he won't tell me.

parents' neighborhood, but I ended up coming home without dropping by.

(8) 学生の身分でありながら、高級車で通学している。／ Even though she's a student, she travels to school in a luxury car.

(9) 紹々ながらも商売を続けている。／ We're continuing to run our business, although we're just scraping by.

(10) ゆっくりながらも作業は少しづつ進んでいる。／ Although it's going very slowly, the work is progressing little by little.

When ながら is attached to a noun, an *i*- or *na*-adjective, a verb stem, or an adverb (without と or に, in the case of adverbs that usually take these particles), it expresses the meaning of contradiction or opposition, similar to ...のに or ...けれども／が。It can also be combined with the particle も and used in the form ながらも. ながらに, as in (3), sounds old-fashioned and is not normally used in colloquial speech. In this so-called "adversative" usage, ながら is usually preceded by a stative predicate. On the other hand, in Usage 1, which presents "parallel/simultaneous" actions, ながら must be preceded and followed by action verbs.

④ ...とはいいながら→[とはいいながら]

【なきや】

(1) 早く行かなきや間にあわない。／ I've got to hurry up or I won't make it in time.

(5) 愛なくして何の人生か。／ What is life without love?

Means "if N did not exist." Expresses that, without N, something is difficult to do. Depending on the context, the particle は may be omitted. (5) is an idiomatic expression that means "if there is no love, then what is the meaning of life?" なくしては is a formal, written expression, and in spoken Japanese Nがなかったら is used instead.

【なくちゃ】

[A-くなくちゃ]

[V-なくちゃ]

(1) 勉強しななくちゃ怒られる。／ I'll really get it if I don't study.

(2) 早く帰らなくちゃ。／ I've got to go home right away.

- (5) ちっとも雨が降らなくて困っている。／ We are in a bad way because it hasn't rained a bit.
- (6) あいつが来なくて助かった。／ I'm glad that guy didn't come.

Means "since such-and-such did not happen/is not the case." The clause that ends with なくて indicates the cause or reason for the situation or event described in the subsequent clause. The subsequent clause includes an expression describing the speaker's emotion or evaluation, such as 安心する (be relieved), 困る (be in trouble/be at a loss), or 助かる (be saved some trouble).

However, なくて essentially indicates that the events or situations in the first and second clauses are realized simultaneously. Its main function is not to specify a cause or reason. Because of this, it often sounds unnatural if なくて is replaced by ないので or ないと (see examples above).

【なくては】

[N / Na でなくては]

[A-くなくては]

[V-なくては]

- (1) 我慢強い人でなくては彼女と付き合うのは難しい。／ Unless you have the patience of a saint, it's hard to get along with her.

Used with the negative form of a verb or a negative expression such as 無理だ (impossible) or 難しい (difficult) at the end of the sentence. Has the meaning "unless X, Y is impossible." Used when the speaker wants to say that realization of the situation or event expressed in the first clause is desirable or necessary. In many cases, なくて is can be replaced by なかったら, なければ and/or ないと. In casual spoken language, N / Naじゃなくちゃ and A-くなくちゃ / V-なくちゃ are used instead.

【なくてはいけない】

- (5) **かぞく** **はたら**
**家族のために働くなくてはならない。／ I
have to work for the sake of my family.**

This expression takes the forms V-なくてはいけない／ならない／だめだ and means that generally it is "obligatory" or "necessary" to do a certain action or to be a certain way. In spoken Japanese, なくては may be contracted to なく(つ)ちゃ and the latter part いけない／ならない／だめだ may be omitted, as below.

(例) もっとまじめに勉強しなくちゃだめだよ。
／ You've got to study harder.

(例) もう行かなくちゃ。／ I've gotta go now.

Regarding the difference between なくてはいけない and なくてはならない, see なければ (Usage 2).

- (4) 仕事が忙しい場合は、無理して来なくてもいいですよ。／ If you're busy at work, please don't feel obligated to come.

expression, may be used instead.

Means "it is not necessary to do X." This is a written expression that means the same as なくてもよい／いい, and in modern Japanese it is seldom used, except in formal situations. When combined with the verb する, it may also be used in the form せずともよい.

【なくもない】

Attaches to a verb or an adjective and means that a certain thing is not entirely unfeasible, but sometimes exists or arises. It is also possible to say ないこともない and ないでもない.

Means that a certain action or awareness may sometimes be realized. When used with verbs of thinking or perception, such as 言う (say), 考える (think), 思う (think/believe), 認める (acknowledge), 感じる (feel), or 気がする (have the sense that), it means that for some reason the speaker has a certain kind of feeling.

② Nがなくもない

- (2) あの人を恨む気持ちがなくもない。／ I can't say that I hold no grudge against her.

B: その気もなくはないようですが、今のところは特にそんな様子はありませんね。／ I wouldn't say that he's not interested at all, but at the moment there aren't any indications that anything's happening.

Used mainly with nouns expressing some kind of intention or feeling. Means it is not the case that the person in subject position has no such intention or feeling at all. When なくもない is preceded by N + も, the form Nもなくはない may be used instead, as in (3).

→【なれば】

【なれば】

[N / Na でなれば]

[A-くなれば]

なければ is used in combination with the negative form of a verb or a negative expression such as 無理だ (impossible/unreasonable) or むずかしい (difficult) at the end of the sentence. It means that when one situation or event is not realized, another situation or event is not realized either. It is also possible to say なくて...ない.

(例) もう 10 時だから、そろそろ帰らなければ。／ It's already ten o'clock, so I should head home pretty soon.

なければいけない can sometimes be replaced by なくてはいけない, なくてはならない, or なくてはだめだ. However, there are some differences between these expressions, as explained below.

なければならない and なくてはならない mean that it is obligatory or necessary to be or do something, in light of conventional social wisdom or the nature of the thing in question. These expressions are usually used to state widely-held views that all people have the obligation or need to do a certain thing. On the other hand, なければいけない and なくてはいけない are often used when particular circumstances oblige or necessitate a certain action. なければだめだ and なくてはだめだ are similar to なければいけない and なくてはいけない, but the first two are more colloquial in tone.

When なければ is replaced by ねば, and ならない by ならぬ, the result is a more formal expression usually used in written Japanese.

(例) 人生には我慢せねばならぬこともある。／ In life, there are some things that you must endure.

Also, ならん and いかん are sometimes used instead of ならない and いけない, respectively, but the former are colloquial forms that sound rather old-fashioned.

However, なさい can also be used between people with close relationships, such as family or friends, as shown in (3) and (4). (3) is an expression of prohibition used to admonish the addressee regarding his words and actions, and (4) is a strong suggestion. なさい may also be used in the instructions for exam questions, as in (5).

なさんな can only be used between people with a close relationship. Older people use this expression, but it is seldom used by young people, who usually prefer expressions like 風邪をひくなよ (try not to catch a cold!) or 心配するなよ (don't worry!). - (2) かばんの中にはなにも入っていないなかつた。／ There was nothing in the bag.
- (3) そのことについて、私は何も知りませんでした。／ I didn't know anything about that at all.
- (4) 作業は順調に進み、心配していたようなことは何も起きました。／ The work went smoothly, and none of the things we had worried about ever happened.

Followed by an expression of negation or denial and means “not...at all” or “nothing...at all.” Used to talk about things, events, and animals other than human beings. For people, the pattern だれも...ない is used (no one...at all), and for places, it becomes どこも...ない (nowhere...at all).

b なにも...ない

- (1) なにもみんなの前でそんなに恥ずかしい話をしなくてもいいでしょう。／ You don't have to tell such an embarrassing story in front of all of them!
- (2) 団体旅行で添乗員もいるのだから、なにもそんなに心配する必要はありませんよ。／ It's a group tour and there's a guide, so there's no need to be so concerned.
- (3) 彼らも悪気があって言ったことじゃないんだから、何もそんなに怒ることはないと。

じゃないですか。／ They didn't mean to offend you by what they said, so there's no reason for you to get so angry.

- (4) ちょっと注意されただけなのに、何もそんなに気にすることはないですよ。／ There's no reason for you to be so upset over just one little piece of advice.

- (6) 何も試合直前になって延期したいと言ってくることはないだろうに。／ I can't see any reason for them to ask us to postpone the game just before it starts.

When なにも is followed by expressions such as (ここまで)...しなくてもいい and (そう)...する必要がない, it conveys the feeling “even though there is no particular need to do X.” This pattern is often used to chide or criticize the addressee when s/he is overdoing something or taking it too far.

c なにも...わけではない

- (1) 私はなにも、あなたがやっていることを非難しているわけではないんです。ただちょっと注意したほうがいいと思って忠告しているんじゃないですか。／ I don't mean at all to criticize what you're doing. I'm just giving you a piece of advice because I think you should be a little more careful.

- (2) 私は何もこの仕事がやりたくないわけではないのです。今は他の仕事があるので、少し時間がほしいとお願ひしているだけなのです。／ It's not that I don't want to do this job. I'm just asking you to give me a little more time, because right now I have other work to do.

- (3) あなたは私が邪魔をしていると思ってい
るようですが、何も私は邪魔をしているわけではないのです。手順を踏んで慎重に
話を進めようとしているだけなんです。／

You seem to think that I'm trying to stand in your way, but that is not my intention at all. I just want to move the discussion forward carefully, one step at a time.

- (4) A: お母さんは私のことが嫌いなんですよ。／ I know you don't like me, Mom.
B: 何を言ってるの。私は何もあなたが嫌いで反対しているわけではないよ。
あなたのことを気にかけているから、反対しているんじゃないの。／ What are you talking about? It's not because I don't like you that I'm against what you're doing. Don't you know I'm against it because I'm concerned about you?

The speaker uses なにも...わけではない to refute the addressee's perception of the speaker's behavior. In some cases, the speaker responds to something the addressee has just said, as in (4). However, in most cases the speaker uses なにも...わけではない to refute an inference s/he has made about what the addressee is thinking.

b ...もなにも

[A／V もなにも]

- (1) A: 高田さん、あなた必ずやるって約束してくれたじゃないですか。／ Tada-san, didn't you promise that you would be sure to do this?

B: 驚いたもなにも、彼のことは死んだと思っていたんですから。／ I was more than surprised, because I thought he had died.

The speaker uses ...もなにも in response to something the addressee has just said, to deny strongly or to emphasize that it involves a greater degree of something than the addressee thinks it does. Usually used in spoken Japanese.

③ なにもかも

- (1) 嫌なことは何もかも忘れて楽しみましょう。／ Let's forget about all the bad things and enjoy ourselves.
- (2) 何もかも、あなたの言うとおりにします。／ I'll do whatever you say, about everything.

Means "something is the best of all comparable things." When used to modify a noun, this expression takes the form なによりのN, as shown in (3). The form なによりだ is usually used when the speaker is making a positive evaluation of a situation or event concerning the addressee. It is not used for events concerning the speaker him/herself.

(×) 私が東大に入学できて何よりです。／ I'm so glad I got into Tokyo University.

The form なによりの..., however, can be used not only with regard to the addressee or a third party but also with regard to the speaker him/herself.

【なまじ】

- (1) なまじ 急いでタクシーに乗ったために、渋滞に巻き込まれてかえって遅刻してしまった。／ Because I was in a rush and jumped into a taxi, I ended up getting caught in a traffic jam and arriving late.

- (6) 彼女の前ではなまじなことは言わない方がいい。彼女はこの問題を徹底的に調べているらしいから、我々もそのつもりで準備しなければ負けてしまう。／ We shouldn't say anything half-baked in front of her. It sounds like she's been investigating this problem thoroughly, so if we don't prepare with that in mind, we'll be outplayed.

Expresses a situation in which something positive ends inconclusively or only halfway, without displaying its full value. Used to say that something with an intrinsically positive value actually results in a negative outcome.

When なまじ modifies a noun, it is used in the patterns なまじのN and なまじなN, as in (5) and (6). In these cases, なまじ can be replaced by 中途半端な (halfway, unfinished). For instance, (5) means that knowledge, which is usually a good thing to have, instead becomes a hindrance because it is superficial.

【なら】

When なら is attached directly to a noun, it expresses the topic of a sentence. The form ならば may also be used.

① Nなら

- (1) A: めがねはどこかな。／ I wonder where my glasses are.
B: めがねならタンスの上に置いてありましたよ。／ Your glasses? They were on top of the dresser.
- (2) A: アルバイトを雇うには金がかかりますよ。／ Hiring a part-time worker will be expensive.

B: お金のことなら心配しなくていいですよ。何とかなりますから。／ If it's a matter of money, you don't have to worry. We can manage.

- (3) A: 佐藤さん見ませんでしたか。／ Have you seen Sato-san?

B: 佐藤さんなら、図書館にいましたよ。／ Sato-san? He was in the library.

- (4) 時間ならば十分ありますから、ご心配なく。／ As for time, we have plenty of it, so don't worry.

- (5) 例のことならもう社長に伝えてあります。／ If you mean that thing we talked about, I've already informed the company president.

なら is used when the speaker takes something that the addressee has said, something mentioned during discussion of the previous topic, or something that can be predicted from the current situation, makes it a new topic, and then continues talking about it. Often used when the speaker adopts as a topic something that was previously brought up by the addressee.

なら can often be replaced by the topic marker は. However, なら essentially has the hypothetical meaning "if N were the topic," while は does not have such meaning. Therefore, when なら is replaced by は, the meaning of the sentence changes slightly. なら is synonymous with Nだたら, and these two expressions are interchangeable.

② NならNだ

- (1) 山ならやっぱり富士山だ。／ When it comes to mountains, naturally it has to be *Fuji-san* (Mt. Fuji).

- (2) ストレス解消法ならゴルフに限る。／ If you're looking for a way to get rid of stress, nothing beats golf.

- (3) 酒ならなんといってもこの地酒が一番だ。／ When it comes to *sake*, the locally brewed *sake* here is unquestionably the

best.

- (4) カキ料理なら広島が本場だ。／ If you want good oyster cuisine, Hiroshima is the place to go.

Nなら can be followed by Nだ, or by expressions such as Nに限る (there's nothing better than N), Nが一番だ (N is the best), and Nがいい (N is good). Nなら is used to define the range of the topic and then describe the most highly evaluated item within that range. In this usage, Nなら can be replaced by Nは without any great change in meaning.

③ ... (助詞)なら

- (1) のの人となら結婚してもいい。／ I wouldn't mind getting married, if it were to him.

- (2) フランス語はダメですが、英語でなら会話ができます。／ I'm no good at French, but in English, I can carry on a conversation.

- (3) あと一人だけなら入場できます。／ Only one more person can get in.

- (4) 足の具合はいかがですか。／ How is your leg?

B: ゆっくりとなら歩けるようになりますた。／ If I go slowly, I can walk now.

- (5) 仕事の後なら時間があります。／ If it's after work, I'll have time.

When なら follows a noun, adverb, or noun/participle combination, it expresses the meaning that "Y doesn't hold in other cases, but in the case of X, Y can be realized." The Y clause that follows なら usually represents something desirable, and this pattern is used when the speaker actively selects an X that makes Y possible. This usage of なら is similar to the contrastive use of は. However, なら can be combined with interrogative words, while は cannot.

- (○) 何時なら都合がいいですか。／ What time would be convenient for you?

- (○) 誰となら結婚してもいいですか。／ Who

would it have to be, in order for you to consider getting married?

- (×) 何時は都合がいいですか。／ What is the time convenient for you?
- (×) 誰とは結婚してもいいですか。／ I wouldn't mind marrying who.

【なら₂】

[N / Na なら]

[N / Na だった(の)なら]

[A-い / A-かった (の)なら]

[V-る / V-た (の)なら]

When combined with the dictionary form or the *ta*-form of a predicate, なら expresses the meaning "if the actual situation or circumstances were like that." The forms のならば, のなら, and ならば are also used. In spoken Japanese, の often becomes ん.

Although there is often no clear difference in meaning related to the presence or absence of の, のなら tends to be used in response to a statement on the part of the addressee, or a concrete situation, and conveys the meaning "if you say so," "if that is true," or "if that is the actual situation." On the other hand, when の is not used, なら tends to convey the meaning of "generally, in such cases" or "if/when someone does so." When (の)なら is combined with a noun or a *na*-adjective, の is often omitted. When (の)なら is combined with a verb or an *i*-adjective, it is synonymous with のだったら, and these two are interchangeable. However, の in のだったら cannot be omitted.

- (×) 知っているだったら教えてほしい。／ If you happen know, I want you to tell me.
- (○) 知っている(の)なら教えてほしい。／ If you happen to know, I want you to tell me.
知っているのだったら教えてほしい。／ If you happen to know, I want you to tell me.

① ... (の)なら(hypothetical condition)

- (1) A: 風邪をひいてしまいました。／ Unfortunately, I've caught a cold...
B: 風邪なら早く帰って休んだほうがいいよ。／ If you've got a cold, you should go home early and rest.

(2) 彼女のことがそんなに嫌いなら別れたらいい。／ If you dislike her so much, you should break up with her.

- (3) A: 頭が痛むんです。／ I have a splitting headache.
B: そんなに痛い(の)なら早く帰ったほうがいいですよ。／ If it hurts that much, you should go home early.

(4) 行きたくない(の)ならやめておいたらどうですか。／ If you don't want to go, why don't you just say no?

(5) 真相を知っている(の)なら私は教えてほしい。／ If you know the truth, I'd like you to tell me.

(6) 郵便局に行く(の)なら、この手紙を出しててくれますか。／ If you're going to the post office, could you mail this letter for me?

(7) あなたがそんなに反対する(の)ならあきらめます。／ If you're so against it, I'll give up on it.

- (8) A: ちょっと買い物に行ってくる。／ I'm off to do a little shopping.
B: 買い物に行く(の)ならついでにおしょうゆを買ってきてちょうだい。／ If you're going shopping, please pick up some soy sauce while you're out.

(9) A: 沖縄ではもう梅雨に入ったそうですよ。／ I hear the rainy season in Okinawa has already started.

B: 沖縄で梅雨に入ったのなら、九州の梅雨入りも間近ですね。／ If the rainy season has started in Okinawa, it'll start soon in Kyushu, too.

(10) 二人が昼からこの店で会っていたのなら、二人には午前中のアリバイはないことになる。／ If the two of them were with

each other for (part of) the afternoon in this shop, that means they don't have an alibi for the morning.

When combined with the dictionary form or the *ta*-form of a predicate, (の)なら expresses a hypothetical condition and means "if that is the actual situation" or "if that is true." A speaker uses (の)なら to state his/her own opinion or view, to make a request, or to give advice to the addressee, in light of something the addressee has just said or the situation at hand.

なら cannot be used to refer to things that occur as a matter of course or events that arise naturally with the passage of time. In such cases, expressions like たら, ば, and/or と must be used instead. Also, expressions that merely state a fact cannot be used at the end of a sentence with なら. Expressions indicating a judgment, intention, command, request/demand, suggestion, evaluation, or some other subjective attitude on the part of the speaker must be used.

- (×) 春が来るなら花が咲きます。／ If spring comes, flowers bloom.
- (×) 雨が降るなら道がぬかります。／ If rain falls, the road gets muddy.
- (○) 春が|来たら／来れば／來ると} 花が咲きます。／ When spring comes, flowers bloom.
- (○) 雨が|降ったら／降ると／降れば| 道がぬかります。／ When it rains, the road gets muddy.
- (○) 《午後から雨が降ると聞いて》雨が降る(の)なら、傘を持って行こう。(意志)／《having heard that it will rain in the afternoon》If it's going to rain, I'll take an umbrella. (intention)

たら, ば and と are used when the condition expressed in the first clause happens prior to the second clause and the situation or event in the second clause is realized as a result. On the other hand, なら can be used even when the situation in the second clause is realized first and the situation in the conditional clause follows.

- (例) イタリアに行ったらイタリア語を習いなさい。(イタリアに行ってからイタリアで習う)／ When you go to Italy, study Italian. (= study the language in Italy, after arriving

there)

- (例) イタリアに行くならイタリア語を習いなさい。(イタリアへ行く前に自分の国で習う)／ If you're going to Italy, study Italian. (= study the language in your own country, before going to Italy)

② ... (の)なら<counter-factual>

- (1) 電話をくれるのなら、もう少し早い時間に電話してほしかった。／ If you were going to call me, I wish you had called a little earlier.
- (2) 神戸に来ていたのなら、電話してくれればよかったのに。／ If you were in Kobe, you should have phoned me.
- (3) あいつが来るのならこのパーティには来なかつたんだが。／ If I'd known he was coming, I wouldn't have come to this party.
- (4) 結婚式に出席する(の)なら黒いスーツを買うのだが。／ If I were going to a wedding, I would buy myself a black suit.

When (の)なら is used in the pattern X(の)なら Y, either Y alone or both X and Y may contradict the given facts. In the first case, (の)なら is used when the speaker learns a new fact, X, and the pattern means "if I had known X (= factual), I could have done Y (= counter-factual), but since I didn't know X, I didn't do Y." In the second case, (の)なら means "if X is done (= counter-factual), Y should be done (= counter-factual), but since X is actually not done, Y is not done either." (1)-(3) illustrate the first case, and (4) illustrates the second case. For instance, (2), in which X is factual but Y is not, conveys the sense that when the speaker found out that the addressee had come to Kobe, s/he felt critical or regretful of the fact that the addressee hadn't called him/her (you should have called me...). (4), in which both X and Y are counter-factual, means "if I were going to attend a wedding, I would buy a black suit, but since I'm not actually going to a wedding, I'm not going to buy one."

(の)なら cannot be replaced by たら or ば in (1)-(4), because the meanings of these sentences are

not the same as those of counter-factual conditional sentences with たら or ば。In counter-factual conditionals with たら or ば, X and Y are both counter-factual and X must occur prior to Y. On the other hand, in (1)-(3) only Y is counter-factual, and although both X and Y are counter-factual in (4), if X and Y were both realized in these sentences, the sequential relationship between them would be that X occurs after Y: "buy a black suit and then attend a wedding." Such a relation can only be expressed by なら。Neither たら nor ば can be used instead.

- (例) 先週、神戸に来ていたのなら案内してあげたのに。／If you were in Kobe last week, I could have shown you around. (Means "I didn't know you were in Kobe last week, so I couldn't show you around." X (you were in Kobe last week) is factual, while Y (I could have shown you around) is counter-factual.)
- (例) 先週、神戸に来て|いれば|いたら|案内してあげたのに。／If you had come to Kobe last week, I would have shown you around. (Means "you didn't come to Kobe last week, so I couldn't show you around." Both X and Y are counter-factual.)
- (例) 結婚式に出るなら黒いスーツを買ったのだけど。／If I were going to a wedding, I would have bought a black suit. (Means "I'm not planning to attend a wedding, so I didn't buy a black suit." Both X and Y are counter-factual, and if both were realized, X would follow Y.)
- (例) 黒いスーツを買って|いれば|いたら|結婚式に出たのだが。／If I had bought a black suit, I would have attended the wedding. (Means "I hadn't bought a black suit, so I didn't attend the wedding." Both X and Y are counter-factual, and if both were realized, Y would follow X.)

③ V-る(の)なら...がいい

- (1) 靴を買うならイタリア製がいい。／If you're buying shoes, Italian-made ones are the best.
- (2) 食事をするなら、このレストランがいいよ。／If you're going to eat out, I'd rec-

ommend this restaurant.

- (3) 英語を習うならアメリカかカナダに留学することをすすめたい。／If you want to learn English, I'd suggest studying in the United States or Canada.
- (4) A: 大学を卒業したら留学したいと思つているんだ。／I'm thinking of going abroad to study after I graduate from college.
B: 留学するのならオーストラリアがいいよ。／If you're going to study abroad, I'd recommend Australia.

When (の)なら is followed by expressions such as がいい and をすすめる, its function is to recommend the best way or method of doing something. This pattern is often used in advertising slogans and/or commercials.

When talking about an action in general, rather than a particular person's action, の is usually omitted. The meaning of V-るなら...がいい is similar to the meaning of expressions in which なら and は are used as topic markers, such as Nなら...がいい and Nは...がいい.

- (例) 靴を買うならイタリア製がいい。／If you're buying shoes, Italian-made ones are the best.
- (例) 靴ならイタリア製がいい。／When it comes to shoes, Italian-made ones are the best.
- (例) 靴はイタリア製がいい。／As for shoes, Italian-made ones are the best.

④ V-る(の)なら ...しろ／...するな

- (1) 何事もやるなら最後まで徹底的にやれ。／Whatever you do, follow it through to the very end.
- (2) 女性と付き合うなら真剣に付き合いなさい。／If you're going out with a girl, be serious about it.
- (3) 留学するならいい加減な気持ちではするな。／If you're going to study abroad, don't do it halfway.

- (4) 私のことを笑うなら勝手に笑えといい。
／ If you want to laugh at me, feel free to do so.
- (5) 泣きたいのなら好きなだけ泣けばいい。
／ If you feel like crying, go ahead and cry your heart out.

When (の)なら is preceded and followed by the same verb, its function is to give instructions about how something should be done. (の)なら may be followed by expressions of command or prohibition, as well as expressions of suggestion or recommendation such as すればいい。 (4) and (5) convey the meaning “if you want to do so, go ahead and do as you please.”

When this pattern is used to mean “when something is done in general,”なら is usually not preceded by の. However, when it is used in response to an utterance or intention of a particular person, with the meaning “if you have such an intention” or “if you want to do so,” it may take the form のなら, as shown in (5).

5 ... (の)なら ... で

[Na なら Na で]

[A (の)なら A で]

[V (の)なら V で]

- (1) 嫌なら嫌で、そう言ってくれたらよかったですのに。今となっては遅すぎるよ。／ If you didn't like it, you should have told me so. It's too late now.

- (2) 金がないならないで、人生何とかなるものさ。／ So what if there's no money—life will still turn out all right.

- (3) 会社を辞める(の)なら辞めるで、それからあの人の身の振り方ぐらい考えておくべきだった。／ Before I up and left the company, I should have at least considered what I would do next.

- (4) 遅くなる(の)なら遅くなるで、ちゃんと連絡ぐらいしてくれればいいのに。／ If you knew you'd be late, you could have at least let me know.

- (5) 行かない(の)なら行かないで、ちゃんと断わりの連絡だけはしておいたほうがいい。／ If you're not going, that's fine, but you should at least make sure to send your regrets.

When the same word is repeated before and after (の)なら, the speaker is acknowledging a certain situation to be as it is. S/he then states what kind of action should be taken under such circumstances, or expresses criticism or regret that such an action has not been taken.

6 ... (の)なら ... と

[N なら N (だ) と]

[Na なら Na (だ) と]

[A (の)なら A と]

[V (の)なら V と]

- (1) 欠席なら欠席と前もって知らせておいてください。／ If you're going to be absent, please let me know in advance.

- (6) これからは来ない(の)なら来ないとちゃんと事前に連絡して下さいね。／ From now on, please be sure to contact me in advance when you're not coming.
- (7) 行く(の)なら行く、行かない(の)なら行かないとちゃんとと言ってくれなければ困るじゃないですか。／ Can't you see what trouble you cause for me if you don't tell me whether or not you're coming?

The same word is repeated before and after (の)なら, and ...と is followed by expressions of utterance such as 言う and 連絡する. This pattern expresses the speaker's attitude that the listener or a third person should clearly indicate his/her intentions regarding his/her own actions.

This pattern is usually used to criticize someone else for not expressing his/her intentions clearly, or to advise him/her that s/he should have indicated them clearly. However, it can also be used by the speaker to express his/her regret that s/he didn't make his/her own intentions clear, as shown in (4).

⑦ ... (の)ならべつだが

[N / Na ならべつだが]

[A / V (の)ならべつだが]

(1) そんなに勉強がまらない(の)なら別だ
が、自分の心構えについても反省してみてはどうだろうか。／ It would be a different matter if your studies were really that boring, but how about reflecting on your own attitude for a change?

(2) やめたい(の)なら別だが、もし続けたい
(の)ならもう少し基礎的なところから勉強し直した方がいい。／ If you want to quit, that's fine, but if you intend to continue, you ought to go back to the basics and start studying all over again.

(3) 本気で頑張る気があるのなら別だがいい
加減な気持ちでやっているならやめたほうがいい。／ It's all right if you're serious about doing this, but if you're just fooling around, then you'd better quit.

／ If you really can't stand it, that'd be different, but one idea to consider is hanging in there and staying with the company.

(の)ならべつだが assumes two distinct situations. It is used to introduce one situation as being inapplicable and to state the speaker's opinion concerning the other possible situation. It is often followed by expressions intended to influence the listener, such as criticism, warning, or advice. As shown in (4) and (5), (の)ならべつだが may also take the form ...なら話は別だが.

⑧ ... というのなら

(1) A: 明日はほかに用事があつてお邪魔できないのですが。／ I have something else to do tomorrow, so I can't come to visit you.

B: 来たくないと言ふのなら来てもらわなくてもいい。／ If you're saying you don't want to come, that's fine with me.

というのなら is used to indicate a judgment on the part of the speaker regarding the content of the preceding conversation. It is followed by an expression of permission, advice, or suggestion directed toward the listener, or an inference made by the speaker. ということなら can also be used.

⑨ ... ということなら

すがない。／ If it really is cancer, there's no way that they'll release you from the hospital.

Expresses the speaker's response to something a third party has said. Used in more or less the same way as というのなら. However, というのなら can be used to respond to something said by either a direct addressee or a third person who is not present, in which cases it means "if you say so" or "if s/he says so," respectively. ということなら usually means the latter only.

【なら₃】

[N／Na (だった)なら]

[A-い／A-かった なら]

[V-る／V-た なら]

In contrast with Usage 2 of なら, Usage 3 does not take the pattern のなら. Usage 3 is used in the form なら or ならば and is equivalent to the *ba*-form of N/Naだ. However, it can also be used after the dictionary form or the *ta*-form of a verb or *i*-adjective. When Usage 3 of なら is preceded by a verb or an *i*-adjective, it can be replaced by ば or たら with very little change in meaning. たら is an emphatic form of たら and sounds a little old-fashioned.

① N／Na なら(ば)

- (1) 10人一緒になら団体の割り引き料金になる。／ Groups of ten get a reduced rate.

- (2) まわりがもう少し静かならば落ち着いて勉強できるのですが。／ If it were a little quieter around here, I could settle down and study.
- (3) 東京ならこんなに安い家賃で家は借りられません。／ If this were Tokyo, you would never be able to rent a house for such a low price.
- (4) その話が本当なら大変なことになりますよ。／ If that story is true, you're going to be in big trouble.
- (5) 私があなたならそんなふうには考えなかつたと思う。／ If I were you, I wouldn't have thought like that.
- (6) 日曜日、お天気ならハイキングに行きましょう。／ If the weather's nice on Sunday, let's go hiking.

N/Naなら(ば) is the *ba*-form of N/Naだ. It expresses a hypothetical condition, such as "if such-and-such was the case" or "supposing that...," or a counter-factual condition, such as "if the circumstances were the other way around." In formal written Japanese, であれば, which is the *ba*-form of である, can also be used. N/Naなら(ば) can be replaced by だったら.

The difference between Usage 3 of なら and Usage 1 is that Usage 1 attaches to nouns only and means "if N were the topic," while Usage 3 expresses a supposition (if it were the case that...) regarding something that is either not known to be true, or is contrary to fact. However, in many cases it is difficult to decide which usage of なら actually applies.

② NがNならNはNだ

- (1) 銀座が東京の中心なら心斎橋は大阪の中心だ。／ If Ginza is the center of Tokyo, Shinsaibashi is the center of Osaka.
- (2) パリが芸術の都なら、ロンドンは金融の都だ。／ If Paris is the city of art, London is the city of finance.
- (3) 兄が努力型の秀才なら弟は天才型の

秀才だ。／ If the older brother is the hard-working prodigy type, the younger brother is the genius type.

NがNならNはNだ is used to compare people or things that have contrasting characteristics. Each person or thing is likened to something different (using different terms), and the pattern itself means "if ...can be expressed as ..., then ...can be expressed as"

③ NがNならNもNだ

- (1) 親が親なら子も子だ。／ What can you expect from a child with parents like that? (lit. Like parent, like child.)
- (2) 先生が先生なら学生も学生だ。／ What can you expect from students with a teacher like that?
- (3) 亭主が亭主なら女房も女房だ。／ Both the husband and wife are hopeless.
- (4) アメリカもアメリカなら日本も日本だ。／ Both America and Japan are equally to blame.

The N slots in the pattern NがNならNもNだ are filled by pairs of nouns that represent people in a relationship, such as "husband" and "wife," or institutions, organizations, etc. This pattern expresses a negative evaluation of the behavior or attitude of the people or organizations in question and means "both of them are equally terrible" or "they're a totally outrageous bunch of people." It is used to describe two parties with undesirable characteristics or attitudes, such as being thoughtless, lazy, impertinent, or rude. This pattern also takes the form N1もN1ならN2もN2だ, as in (4).

④ ...なら(ば)

[A／V なら(ば)]

- (1) 今年も真夏の日照時間が短い／短かつたならば米不足の問題は深刻だ。／ If there are too few hours of mid-summer sunlight again this year, the shortage of rice will be a serious problem.

(2) この機会を逃す／逃したならばもう2度と彼には会えないだろう。／ If I miss this opportunity, I'm afraid I'll never be able to see him again.

(3) このまま不況が続く／続いたなら失業問題は深刻になる。／ If the recession continues like this, the unemployment problem will become critical.

(4) 今後1週間雨が降らない／降らなかつたならば水不足になる。／ If it doesn't rain in the next week, there will be a shortage of water.

Used with the dictionary form or the *ta*-form of an *i*-adjective or verb, なら(ば) means "in the event that such a situation is realized." It is a hypothetical conditional used to state an assumption about a situation that may be realized in the future, as well as a prediction about something that will happen if that situation is realized. なら(ば) is similar in meaning to するなら and したなら. It is a literary expression that often appears in editorial or academic texts. It can be replaced by ば and たら, and in spoken Japanese the latter are more commonly used.

(5) 今年も真夏の日照時間が短い／短かつたら米不足の問題は深刻だ。／ If there are too few hours of mid-summer sunlight again this year, the shortage of rice will be a serious problem.

(6) この機会を逃せば／逃したらもう2度と彼には会えないだろう。／ If I miss this opportunity, I'm afraid I'll never be able to see him again.

(7) このまま不況が続く／続いたら失業問題は深刻になる。／ If the recession continues like this, the unemployment problem will become critical.

(8) 今後1週間雨が降らなければ／降らなかつたら水不足になる。／ If it doesn't rain in the next week, there will be a shortage of water.

- (5) 《歌詞》あの坂を越えたなら幸せが待っている。／《song》Happiness awaits over that hill.

...たなら, an emphatic form of たら that sounds a little old-fashioned, is used to express hypothetical or counter-factual conditions. It is often used in the lyrics of popular songs, but in daily conversation たら is more common.

⑥ V-るなら(viewpoint)

- (1) 事情を知らない人の目から見るなら、少しおおげな感じがするかもしれない。／ In the eyes of someone who doesn't know the actual situation, it may seem a bit blown out of proportion.
- (2) 私に言わせるなら、この作品はあまり面白いとは思えない。／ If you ask me, I don't think this piece is all that interesting.
- (3) 戦前と比べるなら生活レベルはずいぶん向上したといえるだろう。／ We can say that the standard of living has improved considerably, compared with before the war.

- (4) 一部を除くなら、彼の意見は正しいと思う。／ Except for some parts, I think his opinion is correct.

When the dictionary form of verbs such as 見る, 言う, and 比べる is followed by なら, the result is an idiomatic expression that indicates the viewpoint from which a judgment or opinion (given in the subsequent clause) is stated. This pattern tends to be used in written Japanese. たら/と/ば can also be used with these verbs, and the resulting forms are, for the most part, interchangeable with V-るなら. Similar expressions include ...によるなら and ...を別にするなら.

【ならいい】

[N / Na ならいい]

- (4) それほど熱心に言う(の)ならいいじゃありませんか。やりたいことをやらせてあげなさいよ。／ Isn't it all right if she says she's that enthusiastic? Go ahead and let her do what she wants.

On the basis of the previous utterance or situation, ならいい expresses the speaker's attitudes such as allowance or non-intervention and means "con-

sidering the previous utterance or situation, it's okay to do something/you can do it/you don't have to do it." For instance, the sentence in (3) means "if you don't want to do that, you don't have to do it."

Often appears in the pattern NならではのN, but also appears in Nならでは...ない. ならでは expresses a high opinion of N and is used in catch phrases for a shop or company advertisement.

The first noun modifies the second. When the particles が and を are used in the kernel (basic) clauses, as in 子供が成長する and 自転車を修理する, these particles do not appear in the NのN phrases, which in this case are 子供の成長 (children's growth) and 自転車の修理 (bicycle repairs). Other types of particles, however, must be retained, as in アメリカからの観光客 (tourists from the United States) and 田中さんとの旅行 (the trip with Tanaka-san). The particle に does not appear in this pattern at all. ～ is used instead of に, as in the example below.

For instance, in (1), after the speaker acknowledges that "he is still a child," s/he makes the judgment, based on this fact, that he (the child) should not be expected to understand. 【のに】

[N／Na なのに]

[A-い／A-かった のに]

[V-る／V-た のに]

① …のに(mid-sentence)

Placed after a clause and used in the pattern X のに Y. Expresses that the result Y is not what X would naturally lead one to expect, but something contradictory. Both X and Y express an established fact. This means that expressions indicating a situation that is not established as a fact, such as questions, commands, requests, invitations, intentions, desires, or suppositions, cannot usually appear in Y.

- (×) 雨が降っているのに出かけなさい。／ Even though it's raining, go out.
- (×) 雨が降っているのに出かけたい。／ Even though it's raining, I want to go out.
- (×) 雨が降っているのに出かけるだろう。／ Even though it's raining, I'll probably go out.

a …のに(converse cause)

- (1) 5月なのに真夏のように暑い。／ Although it's May, it's as hot as the middle of summer.
- (2) 家が近いのによく遅刻する。／ Even though she lives close by, she's often late.
- (3) 雨が降っているのに出かけていった。／ Despite the rain, I went out.
- (4) 真夜中過ぎたのにまだ帰ってこない。／ It's already past midnight, but he hasn't come back yet.
- (5) 今日は日曜日なのに会社に行くんですか。／ Even though today is Sunday, you're going to work?
- (6) 5月なのに何でこんなに暑いんだろう。／ Why is it so hot, even though it's still

May?

In this use of the pattern X のに Y, there is a causal relation between X and Y, but this causal relation is not realized.

For example, のに in (3) expresses that the usual causal relation, which is "because it was raining, I didn't go out," is not established; rather, two incompatible conditions are realized at the same time. This usage is often accompanied by the speaker's surprise or doubt regarding an unexpected result or discrepancy.

In (6), のに is used to ask the reason for the current situation, which is unexpected. It expresses the speaker's sense of surprise and misgiving.

(5) is an interrogative sentence, but のに can be used in this case. The reason is that the situation of the addressee going to work (= Y) is an established fact. The speaker is astonished that "even though it's Sunday, you're going to work," and this interrogative sentence uses the form のですか to ask a question about this fact.

In contrast, an interrogative sentence without のだ that asks if the addressee is going to work would be unnatural, as below.

- (×) 今日は日曜日なのに会社に行きますか。／ Even though today is Sunday, are you going to work?

b …のに(contrast)

- (1) 昨日はいい天気だったのに今日は雨だ。／ It was nice yesterday, but today it's raining.
- (2) あの中国人は日本語はあまり上手でないのに、英語はうまい。／ Even though that Chinese person isn't very good at Japanese, his English is good.
- (3) お兄さんはよく勉強するのに弟は授業をよくサボる。／ The older brother studies hard, while the younger one often skips class.

In this usage, X のに Y expresses a contrast between X and Y, not a causal relation.

For example, in (2) there is a contrastive relation between X, which is 日本語が上手でない (s/he is

not good at Japanese), and Y, which is 英語がうまい (s/he is good at English), and のに links X and Y. The relation between X and Y is not a causal relation, like “because that Chinese person is not good at Japanese, s/he is good at English.”

のに in (2) can be paraphrased as けれども or が (see below). However, while けれども and が express a simple contrastive relation between the first and second clauses, のに implies that the relation between X and Y deviates from the one usually expected and that the speaker feels it is “unusual” or “strange.”

- (例) あの中国人は日本語はあまり上手でない
けれども／が、英語はうまい。／ That
Chinese person isn't very good at Japanese, but his/her English is good.

c ...のに<unexpected>

- (1) 合格すると思っていたのに、不合格だつた。／ I thought I would pass the exam, but I failed.
 (2) 今晩中に電話するつもりだったのに、うっかり忘れてしまった。／ I intended to make a phone call tonight, but it slipped my mind.
 (3) 和子さんには来てほしかったのに、来てくれなかつた。／ I especially wanted Kazuko-san to come, but she didn't.
 (4) せっかくおいでくださったのに、申し訳ございませんでした。／ After you took the trouble to come all the way here...I really must apologize.

Expresses that an outcome is different from what was expected or predicted.

In examples (1)-(3), X (in the pattern Xのに Y) is an expression of expectation, intention, or desire, such as ...と思っていた (I thought...), つもりだった (I intended), or 来てほしかつた (I wanted (her) to come). Y describes an outcome that is contrary to X.

(4) means せっかくお出でくださったのに、(留守にしていて)申し訳ございません (you took the trouble to come all the way here, so I really must apologize (for being out)). However, the outcome

留守にしていて (for being out) is not actually verbalized, and のに is followed immediately by the speaker's expression of apology for the unexpected outcome.

② ...のに<sentence-final>

- (1) スピードを出すから事故を起こしたんだ。ゆっくり走れと言っておいたのに。／ You had an accident because you drive too fast. I told you before you went out that you should drive slowly!
 (2) 絶対来るとあんなに固く約束したのに。／ After he'd promised so firmly that he would definitely come!
 (3) もっと早く出発すればよかったのに。／ We should have left earlier.
 (4) あなたも来ればいいのに。／ You really should come, too!
 (5) あと5秒早ければ始発電車に間に合つたのに。／ If I'd arrived five seconds earlier, I would have made the first train.

Used at the end of a sentence to express a feeling of regret regarding a result that differs from what was expected. Often used when the speaker is criticizing or complaining about someone else's actions, or at the end of a counter-factual conditional sentence, as in (5).

③ せっかく ...のに→【せっかく】⑤

④ Nでも...のに

- (1) 電気屋でも直せないので、あなたに直せるはずがないじゃないの。／ Even an electrician can't fix it, so how should you be able to fix it?
 (2) 九州でもこんなに寒いのに、まして北海道はどんなに寒いだろう。／ If it's this cold even in Kyushu, how cold must it be in Hokkaido?
 (3) こんな簡単な問題、小学生でも解けるのに、どうして間違えたりしたの?／ Even

an elementary school student could solve such an easy problem, so why did you get it wrong?

Expresses the development of a logical argument, as in "if N, then something is supposed to be such-and-such, but that was not the result (e.g. I thought an electrician would be able to fix it, but s/he couldn't)" and "even N is such-and-such, so someone/something with less potential than N is all the more such-and-such (e.g. it is even more difficult for you, as a non-professional, to fix it.)"

[V-るのに]

- (1) この道具はパイプをきるのに使います。
This tool is used for cutting pipe.
- (2) 暖房は冬を快適に過ごすのに不可欠です。
It is essential to have heating in order to pass the winter comfortably.
- (3) 彼を説得するのには時間が必要です。
It will take time to convince him.

のに is placed after the dictionary form of a verb and expresses a purpose. Can be paraphrased as ...するために. However, the range of expressions that come after ...るのに is restricted to words/phrases like 使う (use), 必要だ (it's necessary), and 不可欠だ (it's indispensable), so this pattern is used less freely than ...するために.

- (×) 留学するのに英語を習っている。／I'm learning English for to study abroad.
(○) 留学するために英語を習っている。／I'm learning English in order to study abroad.

The form Nに (without の) is used with nouns to express the meaning of purpose, as below.

【ば】

[N / Na なら(ば)]

[A-ければ]

[V-ば]

ば is a conjugation form for predicates and indicates a condition. It is the most typical marker for conditional clauses in Japanese, and its usage overlaps partially with that of たら, と, and なら. When this conditional follows a noun or a *na*-adjective, ば is often dropped and the form N/Na なら is used. N/Na あれば is a formal, written expression for N/Na なら. The negative form N/Na でなければ is used in both written and spoken Japanese. The *i*-adjective いい always takes the form よければ, not いければ.

ば is usually used the same way as たら. However, ば tends to be used more in written Japanese, while たら is used more in spoken Japanese. In casual spoken language, sometimes the combi-

nation of "consonant + *eba*" at the end of a word changes to "consonant + *ya*" (e.g. あれば→ありや, 行けば→行きや, 飲めば→飲みや, なければ→なけりや), and the combination A-ければ may change to A-きや (e.g. なければ→なきや).

① ...ば(generic condition)

[...ば N / Na だ]

[...ば V-る]

- (1) 春が来れば花が咲く。／ When spring comes, flowers bloom.
- (2) 10 を2で割れば5になる。／ When you divide ten by two, you get five.
- (3) 台風が近づけば気圧が下がる。／ When a typhoon approaches, the atmospheric pressure drops.
- (4) 年をとれば身体が弱くなる。／ People get weaker with age.
- (5) 経済状態が悪化すれば犯罪が増加する。／ When the economy deteriorates, the crime rate increases.
- (6) 人間というものは、余分な金を持ち歩けばつい使いたくなるものだ。／ If people carry around extra money, they will want to spend it.
- (7) 信じていれば夢はかなうものだ。／ If you believe in your dream, it will come true.
- (8) だれでもほめられればうれしい。／ Everyone is happy when praised.
- (9) 風がふけば桶屋がもうかる。／ Bliss often falls into the hands of an unexpected person. (lit. "If the wind blows, the bucket-maker profits.")
- (10) 犬が西向きや尾は東。／ If a dog faces west, its tail will point east. (used to emphasize that something is obvious or a matter of course)
- (11) 終りよければすべてよし。／ All's well that

ends well.

Used to state a conditional relation regarding a general state of affairs, not a specific person or thing. Means “when X happens, Y also happens, without exception.” Expresses logical or rule-based relations or cause-and-effect relations that are not situated at a particular point in time but always hold true. The dictionary form is always used at the end of the sentence. Not used to talk about a personal experience or one particular event. Used to say that “when X is realized, Y is the natural consequence,” “such-and-such generally happens,” or “something is intrinsically such-and-such.”

When this expression is used, the subject is often omitted. When the subject appears, it is one that refers to some kind of group as a whole, such as 人はだれでも (everyone/all people) or Nというものは (N in general). This use of the *ba*-form is often followed at the end of the sentence by ものだ, which indicates that the thing in question intrinsically has a certain nature, as exemplified in (6) and (7). Often used in proverbs and maxims as well, as in (9)-(11).

② ...ば⟨repetition, habit⟩

Used with respect to a particular person or thing and expresses a habit or an action that is repeated. Means “every time X happens, Y happens too,” “whenever X is done, Y is invariably done as well.” The difference between this usage and the generic conditional described in 1 is that the generic conditional, which describes a situation that has an indefinite subject and transcends time, is always used with the dictionary form of a predicate at the end of the sentence, whereas the repetitive/habitual conditional can be used with not only the dictionary form but also the *ta*-form. This conditional is used to describe a habit or a repeated action of a definite subject.

a ...ば...V-る

- (1) 祖母は天気がよければ毎朝近所を散歩します。／ My grandmother takes a walk in the neighborhood every morning, if the weather is nice.
- (2) 彼は暇さえあればいつもテレビを見ています。

る。／ Whenever he has time, he always watches television.

- (3) 父は私の顔を見れば「勉強しろ」と言う。／ Whenever my father sees me, he says “Go study!”
- (4) 愛犬のポチは主人の姿を見ればとんでくる。／ My pet dog, Pochi, always runs to me (= his master) when he sees me.

This usage of the *ba*-form has the dictionary form of an action verb at the end of the sentence. Expresses a current habit or a repeated action of a definite subject.

b ...ば...V-た

- (1) 子供のころは、天気がよければ、よく母とこの河原を散歩したものだ。／ When I was a child, I often used to take walks with my mother along this riverbed, if the weather was nice.
- (2) 学生のころは暇さえあればお酒を飲んで友達と語り明かしたものだ。／ When I was a college student, whenever I had time I used to drink and talk with my friends all night long.
- (3) 父は東京へ行けば必ずお土産を買ってきてくれた。／ My father used to buy me a souvenir every time he went to Tokyo.
- (4) 20年ほど前には、街から少し離れれば、いくらでも自然が残っていた。／ Twenty years ago, if you went just a little way out of the city, there were still plenty of places where the natural environment remained untouched.

This usage of the *ba*-form expresses a past habit of a definite subject, or a state/event that always took place under some particular circumstances in the past. Means “someone used to do/always did...in the past,” “if someone did A, then B was always the case.” Sometimes used with V-たものだ, which indicates recollection, as shown in (1) and (2).

In the pattern ...ば...V-た, the *ba*-form can also indicate a state or event contrary to the actual situation, as in (4). The difference between counter-factual ば and repetitive/habitual ば is that the latter states a fact that has actually been realized.

Like ば, たら can also be used to state a past fact. However, while ば expresses an action that was repeated in the past or a situation that was always realized under certain conditions, たら usually expresses a past event that took place one time only.

(例1) ビールを2本飲めば酔っぱらいました。／ Whenever I drank two bottles of beer, I got drunk.

(例2) ビールを2本飲んだら酔っぱらいました。／ When I drank two bottles of beer, I got drunk.

(1) above means "when I drank two bottles, I always/without exception got drunk." This expresses an event that was repeated in the past. In contrast, (2) means "when I happened to drink two bottles, I got drunk" and expresses a past event that occurred once.

③ ...ば<not-yet-realized condition>

Expresses the relation "if X happens, Y will happen," with respect to a particular thing or person. X can be something that either has or has not been realized, but Y is always something that has not yet been realized.

The generic conditional ば described in Usage 1 is used to talk about things or events in general and is always accompanied by the dictionary form of a predicate at the end of the sentence. On the other hand, the hypothetical conditional ば is used to apply a general condition to a particular situation and state a prediction. It can be combined with expressions such as だろう and かもしれない at the end of the sentence.

(例) <一般条件>食事を減らせば誰でもやせる。／<generic condition>If you reduce your food intake at meals, anyone can lose weight.

(例) <仮定条件>食事を減らせばあなたもやせるだろう。／<not-yet-realized condition>If you reduce your food intake at meals, you too will lose weight.

The slot for Y in this pattern may be filled by a

statement describing an unrealized situation, an expression of intention or command, or some other expression that reveals the speaker's thoughts/feelings or his/her desire to exert an influence on someone.

a ...ば+未実現のことがら

(1) もし私が彼の立場なら、やっぱり同じように考えるだろう。／ If I were in his shoes, I would think the same.

(2) もし天気が悪ければ、試合は中止になるかもしれない。／ If the weather is bad, the match may be canceled.

(3) 手術をすれば助かるでしょう。／ If you have surgery, you will probably recover.

(4) こんなに安ければ、きっとたくさん売れると思う。／ If it is this inexpensive, I'm sure it will sell well.

(5) それだけ成績がよければ、どの大学にでも入学できるはずです。／ If your grades are that good, you should be able to get into any university.

(6) ふだん物静かな夫がめざらしく、一時間も説教していた。あれだけ叱られれば、息子も少しさは反省するにちがいない。／

Surprisingly, my usually quiet husband lectured our son for a whole hour. Having been given such a talking-to, surely our son will reflect on his conduct at least a little.

Used with respect to a specific person or thing and means "if X happens, of course Y will also happen." Y refers to an unrealized situation or event and is often combined with an expression of supposition or prediction at the end of the sentence, such as だろう, にちがいない, はずだ, かもしれない, or 思う.

In (1)-(3), the speaker assumes X, which has not (yet) been realized, and makes supposition Y, which is something that should happen under condition X. (4)-(6) are cases in which X has already been realized. Here the *ba*-form expresses

the notion that “if a situation like this has actually occurred, then Y should naturally occur as well.”

When the speaker is quite certain that Y will be realized, the non-past declarative form of a predicate can be used at the end of the sentence, as shown below.

(7) 応募人数が多ければ抽選になります。／
If there is a large number of applicants, the selection will be made by lottery.

(8) うっかりミスさえしなければ必ず合格で
きますよ。／ If you just don't make any
careless mistakes, you will definitely
pass.

(9) 食事の量を減らして運動をすれば、2、
3キロぐらいはすぐ減りますよ。／ If you
reduce your food intake and get some
exercise, you will soon lose two or three
kilograms.

(10) A: 気分が悪くなってきたよ。／ I'm start-
ing to feel sick.

B: それだけ飲めば、気分も悪くなるよ。
／ If you've drunk that much, you will
feel bad.

ば is often used to say that X is a necessary and sufficient condition for the realization of Y. In (8), it takes the pattern Xさえ…ばY and expresses the meaning “in order to realize Y, it is sufficient to realize X.” In (9), it is used to state what must be done in order to obtain a desired result, and in (10) it means “when you've drunk so much, it's no surprise that you feel bad.”

All of these are ultimately examples of the generic condition “if X, then definitely Y” being applied to specific cases. For instance, in (10), the generic condition “anyone who drinks too much will start to feel bad” is applied to a particular addressee's case, in order to convey the message “if you too drink so much, it's only natural that you feel sick.”

b いし ぱ + 意志・希望

(3) A: なにか飲む?／ Do you want some-

(10) もし雨が降れば中止しよう。／ If it rains,
let's cancel it.

ば is used in the pattern Xば…しよう／したい, where Y expresses the speaker's intention or desire, and the range of predicates that can appear in X is restricted. The general tendency is that there is no difficulty if the predicate in X is stative, but use of a verb that expresses an action or change of state often sounds unnatural.

(1)-(5) contain stative predicates, including i-ad-

jectives, ある, and V-ない, so ば can be used with no problem. In (6)-(10), X expresses an action or change of state, but it is still possible to use ば. This has to do with the fact that (6) expresses the same action on the part of both the listener and the speaker, and (7) and (8), which mean "if you do X, I will do Y in return," are cases of the speaker making a promise to the listener in exchange for something. The ば clause in (9) means "I don't know whether I can finish reading it or not, but.../I may not be able to finish reading it, but if I can..." and the one in (10) means "supposing it were to rain." These expressions are used when the speaker has doubts about whether or not X will definitely occur, or when s/he takes into account the possibility that X will not occur.

So, in cases like (6)-(10), ば can be used even though X expresses an action or change of state. However, when X expresses a future plan which involves a sequence of actions that progress over time, ば cannot be used. For example, if (9) is intended to mean "after I finish reading this book, then I'll read the next," たら must be used instead of ば.

- (×) この本を読みば次にこの本を読みます。／ If I read this book, I'll read that book next.
- (○) この本を読んだら次にこの本を読みます。／ After I read this book, I'll read that book next.

はたら c ...ば + 働きかけ

- (1) そう思いたければ勝手に思え。／ If that's what you want to think, go right ahead!
- (2) やりたくないければやるな。／ Don't do it if you don't want to.
- (3) 宿題をすませなければ遊びに行ってはいけない。／ Unless you finish your homework, you can't go out to play.
- (4) 飲みたくないければ飲まなくともいい。／ If you don't want to drink, you don't have to.
- (5) 時間があれば、もう少しゆっくりしていってくださいよ。／ If you have time, please stay for a little while longer.
- (6) 明日、天気がよければ海に行きませんか。

／ If the weather is nice tomorrow, shall we go to the beach?

- (7) 7時までに仕事が終われば、来てください。／ If you're finished work by seven, please come.

ば is followed by an expression that requires the listener to perform an action, such as a command, prohibition, permission, invitation, or request. In general, when an "exertion-of-influence" expression like one of these appears at the end of the sentence, it is unlikely that an action or change-of-state verb can be used in X, and the range of verbs that can be used is even more restricted than when Y is an expression of intention or desire.

ば can be used when it is followed by a stative predicate such as V-たい, Vない, or ある, as is the case in examples (1)-(6). In (7), the change-of-state verb 終わる is used with ば and followed by an expression of request. This sentence conveys the meaning "you might not finish, but supposing you are able to..." and indicates that the speaker has doubts or a negative feeling about the possibility that the listener will finish. In cases like this, ば may sometimes be used.

However, in general, when X expresses an action or change, and the speaker instructs the listener to perform a second action (after the first action/change has taken place) or prohibits that action, ば cannot be used. たら should be used instead.

- (×) 駅に着けば迎えに来てください。／ If you arrive at the station, please come to pick me up.
- (○) 駅に着いたら迎えに来てください。／ When you arrive at the station, please come to pick me up.
- (×) お酒を飲めば運転するな。／ If you drink, don't drive.
- (○) お酒を飲んだら運転するな。／ When you drink, don't drive.

- (1) A: 学生ならば、料金は安くなりますか。／ If you're a student, is the charge lower?
B: 大人料金の2割引になります。／ It

will be twenty percent off the adult price.

- (2) この病気は手術をすれば治りますか。／ Will this illness be cured if I have an operation?

- (3) あやまれば許してくれるでしょうか。／ If I apologize, will she forgive me?

- (4) A: どうすれば機嫌を直してくれるかしら。／ What can I do to restore his good humor?

- (5) A: どのぐらい入院すればよくなるでしょうか。／ How long will I have to stay in the hospital to recover?

B: 2週間ぐらいですね。／ About two weeks.

- (6) A: どこに行けばその本を見つけることができるでしょうか。／ I wonder where I can go to find that book.

B: 神田の古本屋を探せば、一冊ぐらいはあるかもしれませんね。／ If you go to the used bookstores in Kanda, you may be able to find a copy.

The pattern XばYか expresses a question seeking an answer from the listener. (1)-(3) are yes-no interrogative sentences, and (4)-(6) are interrogative sentences with question words such as どう (how) and どこ (where). In the latter case, ば is often used in the form どうすればYか, to ask about the means or method X that can be used in order to achieve the good result Y. On the other hand, when the speaker is asking what to do when X has occurred, it is more natural to use たら, and using ば often results in an unnatural or anomalous expression.

- (×) 雨が降ればどうしますか。／ What will you do if it rains?

- (○) 雨が降ったらどうしますか。／ What will

you do if it rains?

e 疑問詞+V-ば...のか

- (1) いったいどういうふうに説明すれば分かるからもらえるのか。／ How in the world should I explain it, to make him understand?

- (2) 何年勉強すればあんなに上手に英語がしゃべれるようになるのだろう。／ I wonder how many years I should study English in order to be able to speak as fluently as that.

- (3) どれだけ待てば、手紙は来るのか。／ How long should I wait for the letter to come?

- (4) 人間、一体何度も同じ過ちを繰り返せば、気がすむのであろうか。／ How many times do human beings have to repeat the same mistake until they are satisfied?

This is a rhetorical expression that consists of a question word such as 何 (what), どれだけ (how much), or どんなに (how/however) followed by the ba-form of a verb. It means "no matter how much I do..., things don't go the way I want them to," and it expresses the speaker's sense of exasperation or desperation regarding a certain situation. Expressions like のか, のだ, and のだろう(か) are used at the end of the sentence. V-ば can be replaced by V-たら.

④ ...ば<counter-factual>

A statement of something contrary to fact comes before ば, and after ば comes a description of something that should (have) happen(ed) if the situation were the opposite. Used to talk about an undesirable situation that has already been realized, or about a situation that is obviously impossible to realize.

When this pattern is used to say that a desired situation has not been realized, it conveys a feeling of regret or disappointment. On the other hand, when it is used to say that an undesirable situation has been avoided, it implies the speaker's feeling of relief, as in "it's a good thing such-and-such

didn't happen."

In many cases, it is impossible to distinguish a counter-factual use from a factual one on the basis of form alone. However, the patterns below are often used in counter-factual conditional sentences. Also, this usage of ば can always be substituted with たら.

a …ば …のに／…のだが

- (1) 宿題がなければ夏休みはもっと楽しいのに。(残念なことに宿題がある。) / If there were no assignments, my summer holiday would be more enjoyable. (Unfortunately, I do have assignments.)
- (2) お金があれば買うんだけどなあ。(お金がないから買えない。) / If I had the money, I would buy it. (Because I don't have the money, I can't buy it.)
- (3) お金があれば買ったんだが。(お金がなかったので買えなかつた。) / If I had had the money, I could have bought it. (Because I didn't have the money, I couldn't buy it.)
- (4) A: 試験うまくいった? / Did your exam go well?

B: うまくいっていれば、こんな不機嫌な顔はしていないさ。(試験に失敗したから、こんな不機嫌な顔をしている。) / If it had gone well, I wouldn't look this crabby. (Because I failed the exam, I look this crabby.)

The pattern XばYのに／のだが／のだけれど is a counter-factual conditional sentence. The predicate in Y takes either the dictionary form or the *ta*-form. (1) and (2) are examples of the former. These express that the speaker desires something that is different from the present situation, regrets this situation, etc. In (3) the speaker uses the *ta*-form to hypothesize a past situation that is different from what actually happened and to state that, if the hypothetical situation had been realized, the result would have been different. (4) illustrates

the pattern V-ていればV-ている, which is used to state a hypothesis, with regard to a situation that has already been realized, that if things had been different the present situation would not have arisen.

As shown in (1)-(3), when an expression like のに, のだが, or のだけれど appears at the end of the sentence, it is clear that the sentence is a counter-factual conditional. However, such expressions are not always used, as seen in (4).

b …ば …だろう／…はずだ

- (1) 地震の起こるのがあと1時間遅ければ被害はずっと大きかっただろう。/ If the earthquake had happened one hour later, the damage would have been far more extensive.
- (2) 気をつけていれば、あんな事故は起きたはずだ。/ If she'd been more careful, an accident like that wouldn't have happened.
- (3) 発見がもう少し遅ければ助からなかつたかもしれない。/ If he had been found a little later, he might not have been saved.
- (4) あの時すぐに手術をしていれば、助かつたにちがいない。/ If she had had an operation right away at that time, she would certainly have recovered.
- (5) 彼が止めに入らなければ、ひどい喧嘩になっていたと思う。/ I think it would have turned into a terrible fight, if he had not stepped in to stop it.
- (6) あの時、あの飛行機に乗っていれば、わたしは今ここにいないはずだ。/ If I had taken that flight then, I would not be here now.

Used to speculate about a situation or event that could have happened, if things had been different. An expression of prediction or conjecture, such as だろう, はずだ, かもしれない, にちがいない, or と思う, is used at the end of the sentence.

When the expression of prediction or conjecture is preceded by the *ta*-form of a predicate, as in (1)-

(5), it means that the actual past situation differs from the one expressed by the predicate. When the dictionary form is used, as in (6), it means that the present situation differs from the one expressed by the predicate.

c ...ば...ところだ(った)

- (1) もう少し若ければ、私が自分で行くところだ。／ If I were a little younger, I would be ready to go myself.
- (2)あのとき、あの飛行機に乗っていればわたしも事故に巻き込まれていたところだ。／ If I had taken that flight then, I would have been caught up in the accident too.
- (3) 今日の授業は突然休講になつたらしい。田中が電話をしてくれなければ、もう少しで学校に行くところだつた。／ Apparently today's class was canceled without notice. If Tanaka hadn't called me, I would have been on my way to school in a little while.
- (4) 電車がもう少し早く来ていれば大惨事になるところだつた。／ If the train had arrived a little earlier, it would have been a terrible disaster.
- (5) 注意していただかなければ忘れていたところでした。／ If you hadn't reminded me, I would have forgotten.

In this pattern, ば is followed at the end of the sentence by an expression like V-るところだつた, V-ていたところだ, or V-ていたところだつた.

...ばV-るところだ is used to hypothesize an unrealized situation or event Y, which would likely be realized if the situation were different from X. (1) is such an example; it means "I'm not actually young so I can't go, but I am almost inclined to do so."

...ばV-ていたところだ means "if the situation had been different, I would have done such-and-such/ such-and-such would have happened." Expresses a potential situation in the past, as exemplified in (2).

...ばV-るところだつた, shown in (3) and (4), is

used when an event that would have happened under different circumstances was avoided just before it takes place. Used when the speaker feels relieved that it was possible to avoid an unfavorable outcome.

忘れていたところだつた in (5) can be rephrased as 忘れているところだつた. However, the former expresses a past situation, with the sense of "I managed not to forget," while the latter expresses a present situation, with the sense of "I've managed to remember."

→【ところだ】②

d ...ば V-た／V-ていた

- (1) 安ければ買った。／ If it had been inexpensive, I would have bought it.
- (2) もっと早く来れば間に合つた。／ If I had come earlier, I would have been in time.
- (3) 手当てが早ければ、彼は助かっていた。／ If he had been treated sooner, he would have been saved.
- (4) きちんとした説明があれば、私も反対しなかつた。／ If a proper explanation had been given, I wouldn't have objected either.

In this pattern, ば takes the *ta*-form of a verb at the end of the sentence and expresses a counter-factual situation or event. Used with respect to a past situation, to hypothesize an action that was not actually performed or a state that differs from reality, and to express a situation or event that would have occurred under the hypothetical circumstances. (2), for instance, means "if I had come earlier, I would have been in time; however, since I actually came late, I was not in time."

In general, counter-factual conditional sentences often end with expressions like のに／のだが／のだけれど, or だろう／かもしれない／はずだ／にちがいない／と思う, or ところだ(つた), as shown in patterns (a)-(c) above. However, there are cases in which no such expression is used, as shown in this pattern (d). Note that when the *ta*-form is used in sentence-final position, in particular, conditional sentences with ば and たら may express different meanings.

- (例1) ボタンを押したら爆発した。／ When I pressed the button, it exploded.
- (例2) ボタンを押せば爆発した。／ If I had pressed the button, it would have exploded.

Example 1, which means “I pressed the button. Then it exploded,” expresses an event that actually took place. On the other hand, example 2 is a counter-factual conditional sentence that means “If I had pressed the button, it would have exploded, but I didn’t actually press the button, so it didn’t explode.”

⑤ …ば⟨already-realized condition⟩

- (1) 彼は変わり者だという評判だったが、会ってみれば、うわさほどのことはなかった。／ He had the reputation of being quite a strange character, but when I met him, he was not half as strange as was rumored.
- (2) 言われてみればそれももっとも気がする。／ Now that you say so, I think that’s a good point too.
- (3) 始めるまでは心配だったが、すべてが終わってみれば、それほど大したことではなかったと思う。／ I was worried before I started, but now that it’s all over, I don’t think it was such a big deal.

The pattern XばY is used to express that the speaker realized Y at the time X occurred. For this usage, たら and と are more usual, and the use of ば is restricted to somewhat old-fashioned literary expressions such as those found in poetry and novels. When this pattern is used in spoken Japanese, it usually takes the form V-てみれば and expresses the speaker’s understanding or acceptance after learning the truth about something, with the sense of “that is quite right” or “of course, it stands to reason.”

In (1)-(3), ば can be replaced by たら, but when たら is used, it means “as a result of taking such-and-such an action, I realized something.” For example, when ば in (1) is replaced by たら to say 会ってみたら、うわさほどのことはなかったよ, the

たら sentence means “as a result of meeting him, I found out that he was not as (strange) as was rumored.” Thus, when a speaker is describing a new realization just the way it happened, s/he usually uses たら or と; if ば is used, it often sounds unnatural.

- (×) 昨日、台所で変な音がするので泥棒かと思つて行ってみれば、弟がラーメンを作つていた。／ Yesterday I heard a strange noise in the kitchen so I thought it might be a thief, but if I went to see, my brother was making *raamen* noodle soup.
- (○) 昨日、台所で変な音がするので泥棒かと思つて|行ってみたら／行ってみると|、弟がラーメンを作つていた。／ Yesterday I heard a strange noise in the kitchen so I thought it might be a thief, but when I went to see, my brother was making *raamen* noodle soup.
- (×) 朝起きれば、雨が降つていた。／ If I got up in the morning, it was raining.
- (○) 朝|起きたら／起きたると|、雨が降つていた。／ When I got up in the morning, it was raining.

When talking about one person who performs two actions in succession, one time only, と should be used, not ば or たら. See the example below.

- (×) 次郎は家に帰れば／帰つたら|、テレビを見た。／ If Jiro came home, he watched TV.
- (○) 次郎は家に帰ると、テレビを見た。／ When Jiro came home, he watched TV.

⑥ …ば…で

[A-ければ A-いで]

[V-ば V-たで]

- (1) 自動車がないとさぞ不便だろうと思っていたが、なければないでやっていけるものだ。／ I thought it would be very inconvenient to live without a car, but I can actually manage without one.
- (2) 父は暑さに弱い。それでは冬が好きかと いうとそうではない。寒ければ寒いで文句ばかり言っている。／ My father can’t

take the heat. But that doesn't mean he likes winter. Once it gets cold, he does nothing but complain about it.

- (3) 金などというものは、無ければ困るが、あればあったでやっかいなものだ。／ Money is something that is trouble if you don't have any, but a nuisance if you do have some.
- (4) 子供が小さい間は、病気をしないだろうかちゃんと育つだろうかと心配ばかりしていたが、大きくなれば大きくなつたで、受験やら就職やら心配の種はなくならない。／ When my children were little, I fretted over whether they would get sick or grow up the right way. Now that they're getting older, there is no end to worries about entrance exams and job-hunting and so forth.

The same verb or adjective is repeated in this pattern, which is used to say that situations that should contrast with each other are essentially the same. For instance, (1) means "if I had a car, it would be convenient, but even without a car, I don't have as much trouble as I'd expected," (2) means "My father complains, regardless of whether it is hot or cold," (3) means "Money is always troublesome, whether you have it or not," and (4) means "Children make us worry while they're small and also after they've grown up." In (4), it is possible to omit the second use of 大きく and say 大きくなればなつたで instead. ...たら...では is a synonymous expression.

⑦ ...ば〈introductory utterance〉

This pattern is used to indicate in advance the conditions under which the following statement will be made, or to give advance warning or explanation of something. It includes idiomatic expressions that are rather fixed. In most cases, ば can be replaced by たら.

a ...ば+request, recommendation

- (1) もし、お差し支えなければ、ご住所と

お名前をお聞かせください。／ If you wouldn't mind, please tell me your name and address.

- (2) A: 今日の説明会はもう終わったんでしょうか。／ Has today's briefing already finished?

B: はい、3時終了いたしました。よろしければ、来週の火曜にも説明会がございますが。／ Yes, it was over at three. If it's convenient for you, there will be another briefing next Tuesday.

- (3) よろしければ、もう一杯いかがですか。／ If it suits you, would you care for another glass?

The expressions above in *ba*-form are idiomatic expressions used to make requests, recommendations, or suggestions. They show the speaker's consideration for the listener's situation or feelings. They mean "as long as it is not contrary to your convenience or intentions." These are polite expressions that convey the speaker's reservation—that is, the attitude that it is not necessary for the listener to act on the request, suggestion, etc., if it is inconvenient for him/her or if s/he does not want to do it.

b ...ば〈viewpoint〉

- (1) A: 本当に行くのかい。／ Are you really going?

B: うん。でも正直言えば、本当は行きたくないんだ。／ Yeah. But to be honest, I really don't want to.

- (2) 50年前と比べれば、日本人もずいぶん背が高くなったと言える。／ Compared with fifty years ago, we can say that Japanese people too have gotten quite a bit taller.

(3) 今は円高なので、国内旅行よりも海外旅行の方が安くつくらしい。考えてみればおかしな話だ。／ I've heard that because the yen is strong now, traveling abroad is less expensive than traveling in Japan. If you

think about it, that's really strange.

- (4) も思えば、じょうせいこう が成功するまでのこの 10 年は長い年月だった。／ Looking back, these past ten years—until the project succeeded—were really long ones.

Verbs of utterance, thought, or comparison, such as 言う (say/speak), 思う (think), and 比べる (compare), are used in the *ba*-form to give advance warning or explanation of the perspective or standpoint from which the statement or judgment that follows will be made.

The *ba*-form expressions in (1) and (2) can be rephrased as 正直言って／言うと／言ったら and 比べて／比べると／比べたら, respectively. (3) can be rephrased as 考えてみると／みたら. The expression 思えば in (4), which means “when I think about it once again,” is used to take an emotional look back at the past. It cannot be rephrased with the *te*-form, たら, or と.

As noted above, this usage of the *ba*-form consists mostly of idiomatic expressions that are rather fixed. Additional examples include はっきり言えば (frankly speaking/to put it bluntly), 極端に言えば (to put it in extreme terms), からみれば (from the viewpoint of), からすれば (from the standpoint of), and so on.

8 V-ば(suggestion, recommendation)

- (1) 《服売り場で》／《at a clothing store》

A: これなんかどうかなあ。／ What about this one?

B: 着てみれば。／ Why don't you try it on?

- (2) A: ゆうべから、すごく頭が痛いんだ。／ I've had a terrible headache since yesterday evening.

B: そんなに痛いの? 会社休めば。／ That bad, huh? Why don't you take a day off?

- (3) A: あ、これ間違ってる。／ Oh, this is wrong.

B: 教えてあげれば。／ Why don't you tell him?

V-ば is pronounced with rising intonation and used to suggest that the listener take a particular action. When the speaker ends a sentence with V-ば, it often sounds like s/he is unconcerned or has only passing interest in the matter at hand. Can be substituted with V-たら or V-たらどう. Used in casual spoken Japanese.

9 ...も...ば...も

- (1) 彼は心臓が悪いくせに酒も飲めばたばこも吸う。／ Even though he has a bad heart, he not only drinks but also smokes.
- (2) 彼は器用な男で料理もできれば裁縫もできる。／ He is good with his hands, and he not only cooks but also sews.
- (3) 黙章なんかもらっても、うれしくもなければ、名誉だとも思わない。／ Even if I were given a medal, I wouldn't feel pleased or honored.
- (4) 動物が好きな人もいれば、嫌いな人もいる。／ Some people like animals, but some don't.
- (5) 人の一生にはいい時もあれば悪い時もある。／ We have both good and bad times in our lives.

This pattern is used to list similar items for emphasis, as shown in (1)-(3), or to list contrasting items in order to express that there is a variety of cases, as shown in (4) and (5). These examples can be paraphrased using ...し, as in 酒も飲むしたばこも吸う (he drinks and moreover he smokes). Also, the first instance of も can be changed to が, as in 動物の好きな人がいれば嫌いな人もいる (some people like animals, but others don't).

- (1) 緊急の場合を除いて、非常階段を使用しないで下さい。／ Please do not use the fire escape, except in the case of an emergency.
- (2) 非常時の場合を除いてこの門が閉鎖されることはない。／ This gate is never closed, except in an emergency.
- (3) 病気やけがなど特別な場合を除いて、再試験は行わない。／ Unless there are special circumstances such as illness or injury, a make-up exam will not be offered.

Used to state an exceptional rule or regulation that applies under special circumstances. Often followed by an expression such as ...ないでください or ...しない. (1) means "use the fire escape only in emergencies" and (3) means "a make-up exam will be provided only under special circumstances such as illness or an injury." 場合以外は may be used instead.

④ V-ているばあいではない

- (1) 今は泣いている場合じゃないよ。／ This is no time for tears.
- (2) もう議論している場合ではない、行動あるのみだ。／ There is no time for further discussion; we should just take action.
- (3) A: 入学試験に落ちたら、学校に行かなくてもすむな。／ If I fail the entrance exam, I won't have to go to school.
B: 兀談を言っている場合じゃないだろ。少しほ勉強したらどうだ。／ This is no time for joking around. How about studying a little?

Used to say that the present situation or the listen-

er's actions are inappropriate, and to caution the listener that the present situation is very serious in nature.

【5】 ばあいによっては→【によって】⑤

【はい】

Used to express an affirmative answer, a back-channel response (see below), and so on. うん and ええ are similar to はい. However, うん is used only in informal situations with family members, friends, or other people who have a close relationship to the speaker, or towards people of lower status than the speaker. In formal situations, はい or ええ is used. To express a negative answer, いいえ, ううん, and いや are used.

① はい(affirmation)

(1) A: これはあなたの本ですか。／ Is this your book?

B: はい、そうです。／ Yes, it is.

(2) A: 明日、学校へいきますか。／ Are you going to school tomorrow?

B: はい、行きます。／ Yes, I am.

(3) A: おいしいですか。／ Is it good?

B: はい、とてもおいしいです。／ Yes, it's really delicious.

(4) A: 便利ですか。／ Is it convenient?

B: はい、便利です。／ Yes, it is convenient.

(5) A: 国へ帰るんですか。／ So, are you going back to your country?

B: はい、そうです。／ Yes, I am.

Used in reply to a question the speaker has asked to confirm whether or not a judgment s/he has made is correct. Means that the speaker's judgment is, in fact, correct. In this case, はい、そうです can be used only in response to a question about a noun, as exemplified in (1).

When responding to a question with a verb or an adjective, the same verb or adjective must be repeated, as shown in (2), (3) and (4). However, if the question form is のですか or んですか, as in

(5), then はい、そうです can be used.

(例) A: これは、あなたの車ではありませんね。
／ This isn't your car, is it?

B1: はい、ちがいます。／ That's right, it isn't.

B2: いいえ、わたしのです。／ Actually (= that's wrong), it is mine.

With a negative question like the one in the example above, はい is used when the speaker's judgment is correct, and いいえ is used when his/her judgment is incorrect. Thus, if the judgment "this is not your car" is correct, the response should be はい, as in B1's response はい、違います (That's right, it isn't) or はい、私の車ではありません (That's right, it's not my car).

As can be seen in the examples above, the answer to a negative question is はい when the expectation or judgment of the person asking the question is correct, and いいえ when it is not. In other words, the answer is not determined by whether the judgment itself is affirmative or negative. In actual conversation, answering a negative question without はい or いいえ is also common.

② はい(consent)

(1) A: 行ってくれますね。／ You'll go for me, won't you?

B: はい。／ Yes.

(2) A: いっしょにやりましょう。／ Let's do it together.

B: はい。／ Yes, let's.

(3) A: これをあっちに持つて行ってください。／ Please take this over there.

B: はい、わかりました。／ All right, I will.

(4) A: いっしょに食事をしませんか。／ Shall we have dinner together?

B1: はい、行きましょう。／ B1: Yes, let's go.

B2: いや、今日はちょっと。／ B2: Actually, today's not so good for me....

(5) 母: 早くおふろに入りなさい。／ Mother: Hurry up and get into the bath.

子: はいはい。／ Child: Yes, yes!
 母: 「はい」は、一回！／ Mother: You only
 need to say "yes" once!

Used to consent to a request, demand, invitation, etc. (4) is in the form of a question, but since it is a request, not an inquiry to confirm whether or not something is correct, consent is indicated by the use of はい. When declining a request, speakers tend not to use いいえ, since it may sound like a rather strong refusal. As shown in (5), repetition of はい in response to a request or demand sounds rather rude, because it gives the impression that the speaker is responding reluctantly.

③ はい(response)

- (1) A: 山田君。／ Yamada-kun?
 B: はい。／ Yes.
- (2) A: ちょっとおたずねしますが...。／ Could I ask you something...?
 B: はい。／ Yes.
- (3) A: あのう。／ Excuse me....
 B: はい。／ Yes?
- (4) A: おーい。ちょっと。／ Hey, you there.
 B: はい。／ Yes?

Used by an addressee to respond when someone calls out to him/her, when attendance is being taken, and so on. In this case, ええ cannot be used. In casual situations, the addressee may also respond with はい, なに, なあに, etc.

④ はい(back-channel response)

- (1) 『電話で』／『on the phone』
 A: 来週の旅行のことですが...。／ About the trip next week....
 B: はい。／ Yes.
 A: 他の方は皆さんいらっしゃることになつたんですが...。／ All the others have decided to go, but....
 B: あ、はい。／ Oh, really.
 A: ええ、それで、Bさんのご都合はどうかと思いまして...。／ Yes, so I'm

wondering whether or not you can go too....

B: すみません。それがですねえ。急に用事ができてしまいまして、申し訳ないんですけど...。／ I'm sorry. About that, you know...something has come up all of a sudden. I'm very sorry, but....

A: だめですか...。／ So you can't come....

はい, ええ and うん are often used as "back-channel" responses. These are brief responses that show only that the addressee understands or is listening to what the speaker is saying. They do not mean that the addressee agrees with the speaker.

⑤ はい(getting someone's attention)

- (1) はい、みなさんこっちを向いて。／ Okay, everyone, look over here.
- (2) はい、みなさん出発しますよ。／ All right, everyone, we're leaving now.
- (3) はいどうぞ。／ Here you are.
- (4) はい、お茶。／ Here is your tea.
- (5) はい、これでございます。／ Here you are, this is it.

Used to attract the addressee's attention. In this case, うん and ええ cannot be used.

⑥ はい(confirmation)

- (1) A: おじいさんは、こちらには長くお住まいですか。／ Has this been your home for a long time, Grandfather?
 B: 私ですか。私は、戦前からずっとここに住んでおります。はい。／ Me? I've been living here since before the war. Yes.
- (2) 客: どっちが似合うかしら。／ Customer: I wonder which one looks best on me.
 店員: そりやもう、どちらもお似合いでござります。はい。／ Salesperson: Well, I would say that both of them suit you. Yes, indeed.

When a speaker adds はい to the end of one of his/her own statements or remarks, it sounds like s/he is confirming what s/he has just said. Sounds old-fashioned or humble.

【ばいい】

[N / Na なら(ば)いい]

[A-ければいい]

[V-ばいい]

An idiomatic expression that consists of the *ba*-form of a conjugated predicate combined with いい. ばよい and ばよろしい are slightly more formal expressions.

→【たらいい】、【といい】

① V-ばいい(suggestion, recommendation)

(1) 休みたければ休めばいい。／ If you want to take a rest, then you should take a rest.

(2) お金がないのなら、お父さんに借りればいいじゃない。／ If you don't have any money, why not borrow some from your father?

(3) A: どうすればやせられるでしょうか。／ What can I do to lose weight?

B: 食べる量を減らして、たくさん運動すればいいんじゃないですか。／ You could reduce the amount of food you eat and do a lot of exercise, couldn't you?

(4) A: 何時ごろ行きましょうか。／ Around what time should I come?

B: 10 時までに来てくれればいい。／ It would be good if you could be here by ten.

An expression used to recommend or suggest that the addressee take a certain action. Used to give or seek advice regarding what kind of measures or means should be taken in order to achieve a particular desired result. Synonymous with たらいい and can usually be rephrased as such. However,

ばいい conveys a strong sense that "doing this alone is necessary and sufficient." Depending on the context, ばいい may sometimes express a lack of interest on the part of the speaker or show that s/he is pointedly wondering why the addressee does not understand even such a simple matter. When ばいい is used to seek advice, it may be used in the form of a question that specifies a purpose, as shown in (3A) どうすればやせられるか (what can I do to lose weight?), or it may just be used in the interrogative form どうすればいいか (what can I do?).

② ...ばいい(wish, desire)

(1) この子が男の子ならいいのに。／ If only she were a boy.

(2) もうすこし暇ならいいのに。／ I wish I had a little more free time.

(6) 父が生きていればなあ。／ If only my father were still alive.

(7) 順子さんもパーティに出席してくれればいいなあ。／ I hope Junko-san will come to the party too.

Expresses the speaker's hope or desire that something will happen. Often followed by an expression like のだが, のに, or (のに)なあ at the end of the sentence. When the current situation differs from the one that is desired, or when the desired situation is impossible, ばいい expresses a feeling of regret, like "I'm sorry that it isn't so." As shown in (6), the form ...ばなあ, which leaves out いい, is also used often. In almost all cases, ばいい can be replaced by たらいい.

③ ...ばよかつた

(1) 親がもっと金持ちならばよかったのに。／

I wish my parents had been richer.

(2) 体がもっと丈夫ならばよかったのに。／

ばよかったです。／ The ski trip was fun.
You should have come too.

B: 僕も行ければよかったですと思うよ。残
念だった。／ I wish I could have gone
along too. It was too bad.

Expresses criticism of the addressee or a sense of regret when something did not actually happen or the current situation is contrary to what the speaker had hoped for. When the negative form なければよかったです is used, as in (4), it means that the speaker regrets something that s/he actually did. ばよかったです may be followed at the end of the sentence by のに, のだが, or のだけれど. たらよかったです is a synonymous expression. With this usage, it is not impossible to say とよかったです. However, たらよかったです and ばよかったです are more common. のに is not usually used when the speaker is talking about his/her own actions.

(×) 僕も行ければよかったですのに。／ I wish I
could have gone too.

(○) 僕も行ければよかったですんだが。／ I wish I
could have gone too.

Used to emphasize Y by first presenting X, which has a lower degree of something. Used in formal, old-fashioned styles. In spoken Japanese, ...どころか is used instead.

【ばかり】

すうりょうし
① 数量詞 +ばかり

(1) 一時間ばかり待ってください。／ Please
wait for an hour or so.

- (3) りんごを三つばかりください。／ Please give me three or so apples.

- (7) ちょっとばかり頭がいいからといってみんなにいばることはないじゃないか。／ There's no reason for him to be acting so high and mighty just because he's a little clever.

Attaches to an expression of amount or quantity and expresses an approximate amount. In (1)-(5), ばかり can be replaced by ほど. In daily conversation, ほど is used more often.

In modern Japanese, ばかり can be used to express a length or span of time, as shown in (1) and (2). However, it cannot be used for a specific time of day or date. In such cases, ぐらい or ごろ should be used instead.

- (×) 3時ばかりに来てください。／ Please come at three o'clock or so.

- (×) 10月3日ばかりに来てください。／ Please come around the 3rd of October.
- (○) 10月3日[ぐらい／ごろ]に来てください。／ Please come around the 3rd of October.
- (3) and (4) mean the same as "please give me three apples" and "please lend me a thousand yen," but adding ばかり makes the quantity a little less definite and softens the expression. ばかり can also be combined with すこし (a little), わずか (slightly), or 少々 (a bit), as in (6) and (7).

② ...ばかり(limit, restriction)

In spoken Japanese, ぱっかり may also be used.

a N (+助詞+)ばかり

Means "only this and nothing else." Used to say that there are many things of the same kind, or repeated occurrences of the same action or event. As shown in (1)-(5) and (8), ばかり is often placed immediately after a noun. When it is used before が or を, it may keep the form ばかりが or ばかりを, but が and を are often dropped. With other particles, ばかり attaches to the combination of "noun + particle" and takes the forms Nとばかり and Nにはばかり, as shown in (6) and (7). ばかり is never used right after まで or より, or after から when it expresses a reason. ばかり is similar to だけ and のみ. However, when it implies "repeating over and over," "always," or "all," だけ and のみ cannot be used instead.

- (○) うちの子はいい子ばかりだ。／ My children are all good kids.

- (×) うちの子はいい子だけ／のみだ。／ My children are only good kids.
- (○) 母は朝から晩まで小言ばかり言っている。／ My mother does nothing but pick on us from morning till night.

Used to say that a certain action has been repeated many times or that someone/something always remains in the same state. Conveys a critical attitude on the part of the speaker. In this usage, ばかり cannot be replaced by だけ or のみ.

When ばかりは is attached to a noun or a demonstrative such as これ, それ or あれ, it emphasizes "that alone and nothing else," or "on that occasion, if no other." A formal expression used in written language. If used in everyday spoken Japanese, it sounds pompous and old-fashioned.

(4) 今はただ祈るばかりだ。／ All I can do now is pray.

Often used in the forms V-るばかりにしてある and V-るばかりになっている. As shown in (1)-(3), it is used to say that preparations are complete and the next action can be taken at any time. Can also be used to say "I've done everything, so the only thing left that I can do is...", as shown in (4).

(5) and (6) mean "it almost seems as if she is about to...." and "it could be said that she was actually doing..." respectively. For example, (1) means "she can read not only modern works but also the classics, which are much more difficult." (2) means "not only my colleagues, but even my family (who should have the most faith in me) are treating me like a fool."

When this expression is used in the form V-ないばかりか, it tends to be used to refer to something unfavorable.

dents.

からこそ is similar to ばこそ. However, からこそ can be used with a cause or reason that has either positive or negative meaning, whereas ばこそ is unlikely to be used in the case of a negative cause/reason.

- (3) このような事故が起きた原因は、利益優先で安全性を軽視してきた結果にはかならない。／ The only reason for this

accident is the emphasis that has been put on making profits at the expense of safety.

Means X is nothing other than Y when presented as X is Yにはかならない. It is a formal expression used in written language, not in spoken language.

b ほかならないN／ほかならぬN

- (1) ほかならない彼の頼みなので、引き受けることにしました。／ Since no one else besides him has asked me a favor, I have decided to help.
- (2) 他ならない鈴木さんからの御依頼ですから、喜んでお引受けいたしましょう。／ Since it is Suzuki-san who is asking me a favor, I would be glad to help.

- (4) うわざ話をしていたところにやって来たのは、ほかならぬ当人だった。／ The person who showed up was the very person we had been talking about.
- (5) 現在の繁栄をもたらしたのも、自然破壊をもたらしたのも、他ならぬ人間である。／ Both the current prosperity and the destruction of nature were brought about by human beings and nothing else.

Means “none other than N.” In the cases of examples (1) to (3), there is an assumption that, if it were a different person who was asking for a favor, the speaker would not have been as accommodating. It is often used in the context that the person is important to the speaker and therefore it is not possible to reject the request. In examples (4) and (5), an emphasis is placed on the topic in the format of “it is indeed N” or “none other than N.” ほかならぬ is used more often than ほかならない.

【ほしい】

As an adjective, 欲しい can be used. In the form

of V-てほしい, however, ほしい is often written in *hiragana*.

① Nがほしい

- (1) もっと広い家の欲しい。／ I would like a more spacious house.
- (2) A: 誕生日のプレゼントは何が欲しい?
／ What do you want for a birthday present?
- B: そうね。新しい服が欲しいな。／ Well, I guess I want some new clothes.
- (3) 子供の頃、僕は野球のユニホームが欲しかった。／ When I was a child, I wanted to have a baseball uniform.

- (5) 『小説』彼はどうしても金がほしい。そのことを考えると夜もねむれないぐらいだ。／ *novel* He wants the money in the worst way. He wants it so badly that he can't get to sleep at night thinking about it.

Expresses the speaker's desire to obtain or to have as his own. Being an adjective of emotion, ほしい in the declarative form can be used either in indicating the speaker's desire as shown in example (1) or asking the listener what s/he desires as in the case of (2). The declarative form ほしい at the end of a sentence cannot be used to indicate the wishes/desires of a third-person sentence's subject. The third person's wishes and desires must be expressed in the form ...は...をほしがっている or ...がほしいようだ.

- (○) 妹は人形を欲しがっている。／ My sister wants a doll.
- (×) 妹は人形がほしいです。／ My sister wants a doll.

When the perspective can shift freely, for example, in narrative fiction as shown in (5), it is possible to use a declarative form at the end of a sentence. Also, it must be noted that, as in the case of (2), a direct inquiry about the listener's desire or wish can only be made when the speaker and the listener are in a close relationship. In a polite

situation, it is better to avoid using ほしい (e.g. 砂糖がほしいですか) and use indirect expressions such as 砂糖はいかがですか.

② V-てほしい

a NにV-てほしい

- (1) この展覧会には、たくさん的人に来てほしい。／ I would like lots of people to come to this exhibition.
- (2) あまり仕事が多いで、だれかに手伝ってほしいと思っている。／ There is so much work that I would like someone to help me.

- (7) A: うちの会社にも落度があったかもしれません。／ It may be that our company was also to blame.
- B: 君にまで、そんなことを言って欲しくないね。／ I wouldn't like to hear that sort of thing from you, of all people.

Indicates the speaker's wish or request for someone else to do something. Means "I would like the other person to do V," as in examples (1) and (2), or "I want things to remain the way they are," as in examples (3) and (4).

There are two negative forms of V-てほしい: V-ないでほしい and V-てほしくない. As in the case of example (5), V-ないでほしい is often used in

place of V-ないでください, when asking the other person not to do V. V-てほしくない can be used in two situations: when the speaker states his wish that does not affect the listener as in the case of example (6), or when the speaker is criticizing the listener's action as in the case of (7).

b ...がV-てほしい

- (1) 寒い冬にはもうあきあきしてきた。早く春がきてほしい。／ I have had enough of this cold winter. I wish spring would come soon.

- (4) 彼の愛が永遠に変わらないでほしいと思うのはぜいたくでしょうか。／ Is it asking too much to think I want his love for me to last forever?

Indicates that the speaker is wishing for a certain event to take place. When the object in question is a person, it takes the form Nに as seen in 2a. If what is wished for is an event, as in the cases of examples (1)-(5), Nが is used.

③ ほしい(なんけれど)

Nがほしい or V-てほしい, which indicates the speaker's desire or wish, can be used as an indirect request. When expressed with a degree of hesitation such as ほしいんですが... and ほしいんだけど..., the request sounds politer and softer.

a Nがほしいんですが

- (1) 客:すみません。これがほしいんですが。／ Customer: Excuse me. I would like this one, please.

店員: こちらでございますか。ありがとうございます。／ Assistant: This one, madam? Thank you very much.

- (2) 店員: これなどいかがですか。／ Assistant: How about something like this?

母親: ダメ。今日は何も買いません。／ Mother: No. I'm not buying you anything today.

Indicates what the speaker wants to obtain and is used by the speaker as an indirect request. It is often used as a set phrase すみません。Nがほしいんですけど／ですけど as shown in examples (1) and (2).

b V-てほしい(なんけれど)

- (1) 客: プレゼントなので、リボンをかけてほしいんですが。／ Customer: Since it's a present, I'd like you to put a ribbon on it.

B: ああ、いいですよ。／All right.

- (4) あしたは出かけないでほしいんだけど。／
I would appreciate it if you didn't go out tomorrow.
- (5) 君にこの仕事をやってほしいんだが。／I would like you to do this job.
- (6) 君には東京に行ってほしい。／I want you to go to Tokyo.

V-てほしい(なんだけれど) is used as an indirect request, asking the listener to perform a certain action indicated by the verb V. When the speaker asks the listener not to take a certain action, V-ないでほしい is used. Examples (5) and (6) are normally used by men, and suggest that they are putting pressure on the listener.

④ V-させてほしい(なんだけれど)

- (1) A: 来週休ませてほしいんですけど。／
Would it be possible for me to take time off next week?
- B: ああ、いいよ。／Yes, you can.
- (2) この件はぼくに任せてほしいんだけど。／I would very much like you to let me handle this.
- (3) 私に行かせてほしいんですが。／Would you please allow me to go?

Used to convey that the speaker wants something, which s/he is making apparent by actions or words.

Is normally used to express the wish of a person other than the speaker, whereas for the speaker's own wishes, ...がほしい is used. However, as in the case of example (4), when the speaker is pretending to want something, it is possible to use ほしがる.

【ほど】

① 数量詞+ほど(approximation)

- (1) 水を 10 CCほど入れてください。／Please add about 10 ml of water.

- (5) A: りんごください。／I would like some apples, please.
B: いくつですか。／How many would you like?

Indicates an approximate quantity when attached to a quantifier. Can be used with lengths of time, such as hours or days. However, it cannot be used with expressions that have no length such as the time of the day or date, where ごろ is used instead.

- (×) 3時ほど来て下さい。／Please come at about 3:00 p.m.
(○) 3時ごろ来て下さい。／Please come

around 3:00 p.m.

The meaning of 五つほど in example (5) is the same as 五つください but it sounds politer to give the listener the option to choose "around five" apples.

ほど, when used with a numerical value to mean "approximately," can be replaced by くらい or らい.

② ...ほど...ない (comparison)

[Nほど...ない]

[Vほど...ない]

a ...ほど...ない

Taking the form XはYほど...ない, it means X is less than Y. For example, in the expression XはYほど大きくない, X is smaller than Y.

While XはYより... indicates a simple comparison of X and Y, in the case of XはYほど...ない, there can be an additional meaning of "X and Y are both ... , but when comparing the two," For example, in the case of (1), it is understood that this summer is hot, but not as hot as last year.

b ...ほど...Nはない

(1) 試験ほどいやなものはない。／ There is nothing as unpleasant as exams.

ない。／ There is nothing so heartbreaking

b ...ほどだ

B: いや、高級車というほどじゃないけれど。わりといい車なんだ。／ I wouldn't call it deluxe, but it's a fairly good car.

Means that the degree of something is not close to what is described by N/Na/A/V. In this expression, a commonly-known example is used as a reference point. For example, as in the case of (2), being able to interpret requires a high standard of English, so the speaker's English is not as proficient as that of an interpreter. Similarly, in the case of (3), having to have an operation is generally regarded as serious, but the speaker's condition is not as serious as this.

As the level of something indicated by V in Vほど increases, something else related to the original V changes proportionately. For example, in the case of (1), as someone grows older, his body gets weaker. In the case of (2), wine that is kept longer improves.

The structure of ...ほど... Naに／A-く／V-ようになる is often used in stating general knowledge or observation, as in the cases of (1)-(4). Example (7) uses ...ほどに that is formal and usually used in written language. There are similar expressions such as ...につれて and ...ば...ほど.

【まい】

Structurally, まい is placed after a Group 1 verb in dictionary form, or a Group 2 verb in either verb stem or dictionary form. As for the Group 3 verbs 来る and する, there are two possibilities each of くるまい／こまい and するまい／すまい, respectively. Of the two, くるまい and するまい are more common in both verbs.

When used with non-verbs, ない becomes あるまい, Nではない becomes Nではあるまい, Naではない becomes Naではあるまい, and A-くない becomes A-くあるまい.

- (10) A: 山本さん怒っていたでしょう?／ Yamamoto-san was angry, wasn't he?
B: うん、すごく怒ってるみたいだった。／ Yeah, he seemed very angry.
- (11) そのときの佐々木さんはなんだか怖くて、いつもの彼ではないみたいだった。／ Sasaki-san was kind of scary at that time. He didn't seem like his usual self.

Shows the speaker's supposition. Means "(I) can't be certain but (I) think it is so." Expresses the speaker's inference based on what they them-

selves have experienced, something they have seen, heard, or sensed.

In contrast to this, when expressing a supposition based on information gained indirectly, such as something heard from another person, らしい is used. When reporting something as it was heard from another, そうだ is used.

(例) 山下さんは今日は来ないみたいですね(もう、時間も遅いし)。／ It looks like Yamashita-san is not coming today (because the time is already late).

(例) 山下さんは今日は来ないらしいですよ(直接聞いたわけではないが、他の人がそう言っていた)。／ It looks like Yamashita-san is not coming today (I haven't heard this directly but somebody else was saying so).

(例) 山下さんは今日は来ないそうです(山下さんから「行かない」という伝言があった)。／ It looks like Yamashita-san is not coming today (I had a message from Yamashita-san saying she is not coming).

...みたいだ and ...みたいだった are both often used, but their meanings are different. As in the next example, V-たみたいだ concerns a thing which occurred in the past and shows the inferred outcome at the time of speaking.

(例) A: 田中さんはいつ来たのかな?／ I wonder when Tanaka-san arrived.
B: 午前中は見かけなかったから、昼から来たみたいです。／ I didn't see him this morning and so he must have come after noon.

V-たみたいだった shows that the speaker thought something to be the case at a certain point in the past.

(例) 昨日の夜は妙だった。誰か来たみたいだから、ドアを開けてみたが、だれもいなかった。そんなことが何度もあった。／ Last night was strange. Because I thought someone had come, I opened the door, but there was nobody there. That kind of thing has happened many times.

Also, when describing a situation as it is seen, for example, when there is a cake before your eyes, このケーキはおいしいみたいだ is not used. In such a case このケーキはおいしいそうだ is used.

- (例) A: これ、新しく買ったスマートフォンです。
／ This is my new smartphone.
(○) B: 便利そうですね。／ B: It looks handy.
(×) B: 便利みたいですね。／ B: It looks handy.

The そう that is used in such cases is different from the そう used to express hearsay and so care must be taken. When expressing hearsay we use おいしいそうだ(they say it is tasty) and 便利だそうだ (they say it is handy/convenient).

- (6) 馬鹿とはさみは使いよう。／Even fools and (blunt) scissors can be useful (depending on how they are used).

Means “depending on one's way of thinking/way of doing.” The form R-ようひとつで, as in example (3), means the thing which comes after will be decided by that alone. Phrases such as どのようにもできる/どうにでもなる (can do/can be done in whatever ways) or 異なる/いろいろだ (different/varied) come afterwards. The latter half of (6), 使いようでどうにもなる is omitted, and in its entirety it is a proverb meaning “anything can be put to good use; it depends on how you use it.”

③ R-ようによっては

- (1) 考えようによっては、彼らの人生も幸せだったと言えるのかもしれない。／Depending on your way of thinking, you could say that their life was happy too.
- (2) その仕事はやりようによってはとても素晴らしいものになるだろう。／Depending on how you do that job, it could be something really wonderful.
- (3) あの山は、見ようによっては仏像が寝ているように見える。／Depending on how you cast your eyes, that mountain can look like a statue of a sleeping Buddha.

Means “depending on one's way of thinking/way of doing.” Used to say that the result differs depending on one's method or viewpoint.

【よう₂】

[V-よう]

One of the Japanese verb conjugation forms.

Expresses the speaker's will or conjecture. -よう attaches to the continuative form of Group 2 verbs, for example: 見よう ((will) see), 食べよう ((will) eat). 来る (come) and する (do) become こよう ((will) come) and しよう ((will) do). In the case of Group 1 verbs, -う is added to the o-row, for example: 行こう ((will) go), 読もう ((will) read), 話そう ((will) speak). In polite Japanese, the form is R-ましょう, as in 食べましょう, 行きましょう.

① V- よう (intention)

Using verbs which demonstrate intentional acts, expresses the intent behind the speaker's action. The rules of usage differ depending on the situation in which it is used, for example in a report, an invitation, or an indirect demand.

In polite Japanese, expressions such as ... しましょう / いたしましょう are used.

a V- よう (volition)

- (1) 夏休みには海に行こう。／ Let's go to the sea during summer vacation.
- (2) 来年こそはよい成績がとれるように頑張ろう。／ Let's do our best to get good grades next year for sure.
- (3) 何にもすることないから、テレビでも見ようっと。／ As there is nothing to do, I'll watch television or something.
- (4) はっきり申しましょう。あなたにはこの仕事は無理です。／ Let me be frank with you. For you, this job is impossible.

- (5) A: 今夜一杯いかがですか。／ How about a drink this evening?

B: そうですねえ。今日は遠慮しておきましょう。／ Hmm. I'm going to take it easy today.

Using verbs which demonstrate intentional acts expresses the speaker's intention and assumption that the action will take place. Example (3) is an expression typical of someone speaking to themselves. Can also be pronounced in the shorter form V- ようと。

b V- よう (offer)

- (1) 足が痛いのか。おぶってやろう。／ Do your legs hurt? I'll carry you.
- (2) 忙しいのなら、手伝ってあげよう。／ If you're busy, I'll help you.
- (3) その荷物、お持ちしましょう。／ Let me carry that luggage (for you).
- (4) 切符は私が手配いたしましょう。／ I'll arrange the tickets.
- (5) 駅までお送りしましょう。／ I'll take you to the station.

Used by the speaker to offer something they can do for another person. It is an action the speaker intends to do for the benefit of another. In humble speech, as in examples (3)-(5), it becomes ...いたしましょう or お...しましょう / いたしましょう.

c V- よう (invitation)

- (1) 君もいっしょに行こうよ。／ Why don't you come with us?
- (2) 一度ゆっくり話しあおう。／ Let's discuss it at our leisure some time.
- (3) 今夜は飲み明かそうよ。／ Let's drink the night away tonight.
- (4) お待たせしました。では出かけましょう。／ Thank you for waiting. Right, let's be going.

Used to invite the listener to act together with the speaker. In contrast to the meaning <offer> in b, where only the speaker is to undertake the action, <invitation> is used to invite the listener also to act together with the speaker.

d V- よう (appeal)

- (1) 横断する時は左右の車に注意しよう。／ Watch out for cars from the left and right when crossing.
- (2) 飲酒運転は絶対に避けよう。／ Let us make sure we will never drink and drive.
- (3) 食事の前には手を洗いましょう。／

Please wash your hands before eating.

- (4) 動物にいたずらしないようにしましょう。
／ Please don't disturb the animals.

Used to appeal to a mass of people either to carry out or to refrain from carrying out a certain action. An expression often used on posters or bunting which is to be seen by many people and appeals to people to follow its instructions/advice.

e もらおう／V-てもらおう

- (1) ビールをもう一本もらおう。／ Get me another beer.
(2) あんたには死んでもらおう。／ You must die!
(3) ちょっと警察署まで来ていただきましょう。／ We'd like you to come to the police station.

In the form (V-て)もらおう／いただこう, used to make an indirect demand of the listener. Similar to expressions used to make requests such as ビールをください(please give (me) beer), 死んでくれ(die!), and 来てください(please come) but (V-て)もらおう has the stronger nuance that the speaker is making a unilateral demand. From a social perspective, it is difficult to use this if one is not a person of higher social rank or in a position of higher authority in the workplace.

② V-よう(supposition, conjecture)

Like だろう, this expresses the speaker's conjecture but is somewhat more old-fashioned. Has the tone of written language. *i*-adjectives also have the same rules of usage as this (A-かろう), as in よかろう／寒かろう.

a V-よう

- (1) 場合によっては延期されることもある。／ Depending on the situation, it may be postponed.
(2) この点については次のようなことが言えよう。／ Regarding this point, perhaps we can say the following.

- (3) 午後からは全国的に晴れましょう。／ It is likely to be sunny across the country from the afternoon.
(4) 山沿いでは雪になります。／ There is likely to be snow in the mountains.

This shows the speaker's conjecture. It is often used with phrases which express possibility but not will, such as ある and なる or 言える, できる, 考えられる and あり得る. The negative form is V-まい.

An old-fashioned, written expression. In speech, だろう is used. V-ましょう is the polite form of V-よう and was often used on weather forecasts in the past but nowadays でしょう is used.

b V-ようか

- (1) 結論としては、次のようなことが言えようか。／ I wonder if we might conclude the following.
(2) こんなひどいことをする人間がこの世にあろうか。／ Are there really people in this world who would do such a horrible thing?
(3) こんなに貧しい人達をどうして放っておけようか。／ How can we ignore such needy people?
(4) そんな馬鹿げたことがありえましょうか。／ Is such stupidity possible?

A way of saying だろうか in writing. Shows doubt or rhetorical negation. The irony in examples (2)-(4) can be interpreted as meaning "I wonder/no, that's not the case." Many use it in the direct style.

③ V-ようか(intention)

Makes a question of the volitional form of a verb and is used in cases where the speaker is expressing some doubt as to their own intentions or ideas and asks for the listener's intent. The basic rules of usage are the same as V-よう but, through the addition of the か, the meaning changes to expressing uncertainty or asking a question.

a V-ようか<volition>

- (1) どうしようか。／ What should we do?
- (2) 昼ご飯は何にしようかな。／ What should we have for lunch?
- (3) 行こうか、それともやめておこうか。／ Should I go or should I give it a miss?
- (4) 私の考えていること、白状しちゃおうか。／ Should I confess what I'm thinking?
- (5) こんな仕事やめてしまおうかしら。／ Perhaps I ought to quit this kind of work?
- (6) これからどうして暮らしていこうか。／ How am I going to live now?

Expresses that the speaker is in two minds over whether to conduct the act or not and has not decided. Apart from か, かな and かしら can also be attached. As かな and かしら are more in the style of someone speaking to themselves, it is difficult to use them with polite Japanese and ましょうかな／ましようかしら and so on are not usually used.

b V-ようか<offer>

- (1) 君の代わりに僕がやろうか。／ Shall I do it instead of you?
- (2) 荷物、僕が持とうか。／ Shall I carry your luggage?
- (3) 何かお手伝いしましょうか。／ Can I help you with something?
- (4) いいこと教えてあげましょうか。／ Shall I tell you something good?

Used with both rising and falling intonation but, when used with a rising intonation, the sense that a question is being asked is stronger.

c V-ようか<invitation>

- (1) 結婚しようか。／ Shall we get married?
- (2) 何時に待ち合わせしようか。／ What time shall we meet?
- (3) どこかで食事しましょうか。／ Shall we get a meal somewhere?
- (4) いっしょに海外旅行しましょうか。／ Shall

we take a trip abroad together?

Used to invite the listener to undertake an action together with the speaker. Often used with falling intonation but, when rising intonation is used, the sense that a question is being asked is stronger.

d もらおうか／V-てもらおうか

- (1) お茶を一杯もらおうか。／ Could I have a cup of tea?
- (2) これ、コピーしてもらおうか。／ Copy this for me.
- (3) 君には、しばらく席をはずしていただきましょうか。／ Would you leave us for a moment?
- (4) A: もうすぐ、帰ると思います。／ I think she'll return soon.
B: じゃ、ここで待たせてもらいましょうか。／ In that case, I will wait here.

Used to indirectly make a demand of the listener. The attachment of the か adds the sense that the speaker has only just arrived at that thought or that there is a feeling of hesitation and so this makes the request slightly softer than without it. From a social perspective, it is usually used by people of superior rank speaking to their subordinates.

④ V-ようが

A written version of V-ても and means "whatever kind of action is taken/whatever kind of situation occurs." Phrases such as 自由だ／勝手だ (be free (to do)/be up to (someone)), which express that an event, a decision, or a demand will come to take place regardless of that action/situation come afterwards. There are many instances in which it can be rephrased as V-ようと but there are also cases in which it cannot be rephrased.

go drinking together.

 (4) 今夜は、語り明かそうではありませんか。／ Let's talk all night tonight.

Attached to verbs which express intention, this is a strong declaration of one's intentions and is used to invite the listener to act together with the speaker. Mainly used by men and has a stronger sense of influence over the other person than V-ようか. Women usually use ...ましょう. The polite form is ...ようではありませんか／ないですか.

⑥ V-ようと

A written version of V-ても and means "whatever kind of action is taken/whatever kind of situation occurs." Phrases such as 自由だ／勝手だ(be free (to do)/be up to (someone)), which express that a thing will come to take place regardless of that action/situation come afterwards. Taking verbs which demonstrate intention, this is used to express the speaker's plans or intentions. In interrogative sentences it is used to ask the listener's intentions. Also, the かと思う of example (4) demonstrates that the speaker's indecisiveness or hesitancy. V-ようと(は)思わない means that the speaker has no such intention.

Similar to つもりだ but differs in that つもりだ can be used to express the will of a third person.

- (○) 山田さんは留学するつもりだ。／ Yama-da-san intends to study abroad.
 (×) 山田さんは留学しようと思う。／ Yama-da-san intends to study abroad.

Moreover, V-ると思う is used to express the speaker's conjecture rather than will and cannot be used in cases where one wishes to express intention. In such cases V-ようと思う must be used.

- (×) 私は東京へ行くと思う。(意志の表現としては誤り)／ I think I will go to Tokyo.
 (Incorrect as an expression of intention.)

is also sometimes inserted.

In speech, みたいだ is often used. Furthermore, in writing ごとし can also be used.

b V-る／V-た かのようだ

② …ような／…ように

a …ように<example>

- (1) あの人のように英語がペラペラ話せたらいいのに。／ I wish I could speak English as fluently as that person.

- (4) 私が発音するようにあとについて言ってください。／ Please pronounce it as I do, after me.
- (5) 先生がおっしゃったようにお伝えしておきました。／ I told it as my teacher told it to me.

Taking the form X ように Y, used to give a specific person or thing as an example of conformity/consistency in quality, content or method with Y. Example (4) means "to imitate an action" and (5) can be rephrased as とおりに.

In contrast to Usage 1 in ようだ<simile>, an expression which compares an essentially different and distinct thing to X in the phrase まるで X のように, with this usage X is given as an example of a specific thing which shares a property or content with Y. However, it is not always possible to distinguish between these two usages.

b …ような N <example>

- (7) 薬を飲んでもよくならないような場合は医者に相談してください。／ In cases where you do not recover after taking medicine, please consult your doctor.

Used to give a concrete example of the noun which follows it. For example, in みかんのような果物(a fruit like an orange), the latter noun represents a higher concept than the former. When continued after a clause, the sentence can be valid without ような but there will be some difference in the meaning if it is included or not. For example, if ような is removed from (7) as 薬を飲んでもよくならない場合 it refers to a specific situation where "the condition does not improve after taking the medicine," but in case of 薬を飲んでもよくならないような場合 then it means "cases like when you take the medicine but the condition does not improve" indicating that there are many other similar situations.

Shows the speaker's impression or conjectural judgement about things. Used in cases where the speaker synthesizes their observations regarding the outward appearance of a thing or their own sensations. This is done through the expression of the speaker's physical sensations, the senses of sight, hearing, taste and so on, by the speaker saying such things as "for some reason there is such a feeling/(it) looks such a way" and results in the passing of a conjectural judgement.

where something already detailed is accepted in the following manner.

B: ええ、そのようですね。／ Yes, it seems like it.

As this is a roundabout way of saying this, そうですね is an example of how this can be said without using ようだ. In this way, ようだ is used to avoid or moderate conclusive expressions which contrast with those of the other party and is often used with adverbs such as どうやら, どうも, 何となく and 何だか.

【れる】

Demonstrates potential. In cases where the V in V-れる is a Group 1 verb, the dictionary form ending changes to the *e*-row sound and る is added, as in 行く(go)→行ける and 飲む(drink)→飲める. Where Group 2 verbs are used, られる is added to the stem, as in 食べる(eat)→食べられる. 来る(come) becomes こられる or これる and する(do) becomes できる. V-れる conjugates in the same way as Group 2 verbs.

In cases where the V is a Group 1 verb, the potential aspect takes the different form V-れる from the passive voice V-られる (for example the form of possibility becomes 飲める, 書ける (can drink, can write) while the passive form becomes 飲まれる, 書かれる (be drunk (by someone), be written (by someone)). On the other hand, Group 2 verbs take the same form for both the potential and passive voices (both become 食べられる (can eat/be eaten (by someone)), 起きられる (can get up/be gotten up (by someone)), for example). However, in speech nowadays, the more people are omitting the ら from the possible V-れる and so it becomes 食べれる, 起きれる. Also, more people are using NをV-れる rather than NがV-れる.

I look here and there but can't find it and so the only thing I can do is to go to the police. And then, they tell me something like "Well, you probably didn't lock it...."

Used to insist on or emphasize that what one is saying is a fact with a logical foundation. Often used in speech and, especially even in cases where there is no logical basis for what is being said, it is often used as a sentence-ending particle. Frequently used when attempting to persuade another person by telling him what your thinking is.

As in examples (2), (3) and (4), used even when the listener does not know the truth, and in such cases can seem pushy, meaning "I think you know it too but...."

② ...わけだ(dialogue-type)

Used to state the logical conclusion after accepting another person's utterance. There are two possible situations for this: one is for the speaker to confirm the conclusion with the other person and the other is for the speaker to accept the conclusion as a fact based on the logical substantiation of the discourse of the other person.

(1) A: この間書いた小説、文学賞がもらえたよ。／ The other day, I received a literary prize for the novel which I wrote.

らしいよ。／ Kawamoto-san seems to have bought a new car even though the old one was so big.

hear that she went to do fieldwork in Africa for three years.

(3) A: 隣の鈴木さん、退職したらしいよ。／ It seems that Suzuki-san from next door has retired.

B: そうか。だから平日の昼間でも家にいるわけだ。／ Oh. So that's why he's at home during the day even on weekdays.

(4) あ、鍵が違うじゃないか。なんだ。これじゃ、いくらがんばっても開かないわけだ。／ Oh! This must be the wrong key. What's up with it? No wonder I couldn't open it however much I tried.

(5) 田中さん、一ヶ月で4キロやせようと思つてるんだって。なるほど、毎日昼ご飯を抜いているわけだわ。／ They say Tanaka-san is trying to lose four kilograms in one month. That's why he's skipping lunch every day.

Often used in the form だから／それで／なるほど／どうりで...わけだ. Used in the form X。(だから)Yわけだ demonstrates that, although the speaker thought the reason for Y was mysterious, they have accepted that Y is so because of X after hearing information from another person which acts as the cause or reason.

Since the speaker comes to his/her own conclusion about the situation it is not necessary to use such phrases as ね afterwards but, in the polite form ...わけです, phrases such as ね and な are appended.

In example (1), the situation is that Yamamoto-san has always been in a good mood lately but the reason for that is not known. It shows that, on hearing the information from A that "It seems Yamamo-

to-san has got married," B comes to understand that as the reason for Yamamoto-san's being in a good mood of late. The situation in (4) is that one person, speaking to him/herself, does not understand why the door will not open and, discovering that he has the wrong key, comes to understand that as the reason for why the door will not open. As in (4) and (5), this is used by persons to detail something they have discovered for themselves or information they have heard from another. Combining that with facts already known, it is also used to show the speaker's understanding of the situation.

③ …わけだから

a …わけだから…はとうぜんだ

- (1) 小池さんは何年もインドネシア駐在員だったわけだから、インドネシア語が話せるのは当然です。／As Koike-san was located in Indonesia for some years, he naturally can speak Indonesian.

- (2) あの議員は履歴を偽って國民をだましていたわけだから、辞職は当然のことだ。／As that member of the Diet lied about her background and deceived the people, it's natural that she should resign.

B: 当然よ。会社のお金、何百万も使い込んでるのがばれたわけだから。／Of course. It's because he was caught embezzling millions of the company's money.

In the form XわけだからYは当然だ, takes X, a reliable fact, as the foundation for asserting that, as X is a fact, Y is the natural outcome.

b …わけだから…てもとうぜんだ

- (1) 彼女は大学を出てからもう8年も経っているわけだから、結婚していても当然だろう。／As it's already been eight years since she left university, she's probably

Takes the form XわけだからYても当然だ. Means "when one accepts X as a reliable fact, it would not be strange if Y were also true." As in examples (2) and (3), it is often used in cases where, in reality, the opposite situation to Y has occurred and runs counter to expectations.

- (1) イギリスとは時差が8時間あるから、日本が11時ならイギリスは3時(だ)というわけだ。／As there is an eight hour time difference with the United Kingdom, when it is eleven o'clock in Japan, that means it is three o'clock in the United Kingdom.

ment〉 and 〈reason〉 uses of Usage 1 and 2 in わけ
だ.

to speak English, when it comes to the

(5) 娘の外泊をただ黙って見のがしている

plans?

B: いえ、予定があるわけではないです
が、その日はうちでゆっくりしたかっ
たので…。／ No, it's not that I have
plans but I wanted to spend that day
relaxing at home....

Used to deny that which is thought to be naturally derived from what has just been said or from the current situation. It is often used together with phrases such as だからといって, 別に and 特に.

In example (1), it can generally be concluded from いつも客がいっぱいだ that "the food is delicious" but this is denied as not being the case. Meaning "It is a mistake to conclude that the food is de-

licious," おいしいわけではない, in comparison to the directly negative 料理はおいしいくない, becomes a euphemistic, indirectly negative expression. Therefore, as in (8), it can be used to make a more indirect refusal than 予定はありませんが. そういうわけではないのですが can also be said. Furthermore, as in (3) and (4), when used with words such as 全部・みんな and 全然・まったく, it becomes a partial denial, meaning for example, "I have read a few" or "I can speak it a little."

② というわけではない

ってわけではない

- (1) このレストランはいつも満員だが、だからといって特においしいというわけではない。／ This restaurant is always full but, be that as it may, it doesn't mean the food is especially delicious.

- (2) 私はふだんあまり料理をしないが、料理がきらい(だ)というわけではない。忙しくてやる暇がないだけだ。／ I don't cook very often but it doesn't mean I hate cooking. It's just that I'm busy and don't have the time to do it.

- (3) A: あした映画に行かない?／ Coming to the movies tomorrow?

B: あした、か。うーん。／ Tomorrow?
I'm not sure....

A: 私とじゃいやだってこと?／ You don't want to go with me?

B: いや、いや(だ)ってわけじゃないんだけど…。／ No, no, that's not it....

- (4) 今日は学校へ行く気がしない。雨だから行きたくないというわけではない。ただ何となく今日は何もする気になれないのだ。／ I don't feel like going to school today. It's not because it's raining. It's just that, for some reason, I don't feel like doing anything today.

This form connects わけではない with という/つて. As in the 雨だから行きたくない of example

(4), in cases where the logic XだからY appears explicitly within the same sentence, it is usual to use というわけではない rather than わけではない。

【わけても】

- (1) この山は、わけても5月がうつくしい。／ This mountain is particularly beautiful in May.

- (2) そのクラスの学生はみんな日本語がうまいたが、わけてもAさんは上達がはやかつた。／ The students in that class are all good at Japanese but A-san's progress has been particularly fast.

- (4) 北風が身を切る季節になったが、給料日前の今夜はわけても寒さが身にしみる。／ It's the season when the north wind bites but tonight, before payday, I feel as though the cold is particularly penetrating.

Means "among some things, particularly." Written expression and is not used in spoken language.

【わけにはいかない】

① V-るわけにはいかない

- (1) ちょっと熱があるが、今日は大事な会議があるので仕事を休むわけにはいかない。／ I have a bit of a fever but there is an important meeting today and so I can't take a holiday from work.

- (2) カラオケに誘われたが、明日から試験なので行くわけにもいかない。／ I was invited to karaoke but I have tests from tomorrow and so I cannot make it.

- (3) 体調を崩した仲間を残して行くわけに

もいかず、^{と ざんたい}登山隊はしかたなくそこから下山することになった。／ They couldn't leave their unwell friend behind and so the mountaineering party had no choice but to descend the mountain from there.

- (4) いくらお金をもらっても、お宅の息子さんを不正に入学させるわけにはいきません。／ However much money you give me, I can't dishonestly allow your son to pass into this school.

- (6) A: うちで猫を飼っていること、大家さんには内緒にしてもらえませんか。／ Will you keep it a secret from the landlord that we're keeping a cat in the house?
- B: いや、そういうわけにはいきませんよ。契約ではだめなことになっているんですから。それにみんな猫の鳴き声で迷惑しているんですよ。／ No, I can't do that. It's against the terms of the contract. Besides, everyone is annoyed by its cries.

Means "It is not possible to do so." It does not simply mean "cannot do" but rather that "thinking from general knowledge, socially accepted ideas or past experience (something) cannot be done."

私はお酒が飲めない shows that the speaker is constitutionally a weak drinker and, therefore "cannot drink." However, お酒を飲むわけにはいかない does not mean that constitutionally they are a weak drinker, but rather that, for some reason (for example, they have come by car), they

cannot drink. Also, as in the そういうわけにはいかない of example (6) where it refers to the inability to keep the secret, it can also be used in acknowledging the previous sentence.

② V-ないわけにはいかない

- (1) ほか ひと ひとともかく、あの上司に飲みに誘わいたら付き合わないわけにはいかない。断ると後でどんなめんどうな仕事を押しつけられるかわからないのだから。／ If it's somebody else it's okay, but if that supervisor invites you to go drinking with him, you have to go. If you refuse, you don't know what kind of drudging job you'll be made to do.
- (2) 実際にはもう彼を採用することに決まっていたが、形式上はめんどうでも試験と面接をしないわけにはいかなかつた。／ In reality we had already decided to employ him but, formally, even though it's troublesome, we had to conduct an exam and interview.
- (3) 今日は車で来ているのでアルコールを飲むわけにはいかないが、もし先輩に飲めと言われたら飲まないわけにもいかないし、どうしたらいいのだろう。／ As I've come by car today I can't drink alcohol, but if my superior tells me to drink I'll have to. What should I do?
- (4) A: あんなハードな練習、もうやりたくないよ。疲れるだけじゃないか。／ I don't want to do that kind of hard exercise any more. It will just make me tired (without any benefit).
- B: そういうわけにはいかないだろう。監督に逆らったらレギュラーから降ろされるぞ。／ That's no excuse. If you go against the coach you'll be dropped as a regular.

Connected to the negative form of a verb, this expresses the obligation that “It is not possible not to carry out that action,” in other words, “must do.” This also takes as its reason generally knowledge, socially accepted ideas or past experience. As in (4), it can also be used in the form そういうわけ or, in other words, やらないわけ.

【わざわざ】

- (1) 山田さんはわたしの忘れ物をわざわざうちまでとどけてくれた。／ Yamada-san came to my house expressly to deliver something I had forgotten.
- (2) わざわざととけてくださいって、ほんとうにありがとうございました。／ Thank you so much for taking the trouble to deliver this to me.
- (3) かせだというから、わざわざみかんまで買っておみまいに行ったのに、そのともだちはデートにでかけたと言う。／ Because I heard that a friend of mine had caught a cold, I went round to pay her a visit with some oranges I had bought just for that, only to find out that she had gone on a date.

- (5) 心配してわざわざき来てあげたんだから、もうすこし感謝しなさいよ。／ I was worried and have come especially to visit you, so show a bit more gratitude.

Means to do something especially for some reason, not through obligation but through courtesy, good will or concern, and not just by coincidence or chance. Often used together with phrases such as のだから an のに.

【わずか】

- (1) さいふの中に残っていたのはわずか 200

えん 円だった。／ I had only 200 yen left in my purse.

- (2) その会議のその日の出席者はわずか 5 人だった。／ At that conference, there were only five people present on that day.
